POSITIVE MONEY EUROPE

- A **Brussels-based civil society organisation** (Belgium)
- Working to align **Europe's monetary and financial system** with **environmental sustainability, social justice and economic resilience**
- Providing **evidence-based policy development**, **stakeholder engagement** and **strategic communication** to inform **European economic, energy and climate policymaking**

What we are looking for

- **Partners (universities, research institutes, public authorities etc.) and coordination leaders** to develop Horizon Europe Cluster 5 proposals together

- **Main topics addressed**
  - The economic, financial and institutional conditions for decarbonisation
  - The relationship between financing conditions and low-carbon investments
  - The effectiveness and distributional consequences of climate policy-instruments

- **Areas covered**
  - Climate sciences and responses (destination 1)
  - Sustainable, secure and competitive energy supply (destination 3)

What we offer

- **Ideas for a project**: HORIZON-CL5-2027-D1-09 "*Assessing the performance of policy instruments to inform climate change mitigation action*"
  - A scope not covered by the ETS: economic, social and distributional effects of climate mitigation
  - The impact and interaction of national policies with EU-wide policies and measures, including economy-wide modelling (price responsiveness and behavioural change by consumers)
  - Interdisciplinary collaboration between scientists, economists and SSH

- **Expertise we bring to this project**
  - Interaction between macroeconomic, financial and climate policies
  - Experience connecting technical evidence with EU policy processes and translating complex topics into clear messages
  - Solid stakeholders engagement

Our expertise

Some of our relevant recent research outputs

- **Renewable energy and electricity prices.** Our report *Towards Cheaper Electricity* examines the relationship between wind and solar deployment, wholesale electricity prices and exposure to fossil-fuel volatility

- **Central-bank frameworks and environmental risks.** *Nature's Nudge*, developed with WWF's Greening Financial Regulation Initiative, explores the role of the ECB collateral framework in the transition and the treatment of climate- and nature-related risks. *Unlocking the ECB's green potential* examines the ECB's revised operational framework and shows how the central bank could boost green investments through green structural operations

Our network and reach

How we amplify impact

- **Our network.** We co-lead the Sustainable ECB Coalition and a Forum on Monetary Policy and Inequalities. Over the past year we have developed strong ties with national renewable energy associations, and our engagement spans from EU institutions, the ECB and national central banks to researchers, business associations and civil society organisations.

- **Our reach.** We are regularly featured in many media outlets at the international, European and national level, including the Financial Times, Reuters, EUObserver, Euronews, Politico Pro, The European Correspondent, Green Central Banking and IlSole24Ore
