	Assistant Professor

Organisation

Istanbul Medeniyet University is a public university located at central Istanbul.
I work as an Assist. Prof. at the Department of Political Science and Public Administration.

Areas of Activity

- SU-GOVERNANCE-10-2019: Drivers and contexts of violent extremism in the broader MENA region and the Balkans

Abdullah Gul University

Organisation

Country	Turkey
City	Kayseri
Street	Barbaros Mah. Erkilet Blvd. Sumer Campus
Web	http://www.agu.edu.tr/

Person

Name	Harika Suklun
	Assistant Professor

Organisation

As a Higher Education Institute, AGU offers education to young learners through partnerships and learner-centered approaches and leads learners to find solutions to global challenges. AGU's goal is to develop citizens who can contribute to societies and shape the future by converting knowledge into personal and social values.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- DT-TRANSFORMATIONS-02-2018-2019-2020: Transformative impact of disruptive technologies in public services
- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- DT-TRANSFORMATIONS-07-2019: The impact of technological transformations on children and youth
- TRANSFORMATIONS-08-2019: The societal value of culture and the impact of cultural policies in Europe
- DT-TRANSFORMATIONS-11-2019: Collaborative approaches to cultural heritage for social cohesion
- TRANSFORMATIONS-13-2019: Using big
- DT-GOVERNANCE-05-2018-2019-2020: New forms of delivering public goods and inclusive public services
- DT-GOVERNANCE-13-2019: Digitisation, Digital Single Market and European culture: new challenges for creativity, intellectual property rights and copyright
- GOVERNANCE-16-2019: Reversing Inequalities
- GOVERNANCE-17-2019: Democratic crisis? Resolving socio-economic and political challenges to reinvigorate democracies
- GOVERNANCE-18-2019: Innovation in government - building an agile and citizen-centric public sector
- GOVERNANCE-19-2019: A European Social Catalyst Fund to scale up high performing social innovations in the provision of social services

data approaches in research and
innovation policy making

- GOVERNANCE-02-2018-2019: Past,
present and future of differentiation in
European governance

Academy of Finland

Organisation

Country	Finland
City	Helsinki
Street	
Web	https://www.aka.fi/en/

Person

Name	Helena Vänskä
	Science Adviser, SC6 NCP

Organisation

I participate as the Finnish National Contact Point for SC6, mainly interested in general presentations and criteria of the upcoming calls. I work for the Academy of Finland, which promotes excellent, responsible and high-impact research with a view to ensuring that society can make the best possible use of the results of that research. We produce high-quality data and analyses and support the use of scientific knowledge in policy-making. We work in close consultation with other stakeholders in the Finnish research, education and innovation system.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- DT-TRANSFORMATIONS-02-2018-2019-2020: Transformative impact of disruptive technologies in public services
- GOVERNANCE-01-2019: Trust in governance

ActionAid

Organisation

Country	Italy
City	Milano
Street

Person

Name	Claudia Simoni
	Project Designer

Organisation

We defend and promote human rights, fighting social exclusion, especially of young people, women and migrants. 1 and a half billion people live in poverty, forced to give up food, health, education. The world has sufficient resources to guarantee everyone a dignified life: the problem is their distribution and access. We are the voice of people living in poverty, in Italy and in the world. Our goal? More equitable and fairer societies. For everyone.

We promote citizenship education to increase the active participation of citizens and their involvement in decisions concerning them. Because we want to make people and communities able to face emergencies and future challenges.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- DT-MIGRATION-06-2018-2019: Addressing the challenge of migrant integration through ICT-enabled solutions
- MIGRATION-07-2019: International protection of refugees in a comparative perspective
- TRANSFORMATIONS-04-2019-2020: Innovative approaches to urban and regional development through cultural tourism
- TRANSFORMATIONS-08-2019: The societal value of culture and the impact of cultural policies in Europe
- GOVERNANCE-01-2019: Trust in governance
- GOVERNANCE-04-2019: Enhancing social rights and EU citizenship
- GOVERNANCE-16-2019: Reversing Inequalities
- GOVERNANCE-17-2019: Democratic crisis? Resolving socio-economic and political challenges to reinvigorate democracies

ActionAid Italia

Organisation

Country	Italy
City	Milan-Rome
Street	
Web	https://www.actionaid.it/

Person

Name	Patrizia Caruso
	Federal Development Officer

Organisation

ActionAid is an international organisation, working with over 15 million people in 45 countries for a world free from poverty and injustice. Our head office is in Johannesburg and we were the first international development organisation with our head office based in Africa. We also have offices right across Asia, the Americas and Europe. We believe the people whose lives our work affects should decide how we're run. We help people use their own power to fight poverty and injustice. Because that's how real change happens – for families, for communities, for whole societies.

Areas of Activity

- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- GOVERNANCE-04-2019: Enhancing social rights and EU citizenship

Organisation

ANR provides funding for project-based research in all fields of science - for both basic and applied research - to public research organisations and universities, as well as to private companies (including SMEs). Employing a method based on competitive peer reviews compliant with international standards, ANR provides the scientific community with instruments and programmes promoting creativity and openness, and stimulate new ideas and partnerships, particularly between academia and industry. Its activity also contributes to enhancing the competitiveness and the influence of French research in Europe and across the world.

Since 2015, The French National Research Agency (ANR) proposes the MRSEI call "Setting up European or International Scientific Networks" which helps, with a 30k€ funding, researchers, based in a French institution, finalize their network and proposal in order to submit it at collaborative H2020 or large-scale international calls, under French coordination.

Akhmet Yassawi International Kazakh-Turkish University

Organisation

Country	Kazakstan
City	Turkestan
Street	Sattarkhanov avenue, 29
Web	http://ayu.edu.kz/en/about

Person

Name	Nurbek Saparkhojayev
	Head of "Computer Engineering" Department

Organisation

Akhmet Yassawi International Kazakh-Turkish University was established on June 6, 1991. The President of the Republic of Kazakhstan, N.A. Nazarbayev, opened this university for the development and prosperity of our spiritual capital, the city of Turkestan. Originally, the university was formed as the Turkestan State University named after Khoja Akhmet Yassawi.

On May 1, 1992, as a result of an agreement between the President of the Republic of Kazakhstan, N.A. Nazarbayev and the Prime Minister of the Republic of Turkey, Suleyman Demirel, the university was awarded the status of an "International University". On October 31, 1992, the Governments of the Republic of Kazakhstan and the Republic of Turkey signed the Agreement on the reorganization of the university into Khoja Akhmet Yassawi International Kazakh-Turkish University. Thus, an international higher education institution was first opened in Kazakhstan. The university is the only university among the Turkic-speaking countries, having international status.

At the moment, about 8,000 students study in the Kazakh, Turkish, Russian and English languages, among them more than 1,300 representatives of about 30 nationalities from 16 countries and 15 autonomous republics of Eurasia. Young people, living in peace and harmony under one roof, receive higher education in 54 specialties of bachelor's degree, 30 specialties of magistracy and 11 specialties of doctoral studies.

The University provides distance learning technology for 22 educational programs. In the educational center for distance learning with a center in Ankara, Turkey, about 4,000 students receive education in 11 specialties within the framework of the TurTEP program. The structure of the International Kazakh-Turkish University named after Khoja Akhmet Yassawi has 4 research centers, the Eurasian Scientific Research Institute, 7 research laboratories and 70 research groups.

Areas of Activity

AliénorEU

Organisation

Country	Belgium
City	Brussels
Street	11 rue de l'industrie
Web	http://www.alienoreu.com/

Person

Name	Marta Bombelli
	EU Affairs Consultant

Organisation

AliénorEU is a consultancy and communication agency specialised in European policies and based in Brussels. We have been involved in different EU projects as dissemination WP leader. Our expertise in communication and European policies allows us to ensure an adequate dissemination of the results of innovative projects, therefore bringing the results of the project closer to the citizens, policymakers and the industry.

Areas of Activity

- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- DT-GOVERNANCE-13-2019: Digitisation, Digital Single Market and European culture: new challenges for creativity, intellectual property rights and copyright
- TRANSFORMATIONS-16-2019: Social platform on the impact assessment and the quality of interventions in European historical environment and cultural heritage sites

Marketplace Opportunities

PROJECT COOPERATION

Your partner for Communication, Dissemination and Exploitation Activities for EU project

As communication and dissemination partner, AlienorEU can:

- plan and implement an effective communication campaign
- Create high-impact dissemination material in several languages
- Provide strategic advice on EU policy and bring added value to the project by involving policymakers
- Engage with end-users to ensure an effective exploitation and commercialisation of the project's

results

- Organise successful events - including in the European Parliament - attended by key stakeholders

Anadolu University

Organisation

Country	Turkey
City	Eskisehir
Street	YUNUS EMRE CAMPUS
Web	https://anadolu.edu.tr/

Person

Name	Harun Serpil
	Lecturer

Organisation

Eskişehir Academy of Economic and Commercial Sciences, founded in 1958, formed the basis of Anadolu University. The Academy was replaced by Anadolu University in 1982, which has gained a well-deserved place as a modern, dynamic and innovative institution among the largest universities not only in Turkey, but also in the world. Situated in the center of Eskişehir, which is well-known as a city of science, culture and youth, its campus houses 12 faculties (undergraduate level) - three of which offer distance education, 3 applied schools – one of which is of music and drama, 2 vocational schools (associate level), 6 graduate schools – four of which are graduate and postgraduate level, and 30 research centers.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- DT-MIGRATION-06-2018-2019: Addressing the challenge of migrant integration through ICT-enabled solutions

ARTIFACTORY

Organisation

Country	Greece
City	PREVEZA
Street	PO Box 13b, Kastrosykia, 48100 Preveza, Greece
Web	https://www.artifactory.eu/

Person

Name	Dorothea Papathanasiou-Zuhr
	Senior Researcher

Organisation

IDENTITY: ARTIFACTORY is a multivalent, flexible nexus that envisions a culture-driven society. Its legal seat is located in Kastrosykia, Region of Epirus, Greece, operating also in Italy, Estonia, Spain and Holland. ARTIFACTORY is working to demonstrate that cultural heritage is an

inherent quality of sustainable tourism and is dedicated to attract projects, skills and networks for community growth and development. The main aims and fields of expertise comprise: **TOURISM DEVELOPMENT:** ARTIFACTORY delivers projects that demonstrate the educational value of culture and the arts through first-hand experiences with audiences at heritage places.

ARTIFACTORY works to improve the planning capacities of tourism professionals and raise awareness of communities, professionals and policy makers on the socio-economic potential of cultural heritage.

CULTURE & CCI: linking the onsite experience to digital heritage by exploiting the powers of the Cultural and Creative Industries (CCI) is a particularity of ARTIFACTORY, which researches the audio-visual languages guiding professionals to develop quality contents for tourism purposes.

YOUTH EDUCATION & TRAINING: ARTIFACTORY develops training for heritage and tourism professionals to help them adapt to the constantly changing knowledge ecosystem, and evolve the individual skills to improve their professional statuses, and is very actively involved in the tourism guide education. ARTIFACTORY considers culture and the arts as the main lever for personal, collective and social development and a driver for citizen education and conflict resolution. Therefore it works to stimulate projects, initiatives and investments by involving and engaging the youth at grass roots level. It involves the youth into informal learning and international mobility opportunities, empowering the latter to act responsibly and creatively for their community heritage.

FEATURED PROJECTS The founding members of ARTIFACTORY are involved in more than 35 years in the design and implementation of EU and international funded projects in the domain of culture, digital heritage and the arts, tourism, VET training, mobility and academic research with more than 250 applications. By designing a series of EU funded projects, they have accumulated expertise in the cultural, tourism and AV sector and VET training. Featured projects include:

ENI CBC BLACK SEA JOP 2014-2020 1/1.1/351/HERIPRENEURSHIP - Establishing long lasting partnerships to upgrade heritage based offers and create new investment opportunities in tourism and the cultural and creative industries at UNESCO designated areas in the Black Sea Basin

INTERREG BALKAN MEDITERANNEAN 2014-2020 BMM/1.2/2619/2017:INNOVIMENTOR-Generating SME product and process innovation with a new tourism mobility model, stakeholder alliances and skills alliances to facilitate the market uptake of local enterprises in remote and sparsely populated areas

COSME PROGRAMME 2014-2020: COS/TOUR/699493/DIVERTIMENTO -Diversifying tourism offers in peripheral destinations with heritage-based products and services, stakeholder-skills alliances to internationalize locally operating micro-enterprises in peripheral and sparsely populated areas"

ENPI CBC BLACK SEA JOINT OPERATIONAL PROGRAMME MIS ETC 282/ALECTOR -Collaborative Networks of Multilevel Actors to advance quality standards for heritage tourism at CB Level

SOUTH EAST EUROPE TRANSNATIONAL COOPERATION PROGRAMME 2007-2013

SEE/B/0015/4.3/X/SUSTCULT-Achieving sustainability through an integrated approach to the management of cultural heritage

SEE/B/0016/4.3/X SAGITTARIUS: Launching (g)local level heritage entrepreneurship: strategies and tools to unite forces, safeguard the place, mobilize cultural values, deliver the experience.

ARTIFACTORY is connected to EDUTOPIA, the George Lucas Educational Foundation. ARTIFACTORY is a member with the OPEN EDUCATION EUROPA, Europe's Community for innovative Education and has been awarded for the Project NTVIS -New Transgenerational Visual Literacy. ARTIFACTORY is a member of the EUROTHENTICA Association of Tourism Enterprises with seat in Rome, Italy, and has joined the Appstore as an autonomous iBook publisher since January 2018.

NETWORKS: ARTIFACTORY participates with 5 voting members the EUROPEANA Collections and its research branch EUROPEANA Pro. ARTIFACTORY has been awarded for the "Joe Petrosino Museum" in Padula, Italy, which has been selected by EUROPEANA as one of the only 10 Museums in Europe for cultural communication.

ARTIFACTORY is founding member of INTERPRET EUROPE, The European Association for the Interpretation of heritage and participates the BOSCH ALUMNI FOUNDATION and EATSA (EUROASIA TOURISM STUDIES ASSOCIATION) committed Tourism and Hospitality research, to ensure the higher standards of international cooperation and avoid misconduct.

Person

Name	Ourania Xylouri
	Director of the Athens Lifelong Learning Institute

Organisation

The Athens Lifelong Learning Institute is a research and education institute, based in Athens, Greece with the mission to foster and enhance innovation processes mainly in the areas of education and lifelong learning, knowledge society, social inclusion, human capital development and labour markets in Greece and in Europe.

The Athens Lifelong Learning Institute represents a rather unique integration of multidisciplinary expertise and innovative thinking drawing on a comprehensive and diverse knowledge base combining research methods and their application, network development and implementation, policy analysis and valorisation of innovative practices.

The Athens Lifelong Learning Institute team is comprised of professionals in the fields of adult education, lifelong learning and human capital development and have worked together for more than 15 years, jointly developing projects and initiatives with the ultimate goal of human capital development and social inclusion in a local, national and European level. People working or cooperating with the Athens Lifelong Learning Institute have provided the Institute with the energy and vision to continue promoting high quality services and new ideas in the fields of vocational training, adult education and social inclusion. Moreover, the Athens Lifelong Learning Institute has a large pool of associate partners [more than 1.000 adult trainers, educators and researchers] from which it regularly draws professionals to staff the lifelong learning activities and its research project. The Athens Lifelong Learning Institute team has a long experience in the development of educational curricula and programmes that keep abreast to the new developments, social demands and European priorities. It also exhibits an active interest in a number of social issues such as social inclusion of disadvantaged groups, discrimination and suppression of human rights and has attempted through the implementation of innovative learning methodologies to moderate their impact.

Azerbaijan Entrepreneurs Confederation (ASK)

Organisation

Country	Azerbaijan
City	Baku
Street	Akad.Hasan Aliyev str. 57
Web	http://ask.org.az/en/

Person

Name	Arif Najimov
	Head of International Relations and Business Development Department

Organisation

Azerbaijan Entrepreneurs Confederation (ASK) was established on March 5, 1999, and has been registered on April 9, 1999. ASK as a public association of employers in the Republic of Azerbaijan, regardless of ownership and organizational-legal form (excluding state-financed organizations) coordinates the activities of legal entities and individuals engaged in entrepreneurial field on a voluntary basis, protects their legal and economic interests, carries out socially-useful purposes, and serves as a non-commercial and non-profit organization which does not aim to earn income as the main purpose of its activity.

The Confederation comprises more than 6,000 entrepreneurial entities, including about 70 economic and social associations and unions.

ASK adequately performs its duties as a social partner and representative of employers in the General Collective Agreement signed on 26 May 2008 on a tripartite basis between the Cabinet of Ministers, Trade Unions and ASK for determining socio-economic policy and regulating labor relations in Azerbaijan.

ASK is a member of the International Organization of Employers, the World Association of NGOs, the International Congress of Industrialists and Entrepreneurs, UN Global Compact as well as working with the International Labour Organization (ILO), Organisation for Economic Co-operation and Development, Deutsche Gesellschaft für Internationale Zusammenarbeit (GIZ) GmbH, the World Bank Group, the European Bank for Reconstruction and Development (EBRD), United Nations Development Programme, United Nations Industrial Development Organization (UNIDO), UNICEF etc. ASK also closely cooperates with the embassies in Azerbaijan. The Confederation has four regional offices in Azerbaijan and thirteen foreign representative offices.

ASK has qualified specialists and experts for preparing a different kind of international programs and projects as well as implementation them successfully. We invite all relevant and interested partners for cooperation and working together within different programs and projects.

For future communication don't hesitate to contact Mr. Arif Najimov = eMail: anajimov@ask.org.az or

ari_coordinator@yahoo.com, Mob./WhatsApp: +994 50 622 37 10

Mr. Arif Najimov is also National Contact Point (NCP) in Strengthening participation of Innovative SMEs within HORIZON 2020 program in the Republic of Azerbaijan.

BPTI

BALTIC
INSTITUTE OF ADVANCED
TECHNOLOGY

Person

Name	Adelė Vaiginytė
	Deputy Director

Organisation

Baltic Institute of Advance Technology (BPTI) is a private research institute from Lithuania specialising in solving complex multidisciplinary problems. For more than 10 years BPTI focuses on creating and developing new technologies and providing R&D services to other companies. Among other fields of competence BPTI has a strong background of working within the field of data science and has extensive experience in application of statistics, data mining and machine learning, artificial intelligence, modelling and analysis of complex systems, analysis of social networks and computational analysis and modeling of social phenomena.

BPTI has experience in participating and coordinating projects funded by Horizon2020, European Space Agency (ESA), European Defense Agency and different local public funds. Some of the most recent projects include National electoral study of Lithuania and modelling of civil resistance in Lithuania.

We assume social responsibility and invite any enterprise, university, institute or other partner in Lithuania or abroad to co-operate in realising interesting ideas. Public awareness oriented BPTI experience include coordination of European Researchers' Night in Lithuania, science promotion TV show and Café Scientifique discussions for general public, creating public recognition and a communicational network of educational institutions of different levels. More on our experience: bpti.eu

For this call, cooperation with Lithuanian Social Innovations Institute (SII) is also foreseen. SII is an independent non-profit organisation that performs fundamental and applied social research, runs projects related to social, educational and science policy and science communication, provides services and solutions for public policy makers, non-governmental organisations and business companies. They have accumulated most experience in such areas as Education and science policy, Popular science, Innovation development, Emigration and diaspora policy, Societal security, Reduction of social exclusion, Youth policy and Social ecology.

------	------------------------------------

Organisation

The Bavarian Research Alliance GmbH (BayFOR) is a publicly funded private company for the support of Bavaria as a centre for science and innovation within the European Research Area. BayFOR supports and advises scientists at Bavarian universities and universities of applied sciences in the competition for regional, national and European research funding – with a focus on Horizon 2020. Our advisory portfolio, which is completely free of charge for researchers in Bavaria and their respective project partners, includes: partner search, advice concerning European politics in the proposal design and active participation in the proposal writing process. Furthermore, BayFOR's goal is to increase the participation of Bavarian enterprises – particularly SMEs – in funding programmes and to facilitate closer cooperation between science and business at both a national and international level.

Furthermore, in May 2018 the BayFOR established an office in Munich to coordinate scientific cooperation between Bavaria and Israel. It aims to strengthen scientific ties between Bavaria and Israel and to promote bi- and multilateral cooperation projects. The main focus is directed at the current EU framework Program for Research and Innovation Horizon 2020, but includes also bilateral funding instruments as the German-Israeli Foundation for Scientific Research and Development (GIF), the German-Israeli Project Cooperation (DIP), and others.

	Assistant Professor

Organisation

Established in 1984 is a leading centre of higher education and research in Turkey. The University has over 12,000 students in nine faculties, two professional schools and three vocational schools together with six institutes of graduate studies, and it grants full scholarships to over 2,500 students of high academic achievements. The medium of instruction in the University is English with foreign students and academic staff coming from over 40 different countries. Most of the faculty members have professional experience in prominent universities in North America and Europe. According to ISI Citation Indexes, Bilkent continues to be first in Turkey in terms of number of published papers per faculty member and ranks high internationally. Bilkent University is ranked 31st among young universities worldwide by the Times Higher Education World University Rankings of the world's top universities for 2014. Members of Bilkent University have managed and/or coordinated 89 EU Projects, including 29 IRG/CIG Projects. Currently they are carrying out 122 projects, 76 of which are international, including 3 ERC Grants.

Areas of Activity

- GOVERNANCE-02-2018-2019: Past, present and future of differentiation in European governance
- GOVERNANCE-04-2019: Enhancing social rights and EU citizenship
- DT-GOVERNANCE-05-2018-2019-2020: New forms of delivering public goods and inclusive public services
- GOVERNANCE-16-2019: Reversing Inequalities
- GOVERNANCE-17-2019: Democratic crisis? Resolving socio-economic and political challenges to reinvigorate democracies

Bruegel

Organisation

Country	Belgium
City	Brussels
Street	Rue de la Charité 33
Web	http://bruegel.org

Person

Name	Pauline Chetail
	Public Funding Manager

Organisation

Bruegel is a European think tank that specialises in economics. Established in 2005, it is independent and non-doctrinal. Bruegel's mission is to improve the quality of economic policy with open and fact-based research, analysis and debate. We are committed to impartiality, openness and excellence. Bruegel's membership includes EU Member State governments, international corporations and institutions.

Beyond our scholars' research, our main activities revolve around the organisation of events (workshops, conferences, policy dialogues, etc.) and the dissemination of research results targeted to policy-makers and other target audiences (policy-briefs, policy contributions, podcasts, etc.).

We are very eager (and used to) offering the following 'infrastructure' to our partners on EU-funded projects:

- In-house communications team
- Conference suite (up to 150 attendees)
- Established and engaged network of high-level stakeholders (policy and decision-makers, Member States governments representatives) and the reputation and expertise to attract more in a wide range of topics.

Although our core expertise is in European economic governance and policy, we are increasingly working on a variety of areas; and are eager to join consortia in those. As needed, we can support your consortium with communication and dissemination and be more or less involved in the research.

Areas of Activity

- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- TRANSFORMATIONS-13-2019: Using big data approaches in research and
- GOVERNANCE-16-2019: Reversing Inequalities

- innovation policy making
- GOVERNANCE-01-2019: Trust in governance
- GOVERNANCE-02-2018-2019: Past, present and future of differentiation in European governance

Marketplace Opportunities

PROJECT COOPERATION

Expertise offered on socio-economic effects of migration

Bruegel (Brussels-based economic think tank) is looking for a consortium/coordinator for the upcoming MIGRATION-03-2019 call.

Bruegel fellows have recently worked (and plan to continue focusing) on the economic impact of migration in the EU. We have in particular started to investigate the level of financial inclusion of immigrants and its policy implications. With this as well as many other economic studies in the area, we believe our expertise fits quite well within the scope of the call, and as a Brussels-based think tank, we can also offer to be a "Brussels" antenna for the consortium, as well as provide and nurture policy engagement/dissemination for the project.

More info on our work in migration is available here: <http://bruegel.org/tag/migration/>

In particular we can flag these past works that are particularly relevant for the call:

1) Blueprint/ book- "People on the move: migration and mobility in the European Union"

(<http://bruegel.org/2018/01/people-on-the-move-migration-and-mobility-in-the-european-union/>)

- This study has been presented already in 6 different European capitals (Brussels, Rome, Berlin, Paris, Luxembourg and Budapest)

- The blueprint was downloaded more than 4000 times from our website

2) Policy contribution- "Europe's role in North Africa: development, investment and migration"

(<http://bruegel.org/2017/04/europes-role-in-north-africa-development-investment-and-migration/>)

- Presented at the informal ECOFIN meeting of EU finance ministers in Malta on 8 April 2017

3) Policy Contribution- "The case for a common European refugee policy" (<http://bruegel.org/2017/03/the-case-for-a-common-european-refugee-policy/>)

- Result of the work done by Bruegel fellows in the framework of the Vision Europe Consortium, a multi-disciplinary group of leading scholars. (<http://bruegel.org/2017/02/improving-the-responses-to-the-migration-and-refugee-crisis-in-europe/>)

Please feel free to get in touch with me if you are looking for a partner with our profile!

PROJECT COOPERATION

Expertise offered in governance studies, economic analysis and policy impact

Bruegel is deeply immersed in the study of European governance and in the debates on the future of Europe.

The European crisis remains on top of our research agenda. The central priorities concern the best way to address remaining market tensions, the broader macroeconomic policy response in the EU, central banking, policies to foster macroeconomic adjustment, and the question of how to reform European governance to ensure effectiveness and legitimacy. More on the topic: <http://bruegel.org/tag/european-governance/>

Most notably, we have recently collaborated with academics on a tool and methodology to analyse the diverging narratives (in the media in particular) on the euro/the crisis, which could be further built on for a project under this call: <http://bruegel.org/2018/02/tales-from-a-crisis-diverging-narratives-of-the-euro-area/>

We would be happy to support a consortium with our fellows' expertise, our events' suite and staff, as well as Brussels-location and close link to policy-makers.

PROJECT COOPERATION

Expertise offered in governance studies, economic analysis and policy impact

Bruegel is deeply immersed in the study of European governance and in the debates on the future of Europe. We are notably involved in a winning-consortium for the 2018 Research & Innovation Action under this call (expected to start in February 2019).

Our work and events on the topic:

- <http://bruegel.org/tag/brexit/>
- <http://bruegel.org/tag/european-integration/>
- <http://bruegel.org/tag/european-governance/>

We would be happy to support a consortium with our fellows' expertise, our events' suite and staff, as well as Brussels-location and close link to policy-makers.

PROJECT COOPERATION

Expertise offered in economic analysis and policy impact

Bruegel is deeply immersed in the study of European macroeconomics and governance.

The European crisis remains on top of the research agenda at Bruegel. The central priorities concern the best way to address remaining market tensions, the broader macroeconomic policy response in the EU, central banking, policies to foster macroeconomic adjustment, and the question of how to reform European governance to ensure effectiveness and legitimacy.

A growing share of Bruegel's research has been devoted to the study of the structural underpinnings of economic performance, competitiveness and growth. Topics covered include: the role of information technology for growth, competition policy and state aid, entrepreneurship, globalisation and future of manufacturing, firm internationalisation and competitiveness.

Our work and events on the topic: <http://bruegel.org/tag/inequality/>

We would be happy to support a consortium with our fellows' expertise, our events' suite and staff, as well as Brussels-location and close link to policy-makers.

PROJECT COOPERATION

Expertise offered in mapping and developing R&I indicators

Bruegel has been deeply immersed in the topic and active in leading and contributing to EU-funded projects in the area. A growing share of our research has been devoted to the study of the structural underpinnings of economic performance, competitiveness and growth. Topics covered include: the role of information technology for growth, competition policy and state aid, entrepreneurship, globalisation and future of manufacturing, firm internationalisation and competitiveness.

Our previous work and collaborative projects most notably include:

- The SIMPATIC project (FP7 project we coordinated), which provided policy makers with a comprehensive and operational tool box allowing for a better assessment of the impact of research and innovation policies in Europe (https://cordis.europa.eu/project/rcn/102503_en.html)
- An upcoming Horizon 2020 winning-consortium in which we are involved, analysing the micro and macro underpinnings of the productivity paradox, funded under the TRANSFORMATIONS-14 call (we could therefore support the development of tangible synergies in between projects).
- The EFIGE database (FP7 project we coordinated), which combined measures of firms' international activities (e.g. exports, outsourcing, FDI, import) with quantitative and qualitative information on around 150 items including R&D and innovation, labour organisation, financing and organisational activities and pricing behaviour.

We would be happy to support a consortium with our fellows' expertise, our events' suite and staff, as well as Brussels-location and close link to policy-makers.

Brussels Agency for Business Support - hub.brussels

Organisation

Country	Belgium
City	Brussels
Street	Chaussée de Charleroi 110
Web	http://hub.brussels/en/

Person

Name	Claudia Oliveira
	Horizon 2020 National Contact Point & Enterprise Europe Network Adviser

Organisation

Brussels Business Support Agency (hub.brussels) is the public agency set up by the regional authorities of the Brussels Capital Region to provide consulting services to Brussels-based companies and to entrepreneurs wishing to set up a business in Brussels. Its services operate according to 3 activities lines:

- 1) Universal information service via direct information and signposting towards appropriate partners in order to guarantee to all those doing business in the Brussels Capital region a specific, rapid, professional and multilingual reply to all their questions regarding the creation or development of an economic activity.
- 2) Specialist support: hub.brussels provides selective and individual support on finance, public aid, Town planning and environmental permits for entrepreneurial projects with high potential or critical for the region. In particular, hub.brussels in-house experts provide tailor-made support on access to finance for SMEs and entrepreneurs with a high potential.
- 3) Encouraging growth and innovation in priority areas (Green Technologies, Sustainable Construction, Lifetech, ICT, and Creative Industries): hub.brussels encourages entrepreneurial innovation and internationalization in the Brussels Region's priority areas of activity, in order to promote regional and international growth, competitiveness, sustainability and employment. It does so by providing tailor-made support according to the degree of maturity and need of the project (business plans, sales and marketing, Intellectual Property, Technology Transfer etc).

hub.brussels has been officially nominated by the Brussels Capital Regional to host the team of National Contact Point (NCP) on FP7/CIP and now on Horizon2020 on Societal Challenges and Leadership in Enabling and Industrial Technologies. As such, it raises awareness and provides quality guidance and support to Brussels based stakeholders on access to EU funding for research and innovation, notably on the Energy and Environment field.

Areas of Activity

Organisation

Ca' Foscari University of Venice (1868) is a leading Italian public university in Humanities, Languages and Literature, Science, Economics and Management. With more than 20,000 students and nearly 1,400 staff, UNIVE is organised into 8 Department, 5 Interdepartmental Schools and 3 Schools, committed to developing the next generations of researchers, scientists and academics through collaboration across disciplines, advanced research projects and innovative study programs. The University has both an outstanding national and international reputation for academic excellence in the fields of teaching and research; in 2018, it has been rated among the 150 top universities for Modern Languages, and among the 250 top universities for Economics, Econometrics, Linguistics, History, Arts and Humanities in the QS World University Ranking by Subject. Since 2007, it has been awarded with 198 grants in the frame of individual and collaborative European and International projects.

Areas of Activity

- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- TRANSFORMATIONS-04-2019-2020: Innovative approaches to urban and regional development through cultural tourism
- DT-TRANSFORMATIONS-07-2019: The impact of technological transformations on children and youth

PROJECT COOPERATION

DT-TRANSFORMATIONS-11-2019

The The Center for the Humanities and Social Change at Ca' Foscari is an interdisciplinary platform created by Ca' Foscari University of Venice and the Humanities and Social Change International Foundation in 2017. The Center is working on the topic DT-TRANSFORMATIONS-11-2019, looking for partners.

The Center main focus is on cultural pluralism that is addressed in both public events and private seminars. The Center's Fellows carry out research on topics ranging from religious prejudice in India today and in Byzantium, from fake news and polarization to the teaching of religious studies in Europe, from the representation of migration in contemporary Italian literature and Asians in cinema, to the conditions and ethnic division of labour in the gig economy.

The Center promises to draw upon the creative power of the humanities to develop responses to the world's most significant and pressing challenges, in partnership with three other HSC centers at other international universities (University of California Santa Barbara, Humboldt University in Berlin, Cambridge University).

Director: Shaul Bassi

Scientific Committee: Tiziana Lippiello, Sabrina Marchetti, Massimo Warglien

HSC Venice is a member of the Consortium of Humanities Center and Institutes (CHCI). Partner Centers:

Center for the Humanities and Social Change, University of California Santa Barbara

Center for the Humanities and Social Change, Humboldt University, Berlin

Center for the Humanities and Social Change, University of Cambridge

Humanities and Social Change International Foundation

PROJECT COOPERATION

Digitization: new challenges for creativity

Digital technologies improved the access to cultural goods and services, empowering the experience of reading books, watching movies, and buying fashion and design products for an increasing number of people. The digital transformation of CCI started from the distribution of products and progressively included all processes up and downstream the value chain. We download movies, music, and books supplied by big retail platforms. Digital companies – based both in Europe and Usa - are also increasingly involved in the process of design and production of contents, accelerating the hybridisation of creative languages, and mixing products and services both in digital and analogical contexts. As an effect, they control a larger part of the process of value creation, having an impact that goes well far their initial role as digital retailers.

We are working on a proposal under this topic, looking for partner to build a consortium or offering our partnership specifically on a WP devoted to new challenges for creativity:

1- Analysing the effects of digital platforms on the processes of consumption experienced by European consumers. In a world where digital contents represent the greatest part of cultural consumptions, platforms play a strategic role in defining the way we make sense of things and interpret the world, first as consumers and then as citizens.

2- Studying the impact of digitisation on the content of creative processes. Platforms are powerful sense making machines, and while satisfying the mass market, they also define the rules for artists and creative people to satisfy the audience.

PROJECT COOPERATION

migrant children and language

Ca' Foscari University of Venice - Department of Linguistics and Comparative Cultural Venice Accessibility Lab (<http://www.unive.it/pag/26868/>)

Research unit working in the area of Theoretical Comparative Linguistics and its applications to typical and atypical language acquisition, language learning in formal and natural environments,

development of linguistic and metalinguistic competence, language impairments in multilingual environments.

Possible WP deliverables that may be relevant:

- the assessment of metalinguistic competence of children, teachers, and families
- protocols to enhance metalinguistic competence for the inclusion of migrant children in multilingual environments, addressed to teachers, families, policy makers, other stake-holders
- assessment to detect language and learning impairments in migrant children (deafness, autism, dyslexia, other)
- protocols for the inclusion of migrant children with language and learning disabilities

The team is part of a vibrant research and teaching department interested in linguistics as well as cultural issues. The Department has been recently evaluated among the 120 most excellent departments of Italian Universities. It features research and courses on 20 languages and cultures, among which Albanian, Croatian, Modern Greek, Romanian, and Italian sign language. It closely collaborates with public and private institutions, such as schools, language assessment and rehabilitation centres, museums, with which it entertains high profile internships and life-long learning initiatives. It takes part in cultural planning and production, promoting initiatives in the context of accessibility of education in collaboration with its spin-off Veasyt s.r.l. <http://www.veasyt.com/> ., and with local cultural institutions.

The Department has been and currently is Partner of 15 national and international projects, among which Sign Hub H2020 www.sign-hub.eu/ ; ADAPT www.progetto-adapt.eu/ ; Veasyt Live! live.veasyt.com/; SPREAD THE SIGN www.spreadthesign.com/it/

Researchers of the department have participated to and are currently involved as member of the management committees of the following COST actions: Study Abroad research in European Perspective (CA15130) www.cost.eu/COST_Actions/ca/CA15130 ; Unravelling the grammars of european sign languages: pathways to full citizenship of deaf signers and to the protection of their linguistic heritage (IS1006) www.cost.eu/COST_Actions/isch/IS1006

Team participants:

Anna Cardinaletti (full professor in Linguistics)

Giuliana Giusti (full professor in Linguistics)

Giulia Bencini (associate professor in English Language and Linguistics)

Chiara Branchini (assistant professor in Sign Language and Linguistics)

Francesca Volpato (assistant professor in Applied linguistics)

Organisation

Catholic University of Eichstätt-Ingolstadt (KU) in southern Germany is the first and only Catholic university in the German-speaking world. Located in the mid of Bavaria, it combines the advantages of being a small university with an international and interdisciplinary higher education institution. Compared to other German universities, it is a rather small institution with some 5,300 students. Nevertheless, it is the largest private university in Germany. The university has its main campus in Eichstätt and another one in Ingolstadt (WFI - Ingolstadt School of Management), site of the first Bavarian University founded in 1472. The 8 faculties of the Catholic University of Eichstätt-Ingolstadt offer 40 different subjects. The CU is fully accredited by the Free State of Bavaria, and is thus equated to German state universities in any respect. KU has a teacher-student ratio of 1:15. In a Germany-wide ranking in 1999, KU was among Germany's top universities. In subsequent years, KU received high rankings for the learning environment it can offer to students.

The Research Service Center of KU is a central contact and service point for all research-related topics established in 2016 which informs, advises and supports scientists of all faculties on research issues. Its primary focus is on initiating, acquiring and implementing third-party funded research projects. Simultaneously, it provides consultancy to the university Management board of KU in strategic research matters as well as in managing research processes. With this mission, ZFF contributes to sharpen KU's profile and to evolve KU's principal fields of research.

Organisation

Since 2007, the Centre for Intercultural Studies (CEI) of the Polytechnic of Porto has developed applied and fundamental research, co-operating with other national and international institutions in scientific, technical and cultural projects. CEI's designation and goals comprehend the whole interdisciplinary field generated by the research, exchange opportunities, scientific events, and editorial projects the team has created along the years within CEI's main research lines: intercultural theories and practices, intercultural communication, and intercultural business.

CEI is composed of more than 50 researchers and lecturers from the Polytechnic of Porto and other national and international institutions, and has the support of a renowned advisory board. CEI hosts and supervises masterclasses, conferences, seminars, and two MA programs – in Intercultural Studies for Business (DD with the Université d'Artois) and in Specialized Translation and Interpreting – with the help of a specialized library and several open access databases. From the onset, CEI has taken part in countless national and international conferences and publications, funded research projects, and published more than a dozen books for worldwide distribution, in the vast field of intercultural studies. Every year, CEI grants awards to MA dissertations in intercultural studies, offers grants and internships for junior researchers, and publishes E-REI: E-Journal of Intercultural Studies.

CEI is a research associate of the Institute for the Study of Literature and Tradition (IELT) of Lisbon's New University (FCSH-UNL), and collaborates formally with Universities in Spain, France, Germany, Romania, Brazil, Poland, Latvia, Macao, Mozambique, Russia, Macedonia, USA, Algeria, Sri Lanka, and India, as well as with Unyleya, Portuguese Association of Women Entrepreneurs, High Commission for Migrations, Luso-Turkish Association and P.PORTO's Brazilian Centre for Research, Projects and Innovation. CEI is a member of RESMI (Higher Education Network for Intercultural Mediation), of the ICCAGe (ReCLes), EnDent and TheRoute projects, and is a founding member of ECREA Women's Network. CEI maintains specific PhD protocols with the Universities of Vigo, Santiago de Compostela and Salamanca.

PROJECT COOPERATION

Creative Flows between Cultures, Education & Business

With "Creative Flows between Cultures, Education & Business" the Centre for Intercultural Studies intends to explore the creative potential of intercultural relations between higher education and entrepreneurship, and the representations of business-related themes in modern, traditional, erudite and popular culture, using global, national and local sources within the European cultural context, along with an intercultural comparative approach. Specifically, the project intends to implement new teaching/learning methodologies, valuing transversal and collaborative competences, aiming to reinforce employability, entrepreneurship, technology-supported creativity and new career paths. Our project enhances the value of literary, artistic and audio-visual creativity for the training of entrepreneurs and the practice and communication of businesses. Results will be available for business agents, learners and teachers, establishing the bridge between culture and creativity and the Business world, underpinned by an action plan and conceptual framework likely to be adapted to other cultural contexts.

Our expertise and experience:

1. CEI is part of Porto Polytechnic's Accounting and Business School, with more than 4600 students, 8 degree courses, 13 MA programmes and 13 post-graduations.
2. The beta version of the project's database is available at: www.iscap.pt/cei/Economy_Culture_LITERATURE.htm
3. Staff teaches at community-related ICT-enabled technical courses.
4. Staff has a strong experience in education for entrepreneurship in culture.
5. Researchers took part in the project ICCAGE – Intercultural Communicative Competence: A Competitive Advantage for Global Employability (2015-1-CZ01-KA203-013992), 2015-2017.
6. CEI created the Masters in Intercultural Studies for Business, whose third consecutive edition is now running at ISCAP-P.PORTO: www.iscap.ipp.pt/cursos/mestrado/20000248.

PROJECT COOPERATION

Technology & cultural heritage for the development and entrepreneurship in peripheral coastal communities.

Our project associates applied research with technology development, in order to enhance the potential of maritime cultural heritage in peripheral communities across Europe, as a key factor for social and economic empowerment, with effects on local business capacity and cultural tourism, while generating models and tools for training, entrepreneurship and communication that can be applied throughout Europe and the globe.

This general purpose will be tested and applied through the preservation of traditional naval practices and techniques; protection and promotion of tangible and intangible, surface and underwater coastal

and maritime cultural heritage; development of routes of cultural tourism; education and empowerment of deprived communities; promotion of entrepreneurship and job creation. The project allies traditional skills, cutting-edge technology and research competences in order to tackle challenges presented by mass tourism, environmental deterioration, and the economic crisis, while focusing on the variety within peripheral regions of northern and southern Atlantic Europe and the Baltic. The project's consortium combines multidisciplinary methodologies from cultural heritage preservation, archaeology, storytelling, social sciences, arts and humanities, with information and gaming technologies, tourism management, distance learning, and digital media.

It is our intention to complement previous and on-going research on cultural heritage in European coastal and maritime communities of farmers, sailors, fishermen, and boat builders, with their cultural capital of myths, practices, semiotics, traditions and crafts, promoting evidence-based research on the impact of participatory approaches in cultural heritage policies and governance, while boosting an innovative enterprise strategy, in order to develop technological breakthroughs into sustainable products and strategies.

Our expertise and experience:

1. Researchers are members of UNESCO Chair "The Oceans' Cultural Heritage".
2. CEI has a worldwide network of >50 academic and community partners.
3. CEI created the Masters in Intercultural Studies for Business, whose 3rd consecutive edition is now running at ISCAP-P.PORTO: www.iscap.ipp.pt/cursos/mestrado/20000248
4. Staff teaches at community-related ICT-enabled technical courses.
5. Staff is part of the project THEROUTE – Tourism and Heritage Routes including Ambient Intelligence with Visitors' Profile Adaptation and Context Awareness, 2016-2020.
6. CEI created the project STREETARTCEI – Routes of Graffiti & Street Art in Porto and Northern Portugal: www.streetartcei.com/
7. Researchers took part in the project SHINING PT – Science, research and INnovation breakthrough for the underwater heritage of PORTUGAL, H2020-WIDESPREAD-2016-2017.

PROJECT COOPERATION

Street Art for cultural tourism, urban development and social cohesion.

Cultural tourism is nowadays recognized as one of the main factors of tourist attraction, having become a resource of increasing value in the national and international panorama. The concern shown by local authorities and tourism agencies to create tourist-cultural routes confirms their socio-economic potential for empowerment, decentralization and development. Aware of this potential, the Center for Intercultural Studies developed the project StreetArtCEI – Routes of Graffiti & Street Art in Porto and Northern Portugal: www.streetartcei.com/.

Initially, fieldwork in the streets of Porto and other locations of Northern Portugal aimed at the creation and testing of routes inspired by literary works set or written in the region. But, at the same time, CEI's staff embarked on a parallel project triggered by the discovery of the unexpected and anonymous art on the city walls. Calling the theoretical and conceptual tools of intercultural studies, the StreetArtCEI project aims at further blurring the already tenuous frontiers between dominant and marginal cultures, their practices, symbols and aesthetic manifestations, in the open, shifting and always ephemeral space of the city.

The work methodology involves photographing, categorizing and extracting recurrent patterns, from which new routes emerge, not only for tourists but also for the use and empowerment of local communities. The project website (www.streetartcei.com/) provides more than 1000 images collected up to now, 11 routes with nearly 200 POIs, archives and critical texts, in open access. StreetArtCEI's routes propose a search for the art hidden in the city and leads a race against the time that washes the ink and against the aseptic fury of the populists. Ignorance admires the whitewashed innocuous wall, because public and anonymous art intimidates those who resort to censorship to impose powers. By contrast, knowledge – thus created and shared – offers the privilege of discovering art in the itineraries of everyday life. StreetArtCEI assumes the privilege of collecting, registering, preserving and offering both to tourists and to the community the irony and beauty of street art, in a social and cultural mission with high economic potential.

Our expertise and experience:

1. The beta version of the project is available at: www.streetartcei.com/. CEI now wants to turn this national project into a European project.
2. Staff teaches at community-related ICT-enabled technical courses.
3. Staff has a strong experience in education for entrepreneurship in culture.
4. Researchers took part in the PhD Program in "Politics and Images of Culture and Museology", a FCT-sponsored PhD, PD/00423/2012, 2013-2016.
5. CEI created the Masters in Intercultural Studies for Business, whose 3rd consecutive edition is now running at ISCAP-P.PORTO: ww.iscap.ipp.pt/cursos/mestrado/20000248.
6. Staff is part of the project THEROUTE (SAICT-POL/23447/2016) – Tourism and Heritage Routes including Ambient Intelligence with Visitants' Profile Adaptation and Context Awareness, 2016-2020.
7. CEI is part of the project Google Arts&Culture (with Google Cultural Institute & the Museum of Contemporary Sculpture of St. Tirso): www.artsandculture.google.com/.

PROJECT COOPERATION

ICT-enabled integration of women migrants in higher education and the community

Our project intends to foster the integration of women migrants, including refugees, in Portugal and partner countries, with a special focus on higher education, R&D, and local communities. CEI wishes to use its expertise in ICT-enabled solutions and e-learning for the inclusion of women migrants, improving their autonomy and active contribution to academia and the community.

Expected tools will provide women migrants with information on and easy access to relevant public services in higher education, specific to their needs, while assisting them in planning and taking sustainable decisions for their future. The project plans to take special attention to specific cultural features, gender differences, and the skills and capacities of women migrants to express their needs, while guaranteeing the equity of access to ICT for higher education.

In order to foster an efficient integration of women migrants, the project will rely on a clear understanding of their personal and family situation, including their legal status, origin, cultural background, language skills, and academic records. Once such information is available to higher education and R&D institutions, it will improve societal outcomes to the benefit of both host countries and migrants. Women migrant's integration will be facilitated by matching their skills with those needed in the consortium's states, and by designing tailored training programmes in higher education. These will be supported by ICT and e-learning tools, customised to match the needs of women migrants and to guarantee both a sustainable inclusion and a fact-based public perception of migration.

Our expertise and experience:

1. A beta version (in Portuguese) of the project's resources for women in higher education and R&D is available as "THE GENDERWEB – Research, citizenship & Activism in Gender Studies", at: www.iscap.pt/cei/thegenderweb/
CEI now wants to turn this national project into a European project.
2. Staff teaches at community-related ICT-enabled technical courses.
3. CEI is a member of the Higher Education Network for Intercultural Mediation (RESMI) of the Portuguese High Commissioner for Migrations.
4. CEI created the Masters in Intercultural Studies for Business, whose 3rd consecutive edition is now running at ISCAP-P.PORTO: ww.iscap.ipp.pt/cursos/mestrado/20000248.
5. CEI is a founding member of ECREA Women's Network: www.ecrea.eu/Womens-Network
6. Researchers were part of the projects:
TSDIA EnDent – Content and Language Integrated Learning Approach, 2015-I-LV01-KA203-013401, 2015-2017: <http://www.erasmusdent.eu>

Organisation

Centre for Social Innovation (CSI) is a Research and Development organization which focuses on fostering social innovation that can bring about a positive change to local, national, regional and global entities. These entities include but are not limited to governments, local administrative agencies, non for profit agencies, commercial entities, and educational institutions. CSI team is composed of open-minded, fully equipped researchers, entrepreneurs, project managers, trainers and Information Technology Developers. CSI encompasses the capability and capacity to identify social needs, design and implement adjusted initiatives and project and provide for sustainable growth.

CSI is a dynamic and a rapidly evolving organization, carrying with it the experience and knowledge of an international enterprise, blended with the enthusiasm, passion and creative curiosity of a start-up. In practice, our efforts are to attract resources and support from EU and other institutions and corporations, and defuse it to our extended community, for the empowerment of its citizens, market and society. We strongly believe that this is a collective effort, and we would like to invite other businesses, civil society organizations, academic institutions, and public services to build together synergies and partnerships towards that vision. We would be more than happy to exchange invitations for collaboration, as well as, ideas, which we would be potentially materialized to interventions on the ground, through funded programs and projects. Collectively as a team, we have done work in more than 200 funded projects coming from the vast majority of EU funding Schemes (H2020, Erasmus+, AMIF, Creative Europe, ERC, REC), national governments and international donors (UN, USAID, Microsoft, World Vision, Caritas, Oxfam).

Organisation

Taking an interdisciplinary approach, the Centre for Computing and Social Responsibility (CCSR) has gained an impressive reputation as a key player in the international research network for the ethical and social implications of ICT. With a growing demand from both the public and government to deliver acceptable ICT.

Mission

To undertake research and provide teaching, consultancy and advice to individuals, communities, organisations and governments at local, national and international levels on the actual and potential impacts of computing and related technologies on society and its citizens.

More information regarding the research activities of the CCSR can be found under Research.

The Center for Middle Eastern Politics is part of the Otto Suhr Institute for Political Science at Freie Universität Berlin. Our associates work on and teach the various fields of research pertaining to the extensive scope of Area Studies / Politics of the Middle East and North Africa. This includes political, societal, as well as economic transformations in areas from Mauretania to Iran. It is our goal to appropriately trace the complex dynamics involved by connecting adequate and insightful theory and data.

In our research we ask for political dynamics "from below" in contexts of authoritarianism, for governance and civil society activities in the aftermath of social and economic crises, as well as for the potential and boundaries of regional and international cooperation. We make a point of including critical perspectives on the history of Europe and constructive dialogue between the classical disciplines of Area Studies and Political and Economic Sciences.

The Centre for Public Impact is a not-for-profit foundation dedicated to improving the positive impact of governments. We promote a greater focus on and better understanding of public impact by bringing together government leaders and their partners from around the world to learn and exchange ideas about achieving better outcomes for citizens.

As part of our work, we have developed a framework to improve policy effectiveness -The Public Impact Fundamentals - that we have tried and tested with governments around the world. In addition, we explore key questions of modern policy-making, including for example government legitimacy, the use of artificial intelligence in government and models of government that promote greater citizen participation.

We are a Swiss foundation but operate around the world with offices in London, Washington DC, Sao Paulo and Sydney.

City of Utrecht - With 348,000 inhabitants and still growing, Utrecht is the capital of the province of the same name which houses 1,2 million people. The city is located in the geographical heart of the Netherlands, 30 minutes by train from Schiphol International Airport. The region's main economic clusters are Life Sciences, Eco-innovation, and ICT & creative industries. Utrecht has a strong history and lots of expertise in co-creation with citizens and in social innovation from a multistakeholder approach.

As Netherlands first Human Rights City, Utrecht is traditionally a forerunner in the field of asylum and refugee reception, legal and social support and reconnection projects. Its policy takes into account the human rights of asylum seekers which has proven to be in line with ECHR-rulings and resulted in the transformation of the national rules and regulations with regard to providing shelter for refugees (bed, bath, bread- provision/ undocumented families not on the street).

Relevant EU-supported initiatives in Utrecht – The Utrecht Refugee Launch Pad, which is better known as Plan Einstein, is one of the most innovative projects which the City of Utrecht is currently implementing. This project is funded by the Urban Innovative Actions Programme. In Plan Einstein refugees live together with local youngsters. Residents of Plan Einstein and neighbourhood members in Overvecht can follow courses Entrepreneurship and Business English here, and/or participate in a practical programme for entrepreneurship and work or join other activities. One of the first findings of the project is that that our refugee population voices different needs for different styles of teaching. Using a humanoid robot as an assistant in the class room might enable receiving cities to address an important part of these needs. For more information please visit: <http://www.uia-initiative.eu/en/uia-cities/utrecht>

Furthermore Utrecht is one of the partners of the AMIF-project CITIES Grow which is coordinated by EUROCIITIES. This is a mentoring project with 16 cities in which we explore best practices on enabling the inclusion of migrant entrepreneurs in access to public and private contracts.

Utrecht participation in European networks about migrants - The City of Utrecht is an active member in many European networks on migration, among which EUROCIITIES WG Migration & Integration, which is chaired by the City of Helsinki. Within this WG Utrecht is the chair of the Sub-working group on Undocumented Migrants.

PROJECT COOPERATION

Addressing the challenge of migrant integration through ICT-enabled solutions

For the project we are currently working on we are especially interested in meeting people with an expertise within the field of:

- cultural-anthropological understanding of relevant cultures with interaction design
- system psychology and interaction design
- Monitoring and Evaluation (with special expertise in the field of psychology and cultural-anthropology)

Organisation

City, University of London is a special place. With skill and dedication, we have been using education, research and enterprise to transform the lives of our students, our community and the world for over a hundred years.

- A highly rated institution

We are proud of the quality of our education, research and enterprise and of our high rankings in recent surveys. City is:

• in the top 15 in the UK for graduate prospects (The Times and Sunday Times University League Table 2017)

• 27th in the UK in the (Times Higher Education) 'Table of Tables' alongside leading Russell Group universities

- World-leading research

The Research Excellence Framework (REF) 2014, an exercise to assess research quality at all UK higher education research institutions, rated 75.7% of City's submissions as being of world-leading 4* (23.3%) and internationally excellent 3* (52.4%) quality.

- A vibrant international community

Our outlook is truly global. We welcome students, academics and professional staff from all around the world, work to international levels of research excellence and cultivate a growing network of international research partnerships.

Central London location

We are located in the heart of London, within easy reach of several central Underground stations and just a few stops from the British Library and the West End. We are minutes away from the Square Mile - London's world-famous financial district - and the headquarters of financial and professional institutions, major arts complexes and media offices, teaching hospitals and specialist medical research centres.

Since our foundation over a century ago, we have always enjoyed deep-rooted links with the City of London. The Lord Mayor of London is the Rector of City and many City of London livery companies are long-standing supporters of City

	Lecturer in Law

Organisation

The City Law School is one of London's major law schools offering an impressive range of academic and professional courses. Our vision is to firmly establish The City Law School as a truly leading law school within a decade.

The Institute for the Study of European Laws (ISEL) at The City Law School provides an expert insight into the latest EU law developments and is proud to house a team of internationally renowned researchers and doctoral researchers, including Professor Panos Koutrakos, Professor Elaine Fahey and Emeritus Professor Sir Alan Dashwood.

ISEL researchers are the authors of leading research and they actively contribute to excellent scholarship, practice, Government and professional activities by making high-level contributions as to the legal, political and economic development of the EU and the relationship of the UK with the EU. ISEL researchers also teach across a range of programmes at The City Law School's undergraduate, postgraduate and professional practice programmes.

Our aims:

To shape cutting-edge research in European law

To convene an engaging public events programme to debate European law and policy

To provide expert analysis for practitioners and policy-makers across Europe

To develop the next generation of researchers in European law through research led teaching and PhD supervision

Our experts specialise in:

EU constitutional and administrative law

Brexit

EU trade law

Area of Freedom, Security and Justice (AFSJ)

EU competition law and policy

EU external relations

EU law and global governance

European human rights law

Laws of migration

Law of the EU common market

Media and intellectual property law

Transport law and regulation

EU citizenship law

Our scholars are interested in interdisciplinary collaborations and welcome opportunities for co-operation with experts in the academy and in practice.

Organisation

Country	Germany
City	Berlin
Street	Dialogue of Civilizations Research Institute, Französische strasse 23
Web	https://doc-research.org/

Person

Name	Heather Brown Associate Researcher
------	---------------------------------------

Organisation

The Dialogue of Civilizations Research Institute perceives the prevailing portrayal of the world today as oversimplified and too tightly bound to mainstream paradigms. The first step in developing new ways of thinking about the current state of the world, and how it might be improved through scholarly research and sound policy proposals, is to analyse the age-old question of what it means to be human. Only by better understanding humanity – through the social and cultural aspirations and the various norms of civilisations and traditions – can a model for inclusive and holistic development can be established.

The DOC believes that this rendering of the world fails to take account of the diversity of our dynamic world. Dialogue of course plays a key role in this. Therefore, our research team and affiliate experts conduct research that revolves around the question of how ‘authentic dialogue’ can be fostered and employed at multiple levels, from the personal to the transnational. Our work responds to global problems with a scientifically rigorous approach to understanding complex origins, with the aim of developing plausible alternative outlooks for the future.

Organisation

Research, innovation and education – the DLR Project Management Agency has been providing an array of services to assist key decision-makers from government, science, industry and education for over 40 years. We develop practical strategies, manage funding programmes and projects, assist in dialogue processes and support knowledge transfer and utilisation on behalf of our clients. A designated worldwide partner, we open up networking opportunities and encourage international collaboration. Here, we place a focus on interdisciplinarity, internationality and innovation. As part of DLR, the Project Management Agency is a key contributor to DLR's 'Science, Innovation and Education' field of operations.

Research funding and innovation management from a single source

With around 1,000 employees, we are one of the largest project management agencies in Germany. Accordingly, we serve the broadest possible range of topics. Managing research funds totalling approximately around one billion euro, in 2017 alone we supported around 10,000 scientific projects in the areas of education, society, healthcare, key technologies, environment and European and international collaboration.

Among other things, DLR hosts National Contact Points for Horizon 2020.

ESRC is part of UK Research and Innovation, a new organisation that brings together the UK's seven research councils, Innovate UK and Research England to maximise the contribution of each council and create the best environment for research and innovation to flourish. The vision is to ensure the UK maintains its world-leading position in research and innovation. For more information visit the UK Research and Innovation website.

UK Research and Innovation is a non-departmental public body funded by a grant-in-aid from the UK government

We are the UK's largest organisation for funding research on economic and social issues. We support independent, high quality research which has an impact on business, the public sector and civil society. ESRC's total budget for 2017-18 was around £202 million. At any one time ESRC supports over 4,000 researchers and postgraduate students in academic institutions and independent research institutes.

Edgeryders

Organisation

Country	Belgium
City	Forest
Street	
Web	http://www.edgeryders.eu

Person

Name	Anique Yael Vered
	Head of Development, Research Network

Organisation

Estonia registered, operating EU-wide and beyond.

Edgeryders as a company emerged as a spin-off from a Council of Europe and European Commission social cohesion research project of the same name. It is a community-driven not-for-profit research and development institute. Edgeryders provides expert advice and community engagement based on collective intelligence, as a service to governmental, international and corporate organisations. It develops and deploys community building tools and cutting edge research techniques to detect, aggregate and analyse citizen innovation in response to key societal, economic, ecological and political challenges. Driven by a people centric approach, we engage and connect citizens across an active and growing global community of 4000+ researchers, social innovators, technologists, activists, civic enthusiasts, makers, artists and consumers. By fostering collaboration on a massive scale, we are able to wire seemingly isolated initiatives and unique points of view towards a theory of change backed by solid scientific arguments and ultimately aspiring to contribute to more grounded European public policy. We are consistently working in Europe at transnational level (Council of Europe, European Commission funded projects), reaching the periphery (especially Georgia, Armenia, Belarus, Morocco, Tunisia and Egypt) resulting from several projects with the United Nations Development Programme, the United Nations Volunteers and the World Bank), and overall building a network that spans the globe (such as solid membership and collaborations in the USA and Nepal). Throughout all this, our organisation is able to infuse projects with high calibre insights stemming from the latest trends in open science, digital social innovation, participatory development, internet governance, populism, next generation internet, social entrepreneurship, mobility, community driven welfare, youth transition and many other hot topics in Europe.

Organisation

In the Social Sciences research group we have a wealth of expertise in explaining the social world from a variety of disciplinary perspectives (criminology, geography, history, politics, psychology, sociology, law) and have applied this to a variety of socially important arenas. Key areas include: Health & wellbeing; Families, young people and relationships; Military studies; Penology and penal change; Policing; Migration, Space and Geopolitics; Victimology and restorative Justice.

We have an established history of working with key stakeholders to deliver policy relevant research. Explanations often require understanding issues from a number of different analytical perspectives, and the social sciences research group contains a breadth of analytical expertise. This enables us to design and deliver high quality research that is robust, innovative and frequently multi-disciplinary.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-07-2019: International protection of refugees in a comparative perspective

Organisation

The Educational Research Institute (IBE) is an institution conducting interdisciplinary research concerning the functioning and effectiveness of the education system in Poland. The Institute participates in national and international research projects, prepares reports, expert opinions and carries out advisory functions. The Institute is supervised by the Minister of National Education. The Institute promotes evidence-based policy and practice, and in particular, the studies that results can be used in practice and educational policy development at both national and local level. The Institute employs over 200 researchers - mainly sociologists, psychologists, educators, economists, political scientists - most of whom are eminent specialists in their fields with considerable professional expertise not only in research work but also teaching, public administration, market/public opinion research.

The Institute cooperates with central public administration and representatives of local self-government. IBE's partners are key institutions in the Polish education system and stakeholders from labour market. Its growing cooperation network includes also schools, non-governmental organizations, universities across world, domestic and foreign research centres and international organizations.

The Institute publishes every year a number of books and studies in the field of education. Since 1982, the Institute publishes a quarterly "Edukacja".

The Institute main research areas:

- lifelong learning and national qualifications framework,
- ICT and new technologies in education,
- core curriculum and subject teaching methods,
- measurement and analysis of student educational achievement,
- psychological and pedagogical foundations of school achievement,
- relationship between education and the labour market, especially monitoring the situation of young people entering the labour market,
- economic determinants of education, financing education and other broad issues concerning economics of education,
- teacher working conditions, working hours, professional status and competencies,
- institutional and legal problems concerning the education system and educational policy.

Person

Name	Paweł Rybicki
	President of the Management Board

Organisation

European Forensic Initiatives Centre (EFIC) Foundation was established by Central Forensic Laboratory of the Polish

Police in November 2012, with the aim to support the execution of research and development projects and other

initiatives in forensic science aiming at broadening the use of scientific evidence by LEAs. Since the very beginning EFIC

is mostly engaged in the activities performed on the European level but also runs nation-wide initiatives. Currently, EFIC

operates in the think-tank formula for the experts in the field of forensics, law enforcement and justice.

The Foundation

performs also the watch-dog activities. The statutory tasks of the EFIC Foundation related to the project are the

following:

- Promoting cooperation between law enforcement bodies and justice authorities as well o as promote initiatives aimed

at consistent and comprehensive approach towards combating crime

- Mobilizing law enforcement and justice authorities to implement new and support further development of existing

technologies, methods, techniques and tools

- Facilitating public-private partnerships and support activities leading to the development and strengthening of

relations between public and private sectors in scope of development of new technologies to prevent, combat and

investigate criminal activities and identify the perpetrators

- Activating scientists to conduct research leading to the development of forensic science and positively influencing

the quality of forensic education

- Promoting Research and Development and Education and Training initiatives, as well as other activities undertaken

in order to support European integration and international cooperation

The Foundation is achieving them through initiation, coordination and support to the implementation

of research and developments projects as well as organisation of conferences, exhibitions, symposiums, seminars, workshops, lectures, courses and other education and training and information-sharing activities. EFIC cooperates with state administration and local government bodies, as well as academic communities, industry partners and other NGOs in Poland and abroad.

	Ödos Project Coordinator

Organisation

The mission of the EMET Arco Iris Foundation is to Support vulnerable people at risk, promoting a full, autonomous and substance-free life.

Vision: To become a national reference organization , being an innovative, independent and sustainable organization.

The values that sustain our work and projection are:

Justice: to participate actively in the creation of fairer living conditions, both within and outside the organization. The ÖDOS Project has a direct impact the implementation of the law and social justice, focusing on the potential female victims of human trafficking and their children.

Dignity: to offer more dignified models of life on a personal and collective level. The ÖDOS Project focuses on strengthening child protection and women empowerment towards restoring their dignity as human beings.

Tolerance: to build a framework of coexistence based on respect for difference.

Independence: to maintain our identity while collaborating with other public and social entities and promoting networking.

Solidarity: to reduce inequalities by working for the common good. The ÖDOS Project enhances the creation of solidarity networks among related organizations, as well as the effective coordination among organizations and resources.

Excellence: to act with rigor and efficiency in the allocation of resources, seeking the highest possible efficiency.

EURECAT

Organisation

Country	Spain
City	Barcelona
Street	Eurecat. C/Bilbao, 72. Edifici A.
Web	http://www.eurecat.org

Person

Name	Patricia Castillo
	SC6 programme manager

Organisation

Eurecat is the second largest private main Research and Technology (RTO) in Southern Europe. With headquarters in Barcelona; Spain, the centre brings together the experience of more than 650 professionals. Eurecat's technologies and approaches add value to social sciences and humanities research activities in their quest for reversing discrimination and promoting social fairness, empowering citizens for regaining control of their data, and preserving Europe's cultural heritage.

Our computational social science approaches complement traditional social science methods to bring in unprecedented empirical evidence from massive data for informing research related to public perceptions (e.g. migrations, trust, ideology, etc.), policy and service design, impact of technologies in targeted groups, data economy, etc. Namely:

- Participation platforms & digital democracy: analysis and interactive visualization of interaction patterns and collective dynamics on online participation platforms, in order to improve collective awareness and foster effective and transparent deliberation processes.
- Data Valuation platforms: methodologies and platforms for estimating the information and economic value hidden in big data by analyzing just a small sample of the data and prior to capex/opex intensive investment in infrastructure and people for full exploitation.
- Bias and discrimination auditing of algorithms: Development of methodologies and platforms for detecting bias and discrimination in automated decision making by algorithms operating in the open web, inside corporations (e.g., credit scoring in banks), or the government (e.g., recidivism risk computation for inmates).
- Detection and mitigation of disinformation: methodologies and software tools for detecting disinformation (e.g. fake news), its sources, and propagation patterns that can be used for early warning and containment of ill-intended campaigns, and for countering harmful effects in citizens perceptions (e.g. scientific literacy) .

Our Audiovisual Technologies team have a strong record on developing and evaluating technologies for increasing capacities and competitiveness of the creative and cultural industries. From production and postproduction tools for creative professionals and artists (i.e. plugins for creating 3D audio and music productions, see www.binci.eu), AR/VR and immersive experiences, to sophisticated AI tools for managing and protecting cultural heritage, digital assets and IPR.

Our Training department has extensive experience in designing and delivering training programs for active workers in industrial sectors particularly susceptible to disruptions due to automatization and robotisation. They deliver highly specialized training in industrial and digital technologies, as well as

innovation (e.g. Industry 4.0, big data, design thinking, etc.) Furthermore, in partnership with the regional employment administration, they deliver training for boosting the employability of groups in risk of exclusion (long-time unemployed, school drop-outs, migrants, etc.).

Organisation

The European Institute of Interdisciplinary Research (EIIR) is a leading independent, non-profit Think Tank based in Paris. Founded in 2004 the Institute is dedicated to the advancement of interdisciplinary research in the domains of innovation and sustainable development. Its origins lie at INSEAD where its founding members held senior research and teaching positions. EIIR is a network of scientists and policy makers spanning the worlds of academia/research, the private sector and different levels of governance across the EU. Its research range engages three strategic areas that play a crucial role in the process of innovation and sustainable development: science and research, industry, organizations of civil society, and government at different levels of public administration. Its network organizational form is designed to access, organize and leverage knowledge and expertise, of high-calibre scientific, research, and policy talent. Its modus operandi involves flexible formations of teams of experts from diverse scientific origins and compositions of skills and competencies that are organized and deployed according to specific scientific, research, industrial and policy objectives. The EIIR network is composed of leading research and academic institutions, research-oriented organizations and governmental bodies across the European Union, Eastern and Central Europe, and North America.

PROJECT COOPERATION

Eurovertice as partner os H2020 TRANSFORMATIONS and GOVERNANCE topics

Within our department of Territorial development, we have experience in the elaboration of municipal, multimunicipal and regional Integrated Sustainable Urban Development Strategies (ISUDS). We performance an analysis of the starting situation, elaborate a diagnosis and identificate the main challenges. With that we define a future strategy that will guide the action of the entity in the coming years. We also support in the implementation and management of the strategy.

We also develop participatory processes for the planning of public policies, budget management, services to citizens, territorial & urban actions plans and regulatory implementation. With that we accurate information about citizenship needs, guide for monitoring citizen participation, social learning, construction of social fabric and creation and consolidation of networks. With that entities achieve better citizen participation for the legitimation and implementation of public decisions.

PROJECT COOPERATION

UCAM as partner of H2020 proposals

Eurovertice support UCAM (Foundation University of San Antoni, Murcia) in its participation in European projects.

Among its research groups, there are:

- DIGITALAC Research Group <http://investigacion.ucam.edu/comunicacion-audiovisual/> studies the new tendencies of audiovisual industry in the digital era in different areas.

The research group has followed-up the whole implementation of the Digital Terrestrial Television in the Region of Murcia, conducting several studies on the penetration of this system and behavior studies among citizens in respect to this implementation.

The assessment of digital contents including television contents, fiction story creation process, creative process and structure of the transmedia storytelling and the audio-description as a narrative process is also an important area of expertise of DIGITALAC.

DIGITALAC studies the Multiplatform audiovisual communication in all their aspects, from the contents creation to the market and industry assessment.

Audiovisual Industries, with a special focus on Music Industry, new storage systems and audiovisual media role in internet are under the scope of DIGITALAC investigation lines.

Influence of audiovisual content in specific sectors as tourism and their use for the institutions and companies brand building is also of interest of DIGITALAC.

A new line of investigation has recently opened for the Research Group in the Social and Media Brain, with the study of potential use of neuroscience in the Media and in the Social Sciences.

- Research Group in Learning in Real and Simulated Clinical Settings (LRSCS): inclusion of forms of learning founded on competence, introduction of new teaching methods and models to assess not only knowledge but also skills and attitudes in clinical simulation interactive knowledge

- Education department is formed by 60 professors and researchers, specialized in different areas, enabling the students of Education Grade acquire valuable skills to perform their future job as teachers and providing the future teachers with tools that will allow them to inspire and motivate the children and youngsters under their responsibility. Research lines in the department include Education and culture, European citizen, non-formal education for inclusion, intercultural skills, inclusive education for disabled persons and innovation in education among others.

Although it is a young department, its members have individually a large research experience and also large experience in international cooperation projects in programs such Erasmus and Leonardo. The department is also engaged in the collaboration with enterprises aiming the research of new ways of improving the graduates' employability.

Fundació Catalana per a la Recerca i la Innovació (FCRI), leads multiple initiatives for communicating with and educating the public, including school-aged children, teachers and innovators about a wide range of topics involving the latest in science and technology.

The foundation counts on the support of major universities and leading engineering, health and ICT-based companies, as well as public education entities all across Catalunya. FCRI's activities are developed in collaboration with the Catalan Ministry for Education; Barcelona City Council; and, the Spanish Foundation for Science and Technology - FECYT.

As a 4-Helix Hub, FCRI is ideally suited to contribute significant inputs to international initiatives:

- Research Support Capacities - for realizing large scale pilots, co-developing business models, conducting research surveys and focus groups, and organising highly participatory citizen and science events.
- Education and Training - in school and beyond the classroom walls.
- Policy influence - leveraging our high-level Science Advisory Board and collaborators, we can attract leading influencers in the policy field.
- Social and traditional Media - we can carry out targeted and effective communication and public engagement campaigns.
- Responsible Research and Innovation - we follow RRI principles in all our activities and can therefore embed these in dissemination and exploitation.

PROJECT COOPERATION

Promote responsible use of new technologies and the correct approach to Digital Health

Fundación MAPFRE has developed since three years ago a program called ControlaTIC which is aimed at promoting the healthy uses of new technologies and preventing and warning about the risks that the misuse of them poses for children and adolescents. We have developed an extensive educational program that is used by teachers and social educators.

This program can serve as the basis for a project that studies this social problem that affects the entire society.

Our strength is the capacity of dissemination and practical application of the results, and also the organizational

capacity.

PROJECT COOPERATION

Progress through culture

Fundación MAPFRE has focused in two main areas: Social Action and Culture. We believe in the great power of the culture to as a basic tool for the development of societies, we invest time, material resources, but above all huge amounts of illusion in order to take art and culture to citizens through exhibitions, activities and publications.

We have organized over a hundred exhibitions in the past thirty years. Activity is based on a core idea: the complementarity with major public initiatives. In this way, through a program of exhibitions and publications, we review firstly Spanish and then international art, around the start of modernity: art, culture and society from the end of the 19th to the mid 20th.

Likewise, in 2009 we began our adventure into photography projects, a field where we have become an international reference. Our wish is to present to the public the work of photographers, which have never been exhibited in Spain, or which do not form part of Spanish collections. The objective is fulfilled with a program that combines exhibitions dedicated to great masters of the 20th century with established figures in contemporary photography.

It is our wish to disseminate and bring our activities closer to all the public. Hence, since 2004 the educational department has been offering a wide and varied program of activities based on the exhibition program, addressing to children and young people, both at school and family level. We provide two permanent activities on our exhibitions: Workshop visits and dynamic visits.

Santa María la Real Foundation of Historic Heritage (FSMLRPH) is an organization with more than 200 experts working on the study, restoration, conservation and divulgation of social, natural and cultural heritage. Our daily work and achievements are the best example of the value of heritage.

We have spent more than 40 years creating development in the territories through the implementation of projects and initiatives based on three axes: heritage, landscape and people.

Areas of interest:

- Study, restoration, conservation, management and divulgation of heritage.
- Monitoring of historical heritage.
- Tourism and smart tourist destinations.
- New uses and rehabilitation of cultural heritage.
- Social innovation: launching pads for employment
- Industrial heritage.
- Rural development.
- Promotion of employment and entrepreneurship.
- Care assistance of the elderly.
- Revitalization of territories in socio-economic decline.
- Mitigation and adaptation to climate change.

FSMLRPH has created several startups:

- Cultur Viajes y Patrimonio SL: is a travel agency specialized on cultural travels around Spain, Italy, France and Greece. www.culturviajes.org
- Monitoring Heritage System SL: is a SME dedicated to the monitoring of historic buildings. Is the innovation part of the Foundation dedicated to the heritage. www.mhsproject.es

Organisation

Foundation "Our Choice" was founded in 2009 in Warsaw and it is a migrant organization, oriented on integration of Ukrainian migrants in Poland. Mission of the organization is to support integration of foreigners in Poland and to support development of cultural, educational, economic and political contacts between Poland and Ukraine and to promote the democratic values and civic society. Since 2011, Foundation publishes a newspaper for Ukrainian migrants "Nash Vybir", which is distributed free of charge in whole Poland and runs the Internet portal www.naszwybir.pl. Both mass media are well known in Poland. Newspaper is issued in 3000 copies. The portal has 68 000 users per month and more than 3 500 000 hits per year.

In 2014 Foundation established the Ukrainian House in Warsaw, which is an unique institution gathering Ukrainian immigrants and provides ground for cooperation of local and Ukrainian citizens. In the Ukrainian House operates: consultancy point, language school, art gallery, Ukrainian Women Club and Children Club "Rukavychka". Foundation organises workshops, presentations of books and movies, concerts, public debates. Foundation established the Ukrainian Saturday School.

Research of the situation of the migrants in Poland is a crucial activity of the Foundation. Key fields of interests: young migrants, working conditions of Ukrainian migrants in Poland, gender aspects of migration and integration, hate crimes against migrants.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- DT-MIGRATION-06-2018-2019: Addressing the challenge of migrant integration through ICT-enabled solutions
- TRANSFORMATIONS-17-2019: Societal challenges and the arts

Institute of Innovative Economy is a non-governmental organization operating in development, implementation and promotion of modern, innovative solutions both in technology and in social development sector. IIG supports innovation by creating a platform enabling experience sharing between policy makers, scientific institutions, business and start-ups. It identifies barriers which are hindering the process of implementation of modern solutions and it maps out the methods which aims to eliminate those barriers.

The Institute realizes research and educational activities which results in reports, recommendations and Polish innovation's roadmaps. One of the main aspects of Institute's activity is to create appropriate forms of dialogue and cooperation between various groups of stakeholders in order to promote the development of Polish innovativeness.

The Foundation FUNDECYT Science and Technology Park of Extremadura (FUNDECYT-PCTEX) is a body governed by public law based in Extremadura (Spain) with the aim of contributing to the social and economic exploitation of science and technology in the region, supporting and promoting scientific and technological development and a better use of research and innovation outcomes. FUNDECYT-PCTEX, playing the role of a Development and Innovation Agency in Extremadura, provides technical assistance to the Regional Government for the design and implementation of policies, such as the Smart Specialisation Strategy (RIS3), the Digital Agenda of Extremadura or Extremadura 2030 (green and circular economy strategy), and work in close relation with enterprises, the University of Extremadura, R&D centres and other regional stakeholders to foster innovation. The Foundation is in charge of the coordination and integral management of the Office for Innovation (O4i) in the framework of the activities developed by the Regional Ministry Industry for promoting the innovation at regional level. The O4i is a coordination tool for the innovation based on the active transfer and exchange of knowledge among business, research and technological community, society and public administration of Extremadura, with the aim of fulfil the science and technological needs of the regional enterprises by an optimal utilisation of resources and capacities of the different regional agents of the Science, Technology and Innovation System of Extremadura. One of the main activities carried out by the O4i, managed by FUNDECYT-PCTEX is the support and advice services for regional and rural enterprises, in order to facilitate appropriate resources and tools to develop their technological and innovation needs by accompanying them in all innovation process to guarantee their development.

FUNDECYT-PCTEX is currently also in charge of the Business and Innovation European Center (BIC) in the region, which is aimed to encourage the creation of innovative new businesses, foster new business lines in existing companies, offer assistance in business development for the consolidation of existing companies, support entrepreneurs in the process of project´s implementation and cooperate with other institutions that support business creation. As the managing body of BIC Extremadura, FUNDECYT-PCTEX coordinates the different entrepreneurship support services offered in the region, increasing the number of entrepreneurs and enterprises supported.

Since 2008 FUNDECYT-PCTEX is member of the Enterprise Europe Network (EEN) supporting SMEs regarding innovation, research and technological transfer, business development advice by means of incubation, and participation in European projects.

Regarding entrepreneurship and SMEs, FUNDECYT-PCTEX offers support and advice for business idea validation, business development and innovation, the participation of SMEs in European projects, and the search of partners and funding. Moreover, the Foundation fosters regional R&D&i activities by connecting and coordinating the exchange of knowledge between entrepreneurs, scientists, and social

and institutional agents and providing consultancy services to regional organisations (access to technology, IPR, subcontracting R&D&i activities, etc.).

Person

Name	Ozgur Yasar Akyar
	Researcher

Organisation

As a research-oriented university HACettepe University is committed to the promotion of excellence in education in line with universal values, our mission is to educate and nurture students as individuals equipped with quality and depth of provision in all fields of science, technology and arts; empowered by inspiring intellectual curiosity and critical minds, open for improvement and positive change; and to contribute to society through research, technology, and public services it pursues.

The Chair of Child Health, deemed to be the origin of Hacettepe Faculty of Medicine, was founded as part of the Faculty of Medicine, Ankara University by Prof. Dr. İhsan Dođramacı on February 2, 1954. The foundation stone of the university was laid in 1957 with the Child Health Institute and Hospital within Hacettepe, which began its training, education and research activities and public services in 1958.

The Nursing School, School of Medical Technology and School of Physical Therapy and Rehabilitation were established in 1961. The School of Health Sciences offering education in the fields of Nutrition and Dietetics was founded in 1962. It later took the name of the Faculty of Medicine and Health Sciences in 1963. The School of Basic Sciences, Nursing School, School of Medical Technology, School of Physiotherapy-Rehabilitation, and the School of Physical Therapy were all re-structured under the Faculty of Medicine and Health Sciences. Meanwhile, the School of Dentistry was established under the same faculty. Hacettepe Science Center was established in 1965 in order to enable the coordination between the academic units within the university. Hacettepe Medical Center was established in 1966. Hacettepe Medical Center Hospital was founded in the same year.

These nucleus institutions were later chartered as Hacettepe University by Law No. 892, enacted on July 8, 1967, which began educational activities in the Faculties of Medicine, Health Sciences, Sciences and Social Sciences. The School of Home Economics was established in 1968, and the Schools of Pharmacy and Dentistry were transformed into faculties in 1971. Hacettepe University, which was further expanded in the course of time with the establishment of new departments and faculties, built its second campus on an area of 1.500 ha. in Beytepe District, 20 kms. away from the Central Campus. Hacettepe University continues its activities with 14 Faculties, 15 Graduate Schools and Institutes , 2 Applied Schools, 1 Conservatory, 4 Vocational Schools, and 98 Research and Application Centers within the scope of the Law No: 2809 for the Organization of Higher Education Institutions, enacted in 1982.

Hacettepe University, as one of the leading universities in the country, keeps contributing to social development and universal values in the fields of science, technology and art.

CERHAS is the most prestigious Hungarian interdisciplinary research institute in social sciences. Our rural research unit deals with social, economic and environmental problems, focusing on how rural values can be converted and used for development on a sustainable and beneficial way in the long run. In recent years we participated in a number of EU funded projects, dealing with social (and other) innovation in local food systems, agricultural production, and the food chain, cultural heritage in local development, smart villages, ecosystem services, spatial justice. We have skills and expertise in qualitative and quantitative research, case studies, living labs, participatory workshops, communication (including social networks and video), building transdisciplinary research networks including farmers, NGOs and government institutions.

I also have a small rural development and communication consultancy, thus I could participate in a project as an SME too.

Interuniversitair Micro-Electronica Centrum vzw (IMEC) is a Belgian not-for-profit research and Technology organization (RTO). imec vzw (headquarters Leuven, Belgium) is the world's-leading research and innovation hub in nanoelectronics and digital technologies. As of October, 1st 2016, iMinds, the digital research and incubation center has merged with imec into one high-tech research and innovation hub for nanoelectronics and digital technologies, under the name imec. imec's broadened research and collaboration offering makes it a unique and world-class research center in the field of nanoelectronics, excelling in software and ICT expertise. The broadened innovation center – which will operate under the imec name – will use this knowledge to develop disruptive technologies and solutions in application areas such as manufacturing and logistics, health, smart cities and mobility, and energy.

The renewed imec organization now brings together nearly 3,500 researchers, to make the impossible possible in each of those application areas. It also has access to a unique research infrastructure and an extensive network of local and international industrial and university partners for intensive collaboration. As a trusted partner for companies, start-ups and academia we bring together brilliant minds from all over the world in a creative and stimulating environment.

Organisation

Mission Statement

The mission of imfino is to promote and foster the expanding field of impact finance as a solution to social and environmental challenges as outlined in the Sustainable Development Goals. We develop global networks, partnerships and tools to support cities, entrepreneurs and public as well as private investors who are aiming to create a positive impact in the world.

Impact Finance

Impact Finance uses public and private capital to support ideas and initiatives that create a measurable positive economic, social and/or environmental impact. Imfino is dedicated to providing high quality tools and services to increase impact financing worldwide.

GIIVX Online platform

The Global Impact Investing Vienna Exchange (GIIVX) is imfino's global online platform which connects impact investors with sustainable entrepreneurs. A new impact measurement tool, developed together with RCE Vienna at the Vienna University of Economics, aligns investments to the UN's SDGs.

Organisation

Founded in 1945, the missions of the Institute are to study the populations of France and other countries, to ensure wide dissemination of the knowledge thereby acquired, and to provide training in research through research. INED's approach to demography is resolutely open and interdisciplinary, implicating a wide range of disciplines including economics, history, geography, sociology, anthropology, biology and epidemiology. With its 11 research units, the Institute promotes communication and exchange within the scientific community and between researchers and the general public while conducting numerous European and international research projects.

PROJECT COOPERATION

TRANSFORMATIONS

We are very interested in the above mentioned calls and especially in :

DT-TRANSFORMATIONS-07-2019

DT-TRANSFORMATIONS-11-2019

PROJECT COOPERATION

GOVERNANCE

PROJECT COOPERATION

IGOSTARTUP Application

The proposed WP is an online service, which provides consulting services through the use of questionnaires and calculators to prospective entrepreneurs who need guidance on starting their business. By completing a set of tools online, they will get a personalized report which will guide them through the necessary steps of starting their own business, while also enhancing your entrepreneurial mindset. The WP aims to be a tool for diagnosing their needs and a starting point for an educational programme tailored to their specificities. For more info visit the following page: <https://ied.eu/what-we-do/research-ideas/igostartup-application/>

PROJECT COOPERATION

Toolkit on cultural heritage

The main objective of the proposed WP is the development of a tool that could be used by local operators with regard to their effective collaboration towards cultural heritage. This type of collaboration should be linked to traditional production of local products and how these could be distinguished as cultural particularities.

The innovation of the tool lays in the fact that it will make use of big data and artificial intelligence to retrieve and record data. For more info <https://ied.eu/what-we-do/research-ideas/toolkit-on-cultural-heritage/>

PROJECT COOPERATION

Training Toolkit for cultural and creative sector

The introduction of digital models and technological solutions has led to the redefinition of the

structure of industrial products, the technologies used to create these products as well as the whole supply chain.

The proposed WP addresses the mismatch that has risen between demand and supply of skills in the sector as there is a growing need for employees to be re-qualified and re-educated in order to meet these demands. The aim is to involve the industrial sector directly in the transformation of education and training systems, in order to provide the means to teach digital skills that are consistent with the technological and industrial developments within the cultural and creative sector. More info here <https://ied.eu/what-we-do/research-ideas/training-toolkit-for-cultural/>

PROJECT COOPERATION

Technological advances on youth

Objective is to deal with the issues related to technological advances and mainly the use of Social Media. Our aim is to help youth gain using safe social media skills who have social , educational and financial problems. Because these target group lacks the knowledge on how to use internet consciously and in a safe manner and has lack of information about digital life. Primary goal is to contribute to the use of safe internet. For more info <https://ied.eu/what-we-do/research-ideas/technological-advances-on-youth/>

Marketplace Opportunities

PROJECT COOPERATION

Looking to take part of a proposal on urban social innovation

IGOP has a long research trajectory on urban policies in particular focusing on citizens engagement, social innovation, urban segregation and urban inequalities. We have good connections with stakeholders in Barcelona and its metropolitan area together with the catalan region. We are sociologists, political scientists and geographers.

For this reason we would like to be involved in a proposal in any of the following calls.

PROJECT COOPERATION

Interested in working on a proposal about migrant youth, addressing radicalisation, youth policies, youth involvement and participation, etc

IGOP has a portfolio of EU project in the field of youth and migrations which could be of interest for a potential Consortium that is seeking to submit a proposal in the following topics.

Here our projects:

<http://igop.uab.cat/en/promise/>

<http://igop.uab.cat/en/mates-3/>

<http://pagines.uab.cat/mobileidentities/>

PROJECT COOPERATION

We are experts in public governance, citizens involvement, public policies assessment

IGOP has expertise in public governance and the analysis of public administration from different perspectives. We would be interested in participating in proposals that would aim at addressing democracy challenges as well as innovation in the public sector.

If interested in our profile, please contact us!

Institute of Law Studies, Polish Academy of Sciences

Organisation

Country	Poland
City	Warsaw
Street	Nowy Swiat 72
Web	http://en.inp.pan.pl/

Person

Name	Witold Klaus
	Professor, Head of Department of Criminology

Organisation

The Institute of Law Studies of the Polish Academy of Sciences – ILS PAS (Instytut Nauk Prawnych Polskiej Akademii Nauk – INP PAN) is one of the most prominent scientific research institutes of the Polish Academy of Sciences within the area of social sciences. The Institute has been also one of the leading scientific centres in the field of legal studies for over 60 years (it was established in 1956). The role of the INP PAN is to initiate, promote, conduct and coordinate the research concerning theoretical and practical aspects of law in the context of dynamic changes of the contemporary world. The Institute also offers 3rd degree education. The doctoral studies at the INP PAN integrate the PhD candidates with the researchers of the highest knowledge and skills.

The leading themes of the research of the INP PAN are for example shaping and application of law in the light of contemporary axiological problems (in years 2011-2015) and changes of law in Poland, Europe and World in the context of contemporary challenges (in years 2016-2020). In this framework the research is focused on such issues as: the consequences of globalisation, constitutionalisation and fragmentation for the international public law, axiological and constitutional challenges for the unity of the European Union, Europeanisation of the private law; international standards of protection for human rights; impact of European integration for the national constitutional law, administrative law and criminal law and procedure.

It can be concluded that the impact of international and European law (including the EU law) has been a considerable and inherent element of the research conducted in the INP PAN in all fields of its interest, namely private law, criminal law, administrative law, labour law, constitutional law, environmental law. The international cooperation of INP PAN is the consequence of such an international approach to the research conducted.

The research of the scientific staff of the INP PAN is often conducted within the framework of international cooperation with foreign counterparts. This cooperation varies in character. As to the formal cooperation, the INP PAN is a member of three international multi-partner project consortia and has signed ten bilateral agreements. The INP PAN collaborates mostly with partners from EU Member States such as the Czech Republic, the United Kingdom, Italy, Hungary, Bulgaria, the Netherlands, France, Slovenia, Ireland, Germany, Spain, Romania, Croatia. We have established a cooperation with an institution from Taiwan.

As to the non-institutionalised cooperation, the INP PAN has a considerable informal cooperation based on employees' personal contacts and previous experiences in field of joint research and mobility.

This type of cooperation is very strong and well-developed. In addition to the previously mentioned countries we cooperate with researchers from Finland, Greece, Switzerland, Ukraine, the United States, Israel and Australia.

Areas of Activity

Organisation

The Institute of Philosophy and Sociology of the Polish Academy of Sciences is a research and education unit of the Polish Academy of Sciences. Established in 1956, the Institute is entitled to award the academic degrees of "doktor" [PhD] and "doktor habilitowany" [higher doctorate]. The Institute has made fundamental research its priority. Scientists of the Institute are engaged in educational and popularisation activities, the continuation and development of the analysis in such classic areas as sociology of culture, sociology of social structures, epistemology and history of philosophy. Moreover, in Institute, we attempt to combine theoretical reflection with research in two basic aspects – theory and research methodology. The human resource policy of the Directors is aimed at making the structure of the Institute more flexible by means of departing from the departmental model and moving towards a less rigid model of research groups that are created on the initiative of the employees who work on certain topics or implement research projects.

Akhmet Yassawi International Kazakh-Turkish University was established on June 6, 1991. The President of the Republic of Kazakhstan, N.A. Nazarbayev, opened this university for the development and prosperity of our spiritual capital, the city of Turkestan. Originally, the university was formed as the Turkestan State University named after Khoja Akhmet Yassawi.

On May 1, 1992, as a result of an agreement between the President of the Republic of Kazakhstan, N.A. Nazarbayev and the Prime Minister of the Republic of Turkey, Suleyman Demirel, the university was awarded the status of an "International University". On October 31, 1992, the Governments of the Republic of Kazakhstan and the Republic of Turkey signed the Agreement on the reorganization of the university into Khoja Akhmet Yassawi International Kazakh-Turkish University. Thus, an international higher education institution was first opened in Kazakhstan. The university is the only university among the Turkic-speaking countries, having international status.

At the moment, about 8,000 students study in the Kazakh, Turkish, Russian and English languages, among them more than 1,300 representatives of about 30 nationalities from 16 countries and 15 autonomous republics of Eurasia. Young people, living in peace and harmony under one roof, receive higher education in 54 specialties of bachelor's degree, 30 specialties of magistracy and 11 specialties of doctoral studies.

The University provides distance learning technology for 22 educational programs. In the educational center for distance learning with a center in Ankara, Turkey, about 4,000 students receive education in 11 specialties within the framework of the TurTEP program. The structure of the International Kazakh-Turkish University named after Khoja Akhmet Yassawi has 4 research centers, the Eurasian Scientific Research Institute, 7 research laboratories and 70 research groups.

Organisation

The Jagiellonian University is the oldest higher education institution in Poland and one of the oldest in Europe. It was founded on 12 May 1364 by the Polish king Casimir the Great. The Jubilee year 2014 marked the 650th anniversary of this remarkable event.

Some of the Jagiellonian University students and academics have been major historical figures, including world famous scholars, such as Nicolaus Copernicus or Karol Olszewski, as well as Karol Wojtyła, the future Pope John Paul II.

Today, the Jagiellonian University comprises 16 Faculties, where nearly 4 thousand academic staff conduct research and provide education to over 40 thousand students, within the framework of more than 80 different fields of study. The eminent researchers and state-of-the-art infrastructure make the JU one of the leading Polish scientific institutions, collaborating with major academic centres from all over the world. The Jagiellonian University is also home to about 150 student societies, where young researchers pursue their academic interests and develop friendships with people who share their passion.

Marketplace Opportunities

PROJECT COOPERATION

Public services' optimization to demographic changes in the municipalities

The effect of demographic changes on the provision of public services is poorly emphasized in the state's strategic planning documents while potential threat was captured already in the national demographic (population) policy strategy. Despite some sectoral efforts to deal with the problem, there is a lack of national complex scientific research (especially in the sphere of public administration)

PROJECT COOPERATION

E-participation in local governments: developing comparative framework

In the 1990s, a discussion was initiated on the egalitarian, empowering and participatory effects of the Internet on modern societies, which has become even more pronounced with the increasing globalisation of today's media society. In this context E-participation as a way of modern participation of citizens' in the local governments' decision-making process and a converging tool to tackle municipal challenges, e.g. financial restrictions. Up to now, a wide variety of e-participation projects have been carried out throughout Europe, but a comparative analysis of these research results has not yet been carried out.

PROJECT COOPERATION

Employee financial participation

European surveys and special studies have revealed financial participation schemes. For instance, employee ownership plans offered to employees by companies increased by 10 percent from 2009 to 2013 (Lowitzsch, 2014). According to the data of 2012, there are 8,967,000 employee-owners. Employees' share in ownership structure takes 2.8 percent (Machado, 2016). At the same time, employee ownership is unevenly widespread in Europe, and this depends on political, economic, social, cultural and legal environments.

Knowledge and Innovation (K&I)

Organisation

Country	Italy
City	Rome
Street	Via Guido Reni 56
Web	http://www.knowledge-innovation.org/en/ki-srls/

Person

Name	Fabio Feudo
	EU Project Design and Funding Activities

Organisation

K&I was established by a group of social scientists working professionally in several research organisations. Over the last 15 years they have been carrying out, many projects in the research framework programmes of EU on issues such as socialisation of the scientific research, public engagement and responsible research and innovation (RRI); gender and science; environmental sustainability and energy transition; privacy and security; etc. With the establishment of K&I, they wanted to capitalise on and give further impulse to their common research program, begun in the late 1970s, on the evolution and governance of contemporary societies and the transformations taking place within them.

K&I's mission is to increase the relevance and effectiveness of social sciences to interpret the profound processes of change that are affecting contemporary societies, to understand how they are evolving over time, to identify the stress phenomena that they produce and to investigate available options for their effective governance.

K&I carries out activities in Italy, Europe and worldwide, using an interdisciplinary approach. These activities include research, training and capacity building, networking and science communication, public engagement (through the enhancement of relations among science and societies, evaluation and technical assistance (for projects involving social development or institutional change), consultancy, as well as the production of guidelines and other tools that can help setting new policies or changing existing ones.

K&I has, among others, a specific expertise in the analysis of phenomena such as the processes of change that are affecting science and technology research organizations, due to increasing and complex and now pervasive interactions with ever broader sectors of society (public sector, industry/enterprises, civil society organizations/citizens, etc.);the promotion of a "scientific citizenship" in the frame of a broader citizens engagement and of the emergence of new forms of governance in contemporary societies. Attention has been paid also on progressive changes in gender relations in the wake of a growing demand for social equality also in the science realm.

K&I is currently involved in the implementation of FIT4RRI Project (Fostering Improved Training tools for Responsible Research and Innovation) funded under H2020. At the moment K&I is also participating as a partner in the Grant Agreement Preparation of two projects: one related to the digital evidences (DG Justice) and one concerning social innovation modelling approaches to the energy efficiently and sustainability transition (Horizon 2020).

Organisation

The Law Institute of Lithuania (under the Ministry of Justice of the Republic of Lithuania) is a research establishment, founded in 1991 by the Government of the Republic of Lithuania seeking to coordinate the reform of the legal system and law institutions, to combine it with the economic and social reorganization carried in the country.

The LIL was founded with a purpose to contribute: to the formation of a scientific basis for the reform of Lithuanian law and legal system as well as its separate elements based on the national experience and the advantages of European Law development; to the safeguarding of human rights and freedoms by elaborating national scientific studies as well as applied scientific researches in the field of law and legal system; to the formation of favorable conditions for business by means of legal measures.

Six main fields of activities can be distinguished:

- The reform of the Legal System and the Law-Making;
- Reform of the Justice sector (reform of judicial and prosecution, access to justice and the right to defence, independence of judiciary, legal aid);
- Criminal Justice (Crime control and prevention, social rehabilitation and probation of convicted persons);
- Strengthening and protection of the rights of disadvantaged groups (disabled, woman, juveniles, convicted, victims, etc.);
- Prevention and fight against corruption;
- Legal instruments against organized crime.

Organisation

Serving the national and European economy and society, the Luxembourg Institute of Science and Technology (LIST) is a Research and Technology Organisation (RTO) located in the very heart of Luxembourg's new Research and Innovation Campus at the former industrial site of Esch-Belval. From here, any major European city can be reached in less than 2,5 hours. Given the quality of its infrastructure, its esthetic appeal and its cultural heritage, the Campus brings together strong potential for innovation uniting university, research centres, joint laboratories, start-ups and incubators.

Areas of Activity

PROJECT COOPERATION

Cooperation to enhance social innovations – resting potential for regional/rural development

Lithuanian Institute of Agrarian Economics is a research institute specialising in regional and rural development, circular economy, short supply chain, bioeconomy and agricultural economics. The researchers at LAEI have participated in a number of international projects which resulted in international publications, decision support models and establishment of platforms for research and business activities. The competences possessed by participants from LAEI include quantitative modelling, market analysis, sustainability analysis, rural development, among others.

We have developed some ideas for this call on social innovations and we are looking for a partners for coming calls in Horizon2020.

Lithuanian Sports University (LSU), founded in 1934, is a specialised public higher education institution that has developed its unique traditions in sport, leisure and health sciences. With its mission to contribute to the sustainable development of society through international-level research and academic excellence, LSU is known as a leading academic and research centre in sports science in the Baltic Sea region. Starting with the enrolment of 100 students, the LSU has developed and expanded over the years and decades into an institution with nearly 2000 students.

The LSU offers 19 degree study programmes at all three study cycles (8 undergraduate, 9 Master's and 2 PhD), mainly in sport science, where studies, research and practice are closely interconnected. Among the LSU graduates, there are many distinguished scientists, world-renowned coaches, famous athletes, and prominent public figures.

A great number of the LSU students and graduates have become champions and prize-winners of the Olympic Games, world and European championships, among them are the twice European boxing champion Algirdas Šocikas, the winner of the Olympic gold medal and world basketball champion Modestas Paulauskas, the winners of the Olympic gold medals discus thrower Virgilijus Alekna. and basketball players Voldemaras Chomičius and Rimantas Kurtinaitis.

LUCA School of Arts

Organisation

Country	Belgium
City	Brussels
Street	Paleizenstraat, 70
Web	http://luca-arts.be

Person

Name	Veerle Van der Sluys
	Vicedean Research

Organisation

LUCA Faculty of Arts leads on inspiring and facilitating research across a wide variety of disciplines- visual arts, audiovisual arts, performing arts, music and design . It's research vision is organised and disseminated by the central Research Board through four thematic research units:

Image- focuses on the interaction between word/text and image

Inter-Actions- focuses on design and artistic research, evoking inter-actions between people, domains and disciplines

Intermedia- focuses on the interdisciplinary character of contemporary art practices

Music and Drama- focuses on the field of the Performing Arts with a focus on developing artistic practice.

The board and research units support artists and research groups, develop interdisciplinary research projects, and supervise the rigour of PhDs.

We believe that the imaginative and experimental impact of artistic research has a wider potential than just furthering approaches to pedagogy and artistic practice, but that it in fact has far wider reaching, positive influence on society and the sciences in the broadest sense.

LIST is a mission-driven Research and Technology Organization (RTO) that develops advanced technologies and delivers innovative products and services to industry and society. LIST supports the deployment of a number of solutions to a wide range of sectors, including energy, IT, telecommunications, environment and advanced manufacturing at national and European level. Committed to multidisciplinary, LIST's IT for Innovative Services (ITIS) department conducts research to develop models, methods, software and devices for smart systems, fusing human and technological aspects. Its ambition is to build trust around services, to develop new services with high level of informatics and to support innovation of IT-based services.

LIST acts as a bridge between scientific research and business.

>> Background and research topics <<

- Data-driven services and service innovation for smart cities
- Open data
- Innovative procurement and Public-Private partnerships
- Impact assessment

>> Recent and relevant projects <<

- BE-GOOD (2016-2020, Building an Ecosystem to Generate Opportunities in Open Data, Interreg NWE, <http://www.nweurope.eu/begood>)

Organisation

Matej Bel University (MBU) is a public university which achieved university status in 2010 and is a member of the European University Association. The university provides both high quality university and further education by encouraging creative scientific and artistic research. The university has six faculties, five of them focus on SSH (socio-economic sciences, humanities, educational sciences, political sciences and law); one faculty is natural science oriented. In recent years a multidisciplinary approach and interfaculty collaboration have been strengthened. The MBU has been successful in FP7 and H2020 particularly in SSH fields and has an ambition to be the best Slovak university in the SSH international research collaboration. MBU is offering interdisciplinary expertise in:

- SUSTAINABLE CITIES AND REGIONS
- INCLUSIVE EDUCATION, SCIENCE WITH AND FOR SOCIETY
- CULTURAL HERITAGE AND CREATIVE INDUSTRIES
- GENDER
- PUBLIC SECTOR INNOVATION
- SECURE SOCIETIES

Areas of Activity

- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- TRANSFORMATIONS-08-2019: The societal value of culture and the impact of cultural policies in Europe
- GOVERNANCE-17-2019: Democratic crisis? Resolving socio-economic and political challenges to reinvigorate democracies
- GOVERNANCE-18-2019: Innovation in government - building an agile and citizen-centric public sector

Marketplace Opportunities

PROJECT COOPERATION

Adult education in participatory dialogue / multi-stakeholder collaboration

POSSIBLE CONTRIBUTION TO THE PROJECT:

- developing and piloting practice-led reflections and learning programmes to educate and support adults (governmental leaders, public leaders, community leaders and citizens) in their role as reflective social change agents and promoters of culture of participatory dialogue between government and civil society)
- developing international dialogue platforms and multitrack participatory mechanisms to foster international conversation, allowing for exchange of experiences and peer learning between relevant international stakeholders including intensifying collaboration among public innovation practitioners (including workshops, developing common projects for incubation in real life contexts) in order to support the development of innovators and innovations in government)

KEY WORDS: adult education, peace education, global education, community education, inclusive education, political leadership education, multi-track diplomacy/dialogue, participatory dialogue, psychology and facilitation of power-dynamics, innovative leadership, engaged /empowered citizens, international collaboration, intercultural dialogue, sustainable societies, mobilisation of social capital and human potential

Organisation

Research priorities at the UMB have been defined on the basis of the UMB Action Plan 2015-2020 as well as on national research priorities and Horizon 2020. The university has six faculties, five of them focus on SSH (socio-economic sciences, humanities, educational sciences, political sciences and law); one faculty is natural science oriented. In recent years a multidisciplinary approach and interfaculty collaboration have been strengthened and together with researchers from our faculties we can offer an expertise in these areas:

- SUSTAINABLE CITIES AND REGIONS
- INCLUSIVE EDUCATION, SCIENCE WITH AND FOR SOCIETY
- CULTURAL HERITAGE AND CREATIVE INDUSTRIES
- GENDER
- PUBLIC SECTOR INNOVATION
- SECURE SOCIETIES

Areas of Activity

- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- TRANSFORMATIONS-08-2019: The societal value of culture and the impact of cultural policies in Europe
- GOVERNANCE-17-2019: Democratic crisis? Resolving socio-economic and political challenges to reinvigorate democracies
- GOVERNANCE-18-2019: Innovation in government - building an agile and citizen-centric public sector

Marketplace Opportunities

PROJECT COOPERATION

Risky behavior of Youth on Internet

POSSIBLE CONTRIBUTION TO THE PROJECT:

Our possible contribution to the project/

Expertise in the field of interest

- Holistic approach to empirical data identification, integration and evaluation.
- Big data advanced analytics and evaluation based on mathematical and statistical methods (data modelling via SPSS)
- Critical interdisciplinary assessment of risky sexual behavior:
 - Early start of sexual life
 - Promiscuity
 - Watching pornographic materials
 - Non-committal sexual intercourse
 - Unprotected sexual intercourse
 - Sexual intercourse of a healthy person with a partner with a sexually transmitted disease
 - Sexual intercourse of a person with a sexual disease with a healthy partner
 - Cybersex
 - Grooming
 - Sexting
 - Experiences of violence
 - Sexual abuse
 - Publishing of intimate data
- Develop scalable and transferable research methods for monitoring the current situation of risky sexual behavior,
- Based on the empirical data analysis, propose measures that can be used for educational practice.

KEY WORDS: sexual behavior, risky sexual behavior, sexual education

Organisation

Maynooth University is an internationally recognised institution located 25 kilometres outside of Dublin, Ireland, and is the nation's fastest growing university.

One of four constituent universities of the National University of Ireland, Maynooth University in 2018 placed in the global top 100 universities under 50 years old in the Times Higher Education World University Rankings.

On 16 June 2017, Maynooth University celebrated its 20th birthday, having been formally established as an autonomous university in 1997. Yet, it traces its origins to the foundation of the Royal College of St. Patrick in 1795, drawing inspiration from a heritage that includes over 200 years of education and scholarship.

Today, Maynooth University is a place of lively contrasts—a modern institution, dynamic, rapidly-growing, research-led and engaged, yet grounded in historic academic strengths and scholarly traditions.

With more than 12,000 students from more than 90 countries, Maynooth offers a range of programmes at undergraduate, Master's and PhD level in the humanities, science and engineering, and social sciences, including business, law, and education. The University also offers a range of international programmes and partnerships.

Maynooth's unique collegial culture fosters an interdisciplinary approach to research, which its world-class academics bring to bear in tackling some of the most fundamental challenges facing society today. The University's research institutes and centres consolidate and deliver this impact as vibrant communities of learning, discovery and creation. Research at Maynooth also is very much central to its teaching, and the University prides itself on placing equal value on its research and teaching missions. In addition to being named in THE's Top 50 Under 50, Maynooth University is recognised among the top 400 universities in the world, the top 200 European universities, and as one of the top 200 universities for international connections and outlook.

PROJECT COOPERATION

Qualitative researchers/academic team from Irish university: understanding international migrants' careers & mobility patterns over time

As a senior lecturer/associate professor in the School of Business, Faculty of Social Sciences, Maynooth University, IRELAND, I lead a team of 3 in my department, collecting career narratives (life stories regarding their migration and (work-/non-work related experiences in the host country) from skilled international/global migrants. I am a past Fulbright scholar (2017-18) and have collected data in the USA on this topic. I am currently collaborating with colleagues in Australia, who are also collecting qualitative career narratives on skilled migrants. Looking to continuing research in this area and sharing data from Ireland with partners in this area.

Organisation

Mykolas Romeris University (MRU) is an international university located in Vilnius and Kaunas, Lithuania. Modern, creative and entrepreneurial academic community has raised MRU to the leading university in social sciences and interdisciplinary research in Lithuania. MRU cooperates closely with over 300 universities, public and private institutions, takes part in academic, professional and inter-sectorial networks. MRU has a full membership of the following international higher education organizations: International Association of Universities, European University Association, European Association for International Education, European-Asian Knowledge Consortium Social Technologies for Smart and Inclusive Society, etc.

Currently MRU enrolls approximately 7.500 students and employs over 500 academic staff. The university offers more than 100 doctoral, master and bachelor study programmes; over 80% of them have international accreditation. The most popular study programmes are law, management, public governance, psychology, public security, etc. About 200 doctoral students study in the fields of law, management, economics, psychology, philology, and educational science.

MRU is structured within the Faculty of Law, Faculty of Economics and Business Management, Faculty of Public Governance, Faculty of Public Security, Institute of Psychology, Institute of Educational Science and Social Work, Institute of Communication, and Institute of the Humanities.

MRU fosters the culture of research and innovation: carries out fundamental and applied research, takes part in national and international research programmes and projects, and carries out contracted research, implements Ph.D. studies, organizes academic and mobility events, and widely disseminates research results to general society. MRU research and innovation is carried out in the framework of the interdisciplinary priority research area Social Innovations for Global Growth and 5 research programmes:

- Justice, Security and Human Rights;
- Social Technologies;
- Sustainable Growth in the Context of Globalization;
- Improving the Quality of Life and Advancing Employment Opportunities;
- Continuity and Change of Values in Global Society.

R&DI is implemented by the faculties, institutes and Social Innovations Laboratory Network MRU LAB that includes 16 interdisciplinary laboratories: Environmental Management Laboratory, Business Innovation Laboratory, Educational Technologies Laboratory, Gender Studies Laboratory, Health

Laboratory, Human Rights Laboratory, Justice Laboratory, Life Quality Laboratory, Lifelong Learning Laboratory, Mediation and Sustainable Conflict Resolution Laboratory, Psychological Well-Being Laboratory, Public Governance Innovation Laboratory, Security Laboratory, Social Technologies Laboratory, Sociological Research Laboratory and Values Laboratory. R&DI administration is carried out by the Research and Innovation Support Centre. For more information please visit www.mruni.eu

Foundation "Our Choice" was founded in 2009 in Warsaw and it is a migrant organization, oriented on integration of Ukrainian migrants in Poland. Mission of the organization is to support integration of foreigners in Poland and to support development of cultural, educational, economic and political contacts between Poland and Ukraine and to promote the democratic values and civic society.

Since 2011, Foundation publishes a newspaper for Ukrainian migrants "Nasz Wybór", which is distributed free of charge in whole Poland and runs the Internet portal www.naszwybir.pl. Both mass media are well known in Poland. Newspaper is issued in 3000 copies. The portal has 68 000 users per month and more than 3 500 000 hits per year.

In 2014 Foundation established the Ukrainian House in Warsaw, which is a unique institution gathering Ukrainian immigrants and provides ground for cooperation of local and Ukrainian citizens. In the Ukrainian House operates: consultancy point, language school, art gallery, Ukrainian Women Club and Children Club "Rukavychka". Foundation organises workshops, presentations of books and movies, concerts, public debates. Foundation established the Ukrainian Saturday School.

Research of the situation of the migrants in Poland is a crucial activity of the Foundation. Key fields of interests: young migrants, working conditions of Ukrainian migrants in Poland, gender aspects of migration and integration, hate crimes against migrants.

Organisation

NOVA is one of the largest social research institutes in Norway. The institute conducts research on different aspects of society and the welfare state. We focus on the whole range of the life course: from the early years to the later life. From 1 januar 2014 NOVA became a part of Oslo and Akershus College of Applied Sciences (now Oslo Metropolitan University) and Centre for Welfare and Labour Research. NOVA's research is centered around Norwegian society, but international projects form a growing and important addition. The aim of the institute is to develop knowledge and understanding of social conditions and processes of change. We focus on issues of life-course events, level of living conditions and aspects of life-quality as well as on programmes and services provided by the welfare system. Within its fields NOVA performs research assignments commissioned by public and private sector clients. Research conducted at NOVA is of a excellent international standard. The institute is the leading national research institute on child welfare, youth, ageing and the elderly.

PROJECT COOPERATION

Interested to participate as a partner within topics of migration and integration

We have an interest to participate as a partner within topics of migration and integration. Researchers have the following research interests and skills:

- Daniela Andrén, Associate Professor of Economics. Her main research interests are applied labor and health economics, with focus on the evaluation of public policies. She has written several articles about public interventions and the interaction of social security systems with labor markets and population health. A special focus of her research is to analyze immigrants in comparison with natives. Her current research focuses on welfare persistence of Swedish-born and foreign-born, partial sick leave and individual well-being.
- Miia Bask, Associate Professor of Social Work. She is a quantitative sociologist with a specialization in social stratification and inequality. She has conducted research on social exclusion among immigrants

in Sweden and Norway. She has also written about school burnout and school dropout, internalizing and externalizing problem behavior among youth, parental educational expectations, and theoretically and methodologically oriented studies on inequality-creating mechanisms.

Based on our experience and research interest we would be interested to contribute to the following areas within the topic Social and economic effects of migration in Europe and integration policies

- Long-term effects of migration at EU aggregate and cross-national level on employment levels and wages and welfare impacts.

- Economic, human capital and cultural factors in relation to the integration outcomes of different groups of migrants and the social impact of segregation.

- Comparative examination of integration policies (labor market, education, health, social welfare, and family policies).

	Assoc. Professor

Organisation

OsloMet - Oslo Metropolitan University is the third largest university in Norway, with a student body of approximately 20 000 students and 2 100 employees. The university is a leading provider of research-based knowledge to the welfare society and specialises in professional training in fields such as nursing, technology and design, physiotherapy, engineering and teaching. OsloMet's research activities exploit the different possibilities created in the international and multicultural metropolitan area. OsloMet is unique in a national context due to its wide range of professional programmes, its close ties with the respective fields of practice, and the opportunities it offers to specialise at both master's degree and PhD levels. OsloMet is well equipped to make important contributions to resolving the challenges faced by society and is thus an attractive partner in international research projects. The Department of Social Work, Child Welfare and Social Policy offers study programmes at the BA, MA and PhD level, including a master's programme in International Social Welfare and Health Policy (in English). The Department of Social Work, Child Welfare and Social Policy has 1200 students and 90 faculty members, and specializes in international and comparative welfare and health policy research. OsloMet coordinates and participates in several European and international projects, including programmes such as Horizon 2020, FP7, COST and EEA-grants. A majority of these projects are within health and welfare. Currently OsloMet has coordinated NEGOTIATE www.negotiate-research.eu (2015-2018), a collaborative H2020 Young project which examining the long- and short-term consequences of job insecurity and labour market exclusion of young people and DISCIT (2013-2016), a FP7 SSH research project on Active Citizenship for persons with disabilities. In addition, OsloMet is currently coordinating a H2020 RRI-Practice - Responsible Research and Innovation in Practice, participating in eight H2020 projects, twelve FP7 projects, eleven EEA grants and ten Erasmus/ Strategic partnerships.

OsloMet can also draw on experience with other relevant projects, e.g. GGP - Generations and Gender Programme, a Social Science Research Infrastructure that provided micro- and macro-level data, GGP surveys focused on intergenerational and gender relations between people, expressed in care arrangements and the organisation of paid and unpaid work (FP6, 2008-2012); MULTILINKS - How demographic changes shape intergenerational solidarity, well-being, and social integration: A multilinks framework (FP6, 2008-2011); RECOWOE - Reconciling Work and Welfare in Europe (FP6,

2006-2011) and CINEFOGO - Civil Society and New Forms of Governance in Europe: European citizenship formation (FP6, 2005-2009), and COPE Combatting Poverty in Europe (FP7, 2012-2015).

Areas of Activity

- GOVERNANCE-04-2019: Enhancing social rights and EU citizenship

	EU adviser

Organisation

OsloMet - Oslo Metropolitan University is the third largest institution of higher education and research in Norway, with approximately 20 000 students and 2 100 employees. The university has four faculties covering the social sciences, health, education and technology, and two social science research centres specialising in the study of professions and welfare and labour research.

OsloMet is a recognised institution for professionally oriented and vocationally relevant research and development, and our research activities exploit the possibilities created in the international and multicultural metropolitan area of Norway. The university is unique in the national context due to its wide range of professional programmes, close ties with the respective fields of practice, and the opportunities arising from offering both master's and doctoral degrees. This makes OsloMet well positioned to contribute to solving the major challenges society is facing, and an attractive partner in international research projects.

OsloMet participates in several EU projects, funded by programmes such as Horizon 2020, COST and the EEA grants. A majority of these projects are within health and welfare research. The university currently coordinates 4 Horizon 2020 projects, including RRI-Practice - Responsible Research and Innovation in Practice. Examples of completed projects coordinated by OsloMet are NEGOTIATE (2015-2018), a collaborative Horizon 2020 Young project which examined the long- and short-term consequences of job insecurity and labour market exclusion of young people; and DISCIT (2013-2016), a FP7 SSH research project on Active Citizenship for persons with disabilities.

The Department of Research and Development provides administrative assistance to leaders and scientific staff at the university. It includes a team of dedicated EU advisers, offering pre-award support to our researchers.

Oxfam

Organisation

Country	Italy
City	Florence
Street	
Web	https://www.oxfamitalia.org/

Person

Name	Francesco Lucioli Institutional Funding Coordinator
------	--

Organisation

Oxfam is an international confederation with more than 70 years of experience. We work in 90 countries and understand that by mobilizing people and resources across the world we can put an end to poverty.

Our presence and experience in the field make of us a unique hands-on experience partner able to connect theoretical research to practical actions.

Our high management capacity and EU expertise makes of us an efficient partner to work with. Oxfam raises between 25- 50 million euro from European funds every year across the world.

Oxfam International is specialized in addressing Inequalities, Food Security and Resilience, Gender Justice and Global Displacement, with a particular geographical focus in MENA, Latin America, West Africa and Maghreb.

In the area of Global Displacement, Oxfam is an international confederation working in countries of origin, transit and destination of international migration as well as with forcibly displaced populations, especially in Africa. Oxfam has also long-term experience in policy influencing worldwide, at subnational, national, regional and international levels. We have unique experience translating evidence from our programme work into policy recommendations for key decision makers as well as in opening up political space for participatory policymaking.

These reasons make Oxfam a key actor and a relevant partner in research projects aimed at producing evidence to underpin both policy and programme recommendations to address migration and forced displacement.

Inequalities

Marketplace Opportunities

PROJECT COOPERATION

Migration and Global Displacement

Regarding the specific topics, we have pre-identified some directly related to migration where we could add value:

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-03-2019: Social and economic effects of Migration in Europe

Oxfam field experience allows us accessing quantitative and qualitative comparative information in order to better understand human mobility in its different dimensions and shape common patterns. It also gives us access to key stakeholders: local organizations, international agencies, local and regional authorities, etc., enabling the dialogue and projection on regional migration patterns and trends.

As Oxfam we have often exposed the failures and misconceptions underpinning a certain approach to migration governance. We believe it is time to move from pointing out the flaws to offering evidence-based solutions to promote alternative migration management models that harness migration to advance human development in full respect of human rights.

We could contribute to research projects looking at how civil society can play a role in empowering people on the move to influence the policies that concern them, and to what extent this leads to human rights responsive migration policies. The evidence can, again, be shaped in the form of recommendations to ensure political space that gives voice to people on the move to contribute to the shaping of more effective migration policies that harness the benefits of migration while respecting and fulfilling fundamental human rights, including the right to move.

- MIGRATION-06-2018 Addressing the challenge of migrant integration through ICT

- MIGRATION-07-2019: International protection of refugees in a comparative perspective

Oxfam has long-term experience working in countries that are currently hosting the vast majority of refugees and forcibly displaced populations fleeing active conflicts or protracted crisis in the world. We are present in West and North Africa, specifically in the Sahel and Lake Chad regions, empowering forcibly displaced communities through the provision of humanitarian assistance and comprehensive resilience programmes. In this context, Oxfam is leading the implementation of 3 programmes under the EU Trust Fund for Africa: in Chad, in Burkina Faso and Mali. We also work in CAR and Syria as well as in Italy and Greece, responding to the urgent needs of displaced people reaching European shores. This gives us privileged insight and relevance as a partner in any research project aimed and exploring the interface between emergency responses, local integrations and human development, including testing innovative practices and identifying solutions for protracted displacement situations in full respect of human rights.

Concerning forced displaced population's international protection, Oxfam integrates a protection approach in all its humanitarian projects as well as standalone protection programmes in some of the contexts. Our work in protection aims to reduce threats by holding the relevant authorities to account for protection through international advocacy and campaigning local and national advocacy and negotiation, and building the authorities' capacity for protection where appropriate. This allows us to gather evidence on the failures and challenges of the acquis and instruments of International Refugee

and Human Rights Law.

Paris&Co is the economic development and innovation agency of Paris. We seek to enhance attractiveness and innovation, with the aim of creating jobs and value-add in Paris. We prospect and host foreign start-ups, promote Parisian business opportunities internationally, and boost the innovation ecosystem of the Paris metropolitan area by incubating new companies, beta-testing innovative solutions, organizing events and helping start-ups network with over a hundred corporate partners.

Paris&Co currently supports more than 400 start-ups (including 55 foreign start-ups), organizes nearly 330 events annually, and has conducted more than 300 experimentation trials for 10 years.

Paris&Co has five major businesses:

- Accompany and incubate start-ups
- Welcome and assist foreign start-ups
- Conduct in-the-field proofs of concept of innovation solutions in Paris (Urban Lab)
- Develop business relationships between major corporates and start-ups through Open Innovation Club
- Federate the innovation ecosystem through large-scale events, such as the Hacking de l'Hôtel de Ville and the City of Paris Innovation Grand Prix

Marketplace Opportunities

PROJECT COOPERATION

Policy labs and service design in government

PDR Design Policy is an applied research team working on studying and applying user-centred approaches in public sector and government. We have trained over 500 civil servants across Europe to use design-driven innovation. We are looking to join a synergistic consortium and contribute our

experience and expertise to develop learning programmes, facilitate discussion on and synthesise a new public sector innovation theory.

PROJECT COOPERATION

Citizen-centric governance

In PDR Design Policy we conduct applied research on how design, as a user-centred method, can be applied in public sector to better engage people in political decision making, co-creating and co-owning public services and policies. We would be interested to join a consortium to investigate how involving citizens in making public decisions can help restore trust in governance.

	Chief Fundraising Specialist

Organisation

POLIN Museum of the History of Polish Jews is a unique and unprecedented initiative, spanning many fields of research and drawing on the expertise of scholars and museum professionals from around the world.

The Museum opened its doors to the public in 2013. It currently functions as a cultural and educational centre with a rich cultural program, including temporary exhibitions, films, debates, workshops, and concerts, as well as academic and popular conferences, lectures and much more.

Museum's core exhibition, presenting the thousand-year history of Polish Jews, was opened in 2014. Occupying around 4,000 sq m, the exhibition immerses visitors in the world of Polish Jews, from their arrival in Poland as traveling merchants in medieval times until today. The exhibition was developed by an international team of more than 120 scholars, working under the direction of Professor Barbara Kirshenblatt-Gimblett from New York University. It was produced by the Association of the Jewish Historical Institute of Poland thanks to the support of donors from all over the world.

The exhibition presents the heritage and culture of Polish Jews, which still remains a source of inspiration for Poland and the world. Each of the eight galleries of the core exhibition presents a different chapter in the story of Polish Jews, enabling visitors to come into intimate contact with those who lived that story through images, artefacts, first-person accounts and interactive multimedia. We show the social, religious and political diversity of Polish Jews, highlighting dramatic events from the past, the Holocaust, and concluding with contemporary times.

Since opening its door to the public in 2013, the Museum was visited by nearly 2.8 million visitors. Nearly 1.3 million people visited the core exhibition.

POLIN Museum was granted many prestigious awards. In 2016, it was honoured with the EMYA European Museum of the Year Award, and the European Museum Academy Award—the two most prestigious European prizes for museums.

The long-term goals of the Museum include first of all popularising the history and culture of Polish Jews, as well as developing educational activities aimed at promoting tolerance and preventing antisemitism, bias and xenophobia.

The Museum pursues its objectives by means of cooperation with Polish and foreign cultural, educational and academic establishments (especially the Jewish Historical Institute in Warsaw), central

and local government authorities, non-governmental organizations and the media.

Organisation

Polish Platform for Homeland Security (PPHS) was established in 2005. PPHS associates representatives of Polish Law Enforcement Agencies and universities. The mission of the PPHS is to improve the level of public security by supporting agencies and institutions responsible for security and legal order.

In cooperation with secure practitioners and representatives of science, PPHS develops IT tools and legal environment to support the broadly defined efforts in order to improve public security.

The basis of cooperation is different kind of R&D national and European projects. At the same time PPHS fosters cooperation in the area of security among various fields of science, research and development, and education. Moreover, PPHS as a think tank is focused on defining and solving problems in area of security, by preparing reports and other materials for policy makers, like summary of workshops and conferences or research and development projects. By providing consulting and educational services, the PPHS supports the process of building public trust in the new security technologies.

PPHS cooperates with around 250 consultants from security area: experienced Law Enforcement Agencies and officers (especially representing the Police, Border Guards, Internal Security Agency) prosecutors, judges and representatives of science.

Legal status: non-governmental organization (association).

Organisation

For more than 150 years, the Politecnico di Torino has been one of the most prestigious public institutions at both the International and the Italian levels concerning education, research, technological transfer and services in all sectors of architecture and engineering.

The Interuniversity Department of REGIONAL AND URBAN STUDIES AND PLANNING (DIST) is the point of reference in Politecnico and Università di Torino for the areas of knowledge that study the processes of territorial transformation and government, both on a local and on a global scale. These processes are analysed from a sustainability perspective in their physical, economic, social, political and cultural aspects, as well as in their interrelationships.

DIST promotes, coordinates and manages basic and applied research, training, technology transfer and services for the local community with regard to urban and regional sciences and policies, as well as to spatial, urban and environmental-landscape planning.

Pro Cultura Foundation was established in 2003. The mission of our organization is to share knowledge and experience in a field of culture, media and information society technologies (IST). We provide national and international research and educational projects on defined areas as well as on socio-cultural change. We undertake our activities on behalf of the European Parliament, ERICarts, the European Commission and the National Culture Center. The Foundation promotes a citizen activity, an aware reception and presumption of (digital) culture creation. For 15 years the Pro Cultura has realized many so called soft projects in a local, regional, national and international environment.

Pro Cultura Foundation co-operates with the international cultural networks CIRCLE, EFAH, ENCATC and other foreign organizations, institutions and foundations: European Association of Cultural Researchers e.V. in Bonn (Germany), Kulturkontakt (Austria), , Budapest Observatory (Hungary), Observatorio Interarts (Spain), Finnish Foundation for Cultural Research (Finland), Euclid (UK), Intelligence on Culture (UK), Association of Cultural Economics (Italy), Cultural Policy Institute (Russia). The Foundation engages 13 experienced specialists which work in 3 units – project department, research and evaluation department, e-learning platform department.

Areas of Activity

Region Västerbotten has regional development responsibility in Västerbotten County. Region Västerbotten was founded 2008 to take the regional political responsibility for regional development issues in a politically-governed organization and have a clear political representation in regional growth.

The region of Västerbotten has always the county's growth and development in focus. Our regional development work is extremely important for the county to develop positively. We work to increase our attractiveness and create the best possible living conditions for the county's citizens. A positive regional development creates employment, good access to education, leisure and culture, good living and a good community service.

Our focus areas are regional development planning, business and entrepreneurship, tourism (Västerbottensturism), energy, environment and climate, competence supply and education, transport infrastructure and communications, IT infrastructure and applications (IT Västerbotten), renewal of community service, international engagement, EU, regional cultural development.

The Research Centre of the Slovenian Academy of Sciences and Arts (ZRC SAZU) consists of 18 research units or institutes. Situated in the hearts of the historical center of Ljubljana, next to the Slovenian Academy of Sciences and arts building, ZRC SAZU has more than 300 employees, roughly 250 of whom are researchers. ZRC SAZU also has three branch offices outside of Ljubljana: in Nova Gorica, Maribor, petanjci, Postojna, Tolmin, and Barje.

ZRC SAZU conducts basic research across a range of fields, included natural, earth, and spatial sciences (paleontology, paleoecology, archaeobotany, archaeozoology, palynology, sedimentary geology, biology, zoology, botany, karst sciences, geomorphology, natural risks, hydrology, climatology, environmental protection, earth observation, and geographical information systems) and the social sciences and humanities (demography, neuropsychopharmacology, sociomedicine, anthropology, visual anthropology, historical geography, cultural geography, regional geography, regional planning, philosophy, ontology, psychoanalysis, political philosophy, philosophy and science, aesthetics, ethnomusicology, musicology, ethnology, linguistics, digital humanities, literary studies, literary sociology, archaeology, socioeconomic history, cultural history, political and administrative history, art history, onomastics, dialectology, and bilingualism).

In terms of applied research, the expertise of the ZRC SAZU institutes has direct application in lexicography and the creation of Slovenian dictionaries; the care, preservation, protection, and management of the cultural and natural heritage; environmental protection; water resource management; professional support in building infrastructure (highways and railways), and the development of methodology, and preventive or intervention programs for mentally ill.

Marketplace Opportunities

PROJECT COOPERATION

Trials for Democracy

We are looking for political sociologists who have extensive experience in group trials and tests of values/ attitudes. We will be adding some advanced technologies and want experienced partner with track record.

PROJECT COOPERATION

International Refugee Comparisons

RMIT has extensive experience in South-Asia and South-East Asia. We have multiple campus. RMIT also hosts the permanent secretariat of the UN Global Cities Compact and as such as a global network of partners - we would be ideal to work on international comparison.

PROJECT COOPERATION

Housing, education and training for all

RMIT has worked extensively in driving inclusion activities for marginal communities. This includes working in ensuring better holistic living environments - combining nature based systems into architecture and community building activities. We are keen to work on international comparison actions - as well as core research in indicators and evaluation of policy initiatives.

PROJECT COOPERATION

Differentiation in European governance

Extensive RMIT investments have been made in having a Jean Monnet Centre in Australia as well as RMIT Europe research hub in Barcelona. We have extensive political science capacity and can add elements of design, ICT and industry partnership.

RMIT Europe is not a university student campus in the conventional sense. Rather, we're a team of professional staff committed to connecting the expertise of RMIT researchers and the ambition of RMIT students with transformative experiences in Europe.

Our partnerships with quality research institutions and industry leaders in Europe are about more than having aligned objectives – there is a focus on true co-creation and finding new and better ways of doing things.

With our partners in Europe, we work together to shape the world through collaborative design, research, learning and problem-solving to create impact.

Our location in Barcelona, one of Europe's most vibrant cities, evolved from the University's work on Gaudi's iconic basilica La Sagrada Familia.

And our continued presence in Barcelona's creative heart sets our pace and drive, with its world-renowned design and architectural achievements, advances in sustainable urban futures as well as a strong commitment to innovation and entrepreneurship.

Rural - communication and sociology consultancy

Organisation

Country	Hungary
City	Balatoncsicsó
Street	Domb utca 1
Web	https://www.facebook.com/ruralbt/

Person

Name	Gusztáv Nemes
	Rural sociologist development consultant

Organisation

Rural Bt (Rural Sociology and Communication LP) is a limited partnership owned by Gusztáv Nemes PhD and Zsuzsanna Fazekas PhD. The company has been working as a consultancy since 1993, dealing with European rural economy and society in a globalising World. Our main mission is to create and distribute knowledge, support innovation and assist rural communities to find and construct better futures for themselves. We do both research and consultancy, have skills in organisation and facilitation of workshops, living labs, participatory methodology, communication (including social networks and video), building transdisciplinary research networks including farmers, NGOs and government institutions. Rural LP is a small consultancy, focused on socio-economic development of rural areas, with special regard to social innovation, local food systems, short food chains, rural tourism, cultural heritage, youth and social justice. Another area of our activities is strategic planning and evaluation of rural development programmes from the level of LEADER LAGs to national and EU level policies. We had commissions from DG AGRI, LEADER LAGs and small rural companies too, have contacts with producers, NGOs and policy makers.

We have had projects in the following areas:

Research consultancy

We contributed to a number of applied research projects and surveys in different topics, such as urban and rural planning, poverty, agricultural transformation, environmental sustainability, etc.

Capacity building through social media

From 2006 we have had many projects using participatory film making and other participatory techniques (mapping, smart phones, etc.). We worked with local development groups, rural youth, entrepreneurs, using community film making for training, community building, self-evaluation, marketing, etc. Some films with English subtitles:

<https://www.youtube.com/watch?v=XnAnH594WU0&list=PLZdrIE4wSYjP341bW2d4pZJ-XJbfxDGIn>

Policy evaluation

We worked on the development of evaluation methodology and in official evaluations of rural policies (ex-ante, mid-term, ex-post) both on domestic (Hungarian) and EU level.

Capacity building with disadvantaged social groups

We worked with segregated, poor Roma communities in remote rural areas of Hungary in the "Cserehát Programme" financed by the UNDP in 2005-2007. Our task was as 'expert coach' helping

social innovation and development in 18 Hungarian villages.

Capacity building in rural tourism

From 2011 our main activities concerned sustainable rural tourism, we participated in a number of actual local development projects, developing GIS based smartphone applications, social marketing, websites, making films, etc. We participated in the development of the Hungarian version of the European Territorial Quality Mark (ETQM), with training bringing EU best practices, connections to the participating Hungarian local action groups, and became the certified national auditor of the system.

Capacity building in cultural heritage

During the last 2 years we started to work in the field of cultural heritage (CH). We participated in the development of new management plans of two Hungarian UNESCO World Heritage sites, as experts for rural development, tourism and process assistance/facilitation. We are currently consultants in an international capacity building project "Revealing the Socio-Economic potentials of cultural heritage" (REVEAL) aimed at the development of two methodologies: (1) an evaluation methodology to measure the socio-economic impact of cultural heritage investment; and (2) an intervention methodology, to enhance local socio-economic effects.

Facilitation of events, meetings, workshops and training

We have special skills in the organisation, facilitation and documentation of events and workshops. We contributed to a wide range of events and topics, from meetings aimed at local development strategies through national workshops on European Innovation Partnerships, to large international gatherings, organised by the European Rural Network.

Facilities and skills

We can operate on three languages (Hungarian, English, Spanish). The company has a new office building and video studio and equipment for all our normal activities. We can build on a number of professional connections internationally and can employ additional staff for concrete projects.

About SU GENDER:

Acting as an interdisciplinary forum since 2002, SU GENDER is currently a center of excellence in gender studies (since 2015). Our activities are geared towards eliminating all forms of discrimination including gender identity, sexual orientation, language, ethnic background, class or faith; creating discussion and sharing environments that support pluralism, creativity, equality and solidarity; making academic knowledge available and accessible for all, and strengthening the flow and exchange of knowledge between the worlds of academia, civil society, art, politics, and everyday life. SU Gender has been actively raising awareness about gender equality within and outside the university. In 2006-2007, we came together from various faculties as students, faculty members, and administrative staff at the intersection of two transformative projects: the constitution of the Sabancı University Principle Document for Preventing and Providing Support against Sexual Harassment and the establishment of the Purple Certificate Program as a part of the United Nations Joint Program for the Development of Women and Children's Human Rights (BMOP). Aside from frequently organizing conferences, panels and discussions, the Center runs two innovative programs: The Purple Certificate Program – for the integration of gender equality to high school curricula and the Curious Steps Gender and Memory Walks Program - presenting alternative gender-informed perspectives on the historical, social and political relations that shape the city in which we live. We also provide gender equality trainings to education institutions, civil society organizations and the private sector.

About Sabanci University:

Established in 1996, Sabanci University (SU) is internationally recognized as one of the most innovative and research-oriented universities in Turkey, as suggested by its ranking according to the Entrepreneurial and Innovative University Index of the Scientific and Technological Research Council of Turkey (TUBITAK). At SU, academic activities are performed within the framework of three faculties composed of non-departmental and interdisciplinary programs: Faculty of Engineering and Natural Sciences, Faculty of Arts and Social Sciences and School of Management, which feature a total of 13 undergraduate and 41 graduate programs. As of 2017, research funding size is 40 million Euro so far with 631 projects. There are 1.2 projects per faculty member with an average funding of TL 450,000.

59% of the projects generated from national foundation sources (TÜBİTAK), 23% from private sector, 12% from European Commission programmes. SU has 16 EC FP6 projects (Total Budget: €3.454.610); 47 EC FP7 projects; 31 Marie Curie Grants (17 IRG,9 CIG, 3 ITN,1 IOF,1 IRSES), 10 Cooperation Projects, 3 Capacities Projects, 3 FET Flagship Projects. (Total Budget: € 6.394.652) Under Horizon 2020 innovation and research framework program 6 projects have been funded so far ; 1 Marie Skłodowska Curie Global Fellowship Project, 1 ERC, 2 RISE, 1 ICT, 1 CSA. In 2015, Sabanci University disclosed a record-high number of 20 inventions. These inventions will likely bring an increase in patent applications and registered patents in the near future. Since 2000, Sabanci University faculty and researchers have made more than 3000 scientific and technical publications. In 2015, the number of scientific publications per faculty member was 1.7.

PROJECT COOPERATION

Expertise in gender equality and gender research in relation to migration and politics

SU Gender is an interdisciplinary center. Our research interests can be summarized as follows:

- Gender and peacebuilding, women in peace processes, gender and reconciliation, gender and militarism
- Gender and displacement
- Gender and violence, gender and social memory
- Comparative political economy of education, skills, social policy and regulation
- Political participation, women's movements, gender and politics
- Masculinities, sexualities, neoliberalism, work, the city, mobilities
- Literature and politics, literary and cultural theory, cultural memory, trauma studies, gender and representation
- Global health inequalities, gender, body and health, narratives of sickness, health and migration

Research Methods

- Interviews, focus groups
- Ethnography
- Oral history

- Surveys
- Secondary data analysis
- Scenario analysis
- Textual and discourse analysis
- Archive, media and social media analysis

Organisation

Santa María la Real Foundation of Historic Heritage is an organization with more than 200 professionals working on the study, restoration, conservation and divulgation of social, natural and cultural heritage. Our daily work and achievements are the best example of the value of heritage. We have spent more than 40 years creating development in the territories through the implementation of projects and initiatives based on three axes: heritage, landscape and people.

Areas of interest:

- Study, restoration, conservation, management and divulgation of heritage.
- Monitoring of historical heritage.
- Tourism and smart tourist destinations.
- New uses and rehabilitation of cultural heritage.
- Social innovation: launching pads for employment
- Industrial heritage.
- Rural development.
- Promotion of employment and entrepreneurship.
- Care assistance of the elderly.
- Revitalization of territories in socio-economic decline.
- Mitigation and adaptation to climate change.
- Renewable energy.
- Energy efficiency.

Person

Name	Dimitrina Semova
	Research Advisor at the Complutense University (Madrid)

Organisation

Researchers and practitioners with large experience from the School of Communication of the Complutense University of Madrid (Spain). Our research and practice based teams offer expertise on the following topics:

GOVERNANCE-01-2019 Trust in governance

Expertise offered: Transparency in the management of public institutions as general and of education institutions, specifically. Main objective: support and reinforce participation of citizens in our democracies. The TRA.BU.COM group has a large experience in monitoring of the right of access to public documents and comparing the results with recommendations for good practices from regulatory organizations dealing with transparency, such as ICO in England or Consejo de Transparencia in Spain. Our practice based research will tackle both quantitative and qualitative aspects of transparency in governance of institutions.

TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments

Corporate Social Responsibility, Sustainability, etc. Practice-based strategies on cities and urban planning in collaboration with industry and public administrations to create more sustainable and humane cities.

Expertise offered:

- Brand activism.
- Trends in commercial communication.
- New trends in communication and big data.
- The new corporate reputation of the institutions in open and polarized societies.
- The impact of social, political and economic changes on enterprises, derived from new attitude of companies to get engaged at social issues. Practice based research of specific regions or countries, as well as comparisons of the behavior of certain specific brands in different markets.
- Study about the Image, Identity, Personality and Brand Management of enterprises.
- Make industry and business more competitive and to promote job creation and economic growth by creating a business-friendly environment through a new culture in organizations and reputation.

DT-GOVERNANCE-13-2019: Digitisation, Digital Single Market and European culture: new challenges for creativity, intellectual property rights and copyright.

Expertise offered: Profiles specialized in content production, brand communication in new media, etc. Our contribution here could be an analysis of brands as creators and producers of content in the new digital society, changes in the creation and consumption of audiovisual content with new platforms such as Netflix, Amazon's Prime Video, etc.

TRANSFORMATIONS-2019-2020: Social platform on the impact assessment and the quality of interventions in European historical environment and cultural heritage sites

Expertise Offered: Well experienced team from the School of Communication of the Complutense University (Spain) explores the use of audiovisual media as tools to improve the transfer of scientific knowledge to the society. Our research focuses mainly on scientific and divulgative documentaries: Feature films and scientific and informative documentary series; Audiovisual didactic units; Virtual classrooms and audiovisual formats for online teaching.

We are interested in projects about culture, audiovisual heritage and in the Transformations calls, in general.

TRANSFORMATIONS-2019-2020 Societal challenges and the arts

Art and culture is a powerful tool to grab direct attention and point to critical problems affecting our societies. Experts from our faculty have been working on the phenomena of the so called activism: social and political engagement through cultural practices. Our focus is on participatory practices which look for new ways of political intervention and open up new forms of action that move beyond traditional paradigms of activism. Diversity and enhancing social inclusion through activism are main approaches in our research and practice.

Siedlce University/ Institute of Chemistry

Organisation

Country	Poland
City	Siedlce
Street	3 Maja 54
Web	https://www.wns.edu.pl

Person

Name	Danuta Branowska assistant professor
------	---

Organisation

Institute of Chemistry performed their research in synthesis and study of physicochemical properties of new materials. Those are heteroaromatic compounds, siloxanes, complexes with transition metals, liquid crystals which can be used in electronic, pharmaceutical and agriculture. The study focused on heterocyclic compounds and optimization of new stereoselective synthesis methods aimed at discovered biologically active compounds. Obtained structures are confirmed by NMR technique and X-ray analysis. Synthesis and spectroscopic study of luminescence complexes are a drive to find new materials for optoelectronics. Researches in area of anti- and pro-oxidants in foods allow assessing healthy properties of food products. Furthermore, there are conducted studies concerning influence of electrons with nucleotides and aminoacids, what is a consequence in recognition of mechanisms of formation of civilization diseases.

PROJECT COOPERATION

GOVERNANCE 18-19. INNOVATION IN GOVERNMENT.

I would be glad to present the expertise of the research group of the University of the Basque Country that is interested in joining consortia on the call "Governance".

We are working on a challenging initiative alongside a Provincial Public Administration promoting a new way of governance in which experimentation, co.creation and collaboration are key drivers for the innovation in the public sector. Confidence, trust, social listening and participation are at the core of the proposal.

Web	http://soclab.org.pl

Person

Name	Agnieszka Maszkowska
	Project Manager, Vice-President

Organisation

The Foundation specializes in the implementation of social research and evaluations in the field of culture, participation and other topics important in society. Since 2013 the Foundation carries out projects in order to support social and civil activity of Poles. We provide them the knowledge and skills through trainings, counseling and social animation. Our main program is Civic Laboratory which consists of multifold activities in the field of civic participation, in particular dedicated to residents, community leaders, office workers, youth, NGO representatives, elderly people as well as groups at risk of social exclusion (direct recipients: over 500 persons). Program was implemented in cooperation with the public sector institutions and NGOs. The activities included, among others, training for different social groups, research activities, study visits, publishing educational publications, setting up and operating the web portal for the public consultations, organizing debates and conferences, conducting model public consultations, dissemination activities. We are active on the national level in the field of participation. Since 2015 the Foundation has been a partner / co-organizer of the national event "Forum of Participation Practitioners" – which is a cyclic educational event nationwide for civic participation. About 200 people attended the Forums every year. The Foundation conducts regular meetings in Bialystok called TechKlub. They are dedicated to the communities of people interested in the use of new technologies in social activities. The meetings have the aim to exchange experiences in the field of using new applications, softwares, technologies and knowledge of how to use them.

Prime Holland is a non profit foundation focused on education in the field of tourism, social media and innovation on entrepreneurship. Prime Holland has written and run several projects focused on the tourism sector operating through different EU projects, Fifth frame program, Grundtvig, LEO TOI. In Turkey Prime Holland has developed projects and Mobilities for the cities of Denizli redesigning the city services when Denizli became a metropolitan region of 1.2 million inhabitants. Working in a LEOTOI project for the Bolu Tourism School Prime Holland has adapted the school curricula to games. <http://ivetagr.org/gamevet/> In another project with the same organisation Prime Holland worked on developing new services and products for the tourism sector on the social media. One of the project is on Instagram <http://iconosquare.com/tag/mudurnuntvis/> and <http://www.facebook.com/pages/Bolugram/390365214351537> Prime Holland has developed educational material for the social media tools showing practical cases such as <https://www.facebook.com/pages/Bolugram-Venezigram-SQCgram/390365214351537> In Europe, it has also implemented projects in Italy, Romania, Slovenia, Germany, Lithuania and Spain. Prime Holland has designed <http://brickme.org> training and crowd-funding platform for educational projects. Prime Holland has developed training programs on the use of social media, toolkit manual on tourism, Roving Museum Toolkit: <http://tinyurl.com/ogrl7f8> Training program in Munich <http://tinyurl.com/ogrl7f8> Prime Holland is member of different organizations and it has an extensive networks of partners in the field of tourism sector with whom we cooperate in developing educational tourism programs in Uruguay and Brasil. In the VOIP LEO TOI project delivers an online e-learning system adapted to users' needs in terms of usability and methodology, and a set of multi-lingual courses to train learners on useful Internet tools. In the GIVE LEO-TOI project -GIVE 2011-1-PL1-LEO05-19885 worked on guidance for VET students in rural areas In the partnership project New Transgenerational Visual Learning has developed an interactive platform and trained Young Adults/ seniors and VET students in the use of Social MEDIA. <http://ivetagr.org/dtedu/ntvis>. NTVIS has been selected as best practice by OPEN EDUCATION EUROPE: <https://www.openeducationeuropa.eu/en/project/ntvis>

Daniel Weiss Daniel Weiss has post graduate on GIS and urban planning and a Certificate EQF level

06 on Heritage Interpretation by the Aegean University. He has taught design thinking and innovation at Elisava University In-service training re-designing library services at Hacettepe University He has published in cooperation with the Aegean University Research unit [http://www.scribd.com/doc/154047420/SEETCPSAGITTARIUS- The-Roving-Museum](http://www.scribd.com/doc/154047420/SEETCPSAGITTARIUS-The-Roving-Museum) He has developed games for different cities to bring into light the local heritage and services. Some examples are. <http://brickme.org> <http://gamevet.org/blog/> PRIME HOLLAND has participated Framework Programs 5 & 6, Grundtvig Lifelong Learning, Transfer of Results in Leonardo TOI projects in Hungary, Germany and Turkey. Youth, ENPI, DAPHNE, LEO TOI, LEO DOI, Europe for Citizens projects. Developer of the Cognitive Metro Line Methodology Developing Projects merging Game Methodologies and Trans Media Convergence +Social Media + Design Thinking for Job Counsellors and VET. Developing sustainable Tourism projects based on Social Media and Design Thinking. Developing Transgenerational Digital Literacy projects for libraries. Developing for the HOTEL business new ways of management based on Social Media. PRIME HOLLAND has been working supporting entrepreneurship and new business model for more than 25 years in the Region of Den Helder and the North of the Netherlands.

TED University (TEDU) is a young, dynamic university, located in the heart of Ankara. It was founded in 2012 by the Turkish Education Association (TED), which has been pioneering the development of education in Turkey since 1928. With an emphasis on liberal arts education, TEDU aims to foster graduates, who are creative, critical-minded, self-confident and well-rounded. The University consists of five faculties: Architecture, Arts and Sciences, Economics and Administrative Sciences; Education and Engineering, and English is the medium of instruction. TEDU is a progressive academic institution offering an integrated approach to higher education and a high quality student-focused educational experience. Through academically rigorous coursework, dynamic teaching, meaningful research, and a myriad of opportunities for students to engage locally and abroad we seek to build a diverse community of socially responsible, globally minded, lifelong learners.

The Educational Research Institute (IBE) is an institution conducting interdisciplinary research concerning the functioning and effectiveness of the education system in Poland. The Institute participates in national and international research projects, prepares reports, expert opinions and carries out advisory functions. The Institute is supervised by the Minister of National Education. The Institute promotes evidence-based policy and practice, and in particular, the studies that results can be used in practice and educational policy development at both national and local level. The Institute employs over 200 researchers - mainly sociologists, psychologists, educators, economists, political scientists - most of whom are eminent specialists in their fields with considerable professional expertise not only in research work but also teaching, public administration, market/public opinion research.

The Institute cooperates with central public administration and representatives of local self-government. IBE's partners are key institutions in the Polish education system and stakeholders from labour market. Its growing cooperation network includes also schools, non-governmental organizations, universities across world, domestic and foreign research centres and international organizations.

The Institute publishes every year a number of books and studies in the field of education. Since 1982, the Institute publishes a quarterly "Edukacja".

The Institute main research areas:

- lifelong learning and national qualifications framework,
- ICT and new technologies in education,
- core curriculum and subject teaching methods,
- measurement and analysis of student educational achievement,
- psychological and pedagogical foundations of school achievement,
- relationship between education and the labour market, especially monitoring the situation of young people entering the labour market,
- economic determinants of education, financing education and other broad issues concerning economics of education,
- teacher working conditions, working hours, professional status and competencies,
- institutional and legal problems concerning the education system and educational policy.

Since its founding in 1669, INALCO's mission has been to teach foreign languages and civilizations by seeking to spread knowledge and skills in order to foster understanding at the cultural, social and professional levels. Today, it offers research in area studies and training in circa 100 languages that encompass various disciplines: linguistics, literature, social sciences and humanities (such as, but not limited to, history, geography, sociology, anthropology, economics, political science, and international relations). INALCO is a founding member of the Sorbonne Paris Cité University (USPC) association. With a faculty of 333 professors and researchers and 15 research centres covering studies in Central and Eastern Europe, Africa, Asia, the Americas, and Oceania, INALCO offers a stimulating environment for researchers.

Marketplace Opportunities

PROJECT COOPERATION

Addressing the challenge of migrant integration through ICT-enabled solutions

Challenge: Charities, authorities and migrant-targeted organizations have trouble connecting with migrants and refugees, often due to lack of appropriate language/cultural skills (cf Dari vs. Farsi)
 Our project idea: Development of appropriate host-country-specific toolkits in migrants' own language and host-country language to overcome key integration hurdles in relation to health, legal status, jobs, culture and housing (language-specific apps and/or a multilingual website and/or language-specific guides)

Research Team: ER-TIM (www.er-tim.fr): Expertise in multilingual text mining, textual semantics and multilingual e-learning

To overcome the challenge, ER-TIM/Inalco proposes to:

- summon in-house resources to handle rarely used languages (including past and present in-house projects) that contribute to the goal of a better mutual understanding of migrants
- map out migrant/refugee linguistic needs (interviews, research, field work) in EU countries with largest migrant/refugee inflows
- conduct analysis of most blatant shortcomings of present integration policies (linguistic, cultural, educational, medical, legal...)
- devise needs-based language/culture-specific guidelines for the development of ICT tools
- mine web for multilingual domain-specific data to offer translation equivalents and develop prototype for a limited number of languages and host countries

Potential partners: Interministerial Delegation for hosting and integrating refugees, The Ministry for Internal Affairs in France, Singa Association in France

Requirements for partners:

- review of best practices across EU (EU organisations conducting studies on migrant integration)
- Review of field work done in EU countries, eg non-profits, factoring in psychological aspects, highlighting success stories...
- Publicize and spread new tools (grassroots organisations that can boost app/website usage, government agencies that can refer to and encourage tool use)
- Singling out country-specific organizations that process migrant-related work and draw from this experience to determine languages/linguistic areas to target (government agencies in charge of processing migrants, non-profits dedicated to migrant relief, migrant-focused health-care organisations)
- Enlist migrants for linguistic feedback and technology acceptance (agencies in charge of migrant relief and help to test prototypes and tools, purpose-oriented -eg medical, legal..-outfits that can help narrow the gap between technologies and user expectations...)
- Monitor present state of translation in migrant-related documents (NLP labs to collect to present translations, academic partners to analyze the real impact of translation on migrants...)

TREE Technology S.A. (TREE) is a Spanish SME in Information and Communication Technologies. Tree Technology is an R&D intensive company that provides information and communication technology-based solutions. We are a data-intensive company.

TREE helps optimizing processes and business operations using advanced ICT solutions focused on Artificial Intelligence and Big Data, integrating emerging technologies as part of the Smart Data ecosystem. In particular, BigData, Machine Learning and Analytics, Computer Vision, Cognitive Systems, or Visual Analytics occupy a position of high standing among the company's research lines. R&D activities, in particular cooperative initiatives, are key to the company business model in assessing the maturity of emerging technologies, gathering new and differential knowledge, and identifying strategic partners to create new business opportunities.

Founded in 2006, the Trinity Long Room Hub Arts and Humanities Research Institute is dedicated to advancing Trinity College Dublin's rich tradition of research excellence in the Arts and Humanities, on an individual, collaborative and inter-disciplinary basis. We are focused on stimulating and sustaining the work of pioneering researchers contributing to new knowledge and understanding on the complexity of human thought, values, expression and behaviour and how it shapes cultures and societies throughout history and for our time. We are committed to demonstrating how the Arts and Humanities are at the centre of a civil society and integral to Trinity's mission to engage fearlessly in activities that advance a pluralistic, just and sustainable society.

The Trinity Long Room Hub currently has 5 research themes which it supports:

1. Identities in Transformation
2. Digital Humanities
3. Creative Arts Practice
4. Making Ireland
5. Manuscripts, Book and Print Culture

It is also currently supporting emerging research groups in the areas of environmental humanities and neurohumanities.

Delft University of Technology is the oldest, largest and most comprehensive university of technology in the Netherlands ranking 54th on the 2018 QS World University Rankings.

The Faculty of Industrial Design Engineering is a well-established Design School, one of the largest in the world. It was founded in 1969 and currently has about 200 staff members, 140 PhD students, and a student body of more than 2,000 students. The faculty focuses on research that integrates People, Business and Technology, and provides excellent facilities for reaching this integration by having a large number of labs that allows for prototype development and close collaboration with industry. The faculty is an internationally renowned organization and participates in a large number of international networks and (EU) projects and frequently hosts conferences and events.

Ulster University (UU) is a multi-campus institution with an international reputation for research excellence, innovation and regional engagement. The university has a long-standing commitment to researching and shaping governance, policy, and practice in contested societies dealing with the legacies of violence and conflict. Specific outputs have centred on confronting the challenges presented by racism, inequality and economic marginalisation. This portfolio of research has contributed to addressing blind-spots and lacunas in UK and Irish governance, policy and service delivery in areas such as gender, disability, ageing and ethnic minorities among others.

The Loyola University Andalusia (LUA, Universidad Loyola Andalucía in Spanish) is a young university with two campuses sited in Seville and Cordoba, Spain. Despite the fact that LOY was formally founded in 2011, it stems from the School of Economics and Business Sciences, which dates from 1963. A depository of the best Jesuit educational tradition, the LUA is a Research University with excellent education and research levels in the fields of technologies and social sciences, which has fostered the implementation of more than 20 programs covering bachelor, master, and PhD degrees. The Jesuit identity integrates LUA within a network of over 230 educational and research institutions, all over the world, with an unequivocal trajectory and prestige.

The LOY combines several departments to conduct cutting-edge multidisciplinary research projects in the fields of modern power systems, energy storage, computational intelligence and market economy.

The Universitat Autònoma de Barcelona (UAB) is one of the major public universities in Spain. It is located in Bellaterra, very close to Barcelona city. UAB is an interdisciplinary university which offers 85 undergraduate courses, covering a wide range of fields such as humanities and arts, social sciences, health sciences, technology and physical sciences. The University has 40.000 students, almost 3.000 researchers, and it hosts more than 2.300 foreign students.

In the 2018 edition of the Times Higher Education World University Rankings, the UAB is the second Spanish university, occupying position 147 in the world ranking.

The UAB is an institution that demonstrates its commitment to society by contributing in the agendas of Responsible Research and Innovation (RRI). The University aims also to contribute to society through its scientific research. To achieve this objectives, the school offer a wide range of courses, with 78 undergraduate courses, 88 doctoral programmes, 123 postgraduate programmes and 335 specialisation courses. The campus hosts a number of research centres and institutes, which together with the departments, make up the research consortium known as the Esfera UAB.

Migrations and transnational spaces of education: construction of the identity of girls and parenting in Moroccan, Pakistani and Senegambian families in Spain

Education, transnationalization, identities, gender, migrations and social change

This research project examines how transnational spaces of education contribute to the construction of cultural and social identities of girls of Moroccan families, Pakistani and Senegambian and the influence of parenting in this process, in the context of migration and social transformation in Spain. Our research on continuity and educational success of girls from Muslim immigrant families have stressed the importance of intra-family negotiations to move between the (Muslim) family and/or community spaces and the school and academic spaces (lay). For this reason, we consider it is necessary to know how the identities of girls are constructed from an early age in intrafamily relationship, as these will allow more or less flexibility in the election of their trajectories. To approach this question, the theoretical framework is built from the interrelationship between the following disciplines: (1) studies on migration and transnational feminism, linking social transformations with cultural hybridizations and identities that form in the educational and care relations; (2) anthropology of education, as the roles and controls of gender are essential in the formation, maintenance and change of ethnic social boundaries, for example, resistance to cultural assimilation through the reaffirmation of the gender roles or control of the girls and women by the group; and (3) postcolonial feminist theories and studies of masculinities, that explore contemporary subjectivities of girls as subordinate and their families, and imply to avoid the imposition of universal stories to find the singularities and difference.

Methodologically, the research will be conducted as a visual collaborative ethnography, consisting of two phases in the fieldwork: the observation units are Moroccan, Pakistani and Senegambian communities in Catalonia during the first phase of fieldwork; and the second phase of contrast will

take place with families and educational agents of the regions of Madrid, Murcia and the Basque Country. The techniques we will use are participant and videographic observation, ethnographic interviews, visual auto/biographical narratives, stories, focus groups and participatory workshops. The units of analysis are the girls and their family units, with a preference for the analysis of the mother-daughter and father-daughter relationship as socializing agents and possible models, but information on the role of other members of the nuclear family and/or extensive family, both national and transnational, will also be collected.

This research visualizes the agencies of girls as active participants in the research, along with families, for a better understanding of this challenge that will facilitate the optimization of resources in education and care. Thus, by focusing on the impact of the role of parenting, through education and care, in the formation of the identity of the girls from families of immigrant origin (Moroccan, Pakistani and Senegambian), too we address the social, cultural and economic impact of migration on education from an equal opportunities approach.

Centre for Studies of the Franco Era and Democracy (CEDID)

CEDID is a UAB Study and Research Center, made up of more than one hundred researchers from several disciplines, such as History, Philology, Political Science, Communication Sciences, Sociology, Economy or Law. Most of them belong to different UAB departments or research groups, but the center also includes a number of professors and researchers from other universities and institutions. It was created in 2001 as the Center for the Study of Francoist and Democratic Eras (CEFID). As years went by, the center gradually broadened its fields of scientific interest, both from the thematic and the chronological point of view, and incorporated a growing international dimension, with a particular focus on comparable historical processes developed in other European and Latin American countries. This substantial widening of the center research fields was the reason of the adoption of its current name in 2017.

PROJECT COOPERATION

TUDISTAR – Tourism Research Group

TUDISTAR is a multidisciplinary research group created in 1995 at the Autonomus University of Barcelona based in a multidisciplinary vision of the tourism sector. The group includes professors, associate professors and PhD students from a wide variety of disciplines, among them geography, economics, city planning, tourism and gender studies.

The members of the group publish their research in academic journals, and attend and present their results at national and international congresses.

Research lines and transfer capabilities:

- Cultural and Heritage Tourism
- Accessible Tourism
- Urban and City Tourism

Social innovation through participation is one of the lines linked with the vision of universal accessibility and social sustainability. We work around the concept of co creation of culture engaging the different publics, administrations, local community and private enterprise, with a special emphasis in museums.

The inclusive approach of the term accessibility that welcome people with disabilities, families, elderly people, and any person with a special need, is the way to assure a culture for all.

We search cross-disciplinary collaboration to participate in a European project in the challenges which match our lines of research.

PROJECT COOPERATION

TecnoCog. Philosophy to understand social and environmental implications of digital technologies

TechnoCog is a research group of the Philosophy Dpt. at Universitat Autònoma de Barcelona

The research team is interested in how to apply philosophy to real world problems, specially those that are the result of the use of digital technologies.

They are mainly focused in the following subjects:

Applied aesthetics: how art and design can be used to develop narratives that can help to better grasp the effects that digital technologies have in our society and culture, as well as the environment.

Applied Ethics: To make visible how digital technologies challenge some human rights as well as offering new opportunities for their further development, as well as realizing how they create new rights that need to be considered.

Landscape and ICT: We want to show how using smartphones and creative interfaces and algorithms we can help citizens to have access to the cultural and aesthetic values that landscape offer us, values which are difficult to sign and present using conventional means.

They collaborate often with other research groups in the Universitat Autònoma, such the IIIA (Institute for Artificial Intelligence), a research team in the psychobiology Dpt. or design researchers in Eina School of Design.

PROJECT COOPERATION

TransMedia Catalonia

TransMedia Catalonia is a UAB research group funded in 2004 (<http://grupsderecerca.uab.cat/transmedia/>) TransMedia Catalonia aims to research alternative communication, media accessibility and end user validation. It has a state of the art eye-tracking laboratory with other infrastructure to gather other physiological measures. Testing in Living Lab conditions is also available.

Researchers in TransMedia are from a multidisciplinary background: from Psychology to Translation or Politics and Sociology.

In terms of operational management capacity Pilar Orero has a lot of experience in the drafting, participation and indeed coordination of European projects such as HBB4ALL and ACT. At present TransMedia Catalonia leads one ERASMUS+ project (EASIT) and participates in two (ADLAB PRO and LTA) and in four H2020 EU (ImAc, Easy TV, REBUILD, and HELIOS) and leads the Marie Curie UMAQ.

The UOC is an innovative university that is rooted in Catalonia and open to the world. It offers people lifelong learning to help them and society advance, while carrying out research into the knowledge society.

Its educational model is based on personalization and accompanying students using e-learning. The University has 58.383 students in over 90 countries. The 80% of them combine studying and working. The UOC wants to be a university that, by being connected to the network of the world's universities, drives the creation of a global knowledge space and cutting-edge research in the knowledge society.

Since its creation in 1994 as a state-of-the art technological university with a highly innovative learning model, UOC is one of the world's premier online Higher Education universities, with more than 50,000 students. The UOC's core goal is to be the University of the Knowledge Society, promoting innovative education, personalised learning, technological leadership, R&D work on the information society and eLearning. Its research, innovation and transfer activity is led by almost 300 researchers and technicians organized into 43 groups. Each group belongs to one of the University's seven departments or teaching areas or to one of its two main research centres (the Internet Interdisciplinary Institute – IN3 – or eLearn Center –eLC-). Over the last five years, the UOC has participated in more than 250 R&D projects and nearly 50 European initiatives.

The Alma Mater Studiorum, the oldest university in the Western world, paves the way for innovation through an increasingly rich programme catalogue, cutting-edge research and a constant and increasingly broad international perspective.

Since its origins in 1088, Alma Mater has been student-centred hosting prominent figures from science and the arts. Based in five campuses (Bologna, Cesena, Forlì, Ravenna, Rimini), with a branch in Buenos Aires, it offers a teaching catalogue diversified and tailored to the needs of present-day society: over 200 degree programmes among its 32 Departments and 11 Schools are offered to over 81,000 students. 5,000 graduates are enrolled in PhDs and 3rd cycle programmes.

As a comprehensive research university Alma Mater invests in the multidisciplinary cross-cultural approach and in the inseparable connection between research and teaching. One of the most active universities leading and participating in European research and academic cooperation projects, Bologna has formed knowledge alliances with industry and public/private organizations. It is a hub of international networks. Beyond its close European links, it enjoys multiple connections with America, Africa, Asia and Australia.

Research and Innovation are a priority of the University mission.

With regard to Innovation, UNIBO filed 86 new patent applications in 2017, of which 25 are new registrations, thereby giving rise to an active patent portfolio of over 370 patents related to more than 140 inventions. It also has an active portfolio of more than 20 patented plant varieties, 80% of which are increased in value through active licenses with geographic coverage in countries in different parts of the world. UNIBO set up or accredited 27 spin-off companies up to 2017 and can also count Almacube, as business incubator that managed 15 incubated companies in 2017.

With regard to the capability of attracting funding for research and innovation, UNIBO is very active both at National and European level in all the research areas. Thanks to its scientific excellence and a central Research Development and Project Management support working closely, UNIBO has gained a considerable experience in International and European research projects, successfully participated in FP7: with 274 projects funded in 2007-2013; (58 of them as coordinator) and 87,8ML Euros of funding. In Horizon 2020, UNIBO is so far involved in 171 funded projects (43 as coordinator) with more than 64ML Euros of funding. UNIBO is also partner of the EIT Knowledge & Innovation Communities ("EIT DIGITAL", "Climate KIC", "EIT Raw Materials") and many of the most important EU initiatives related to the Horizon 2020 framework program (ie. ETPs, EIPs, JPIs, etc).

In the Social Science and Humanities area, UNIBO is among the top 5 universities with higher EU requested contributions in Societal Challenge 6 (Interim Evaluation of Horizon 2020 - SWD(2017) 221

final). Indeed, 12 projects have been funded under H2020 Societal Challenge 6 (4 of them led by UNIBO) for a total funding of € 3.8 M.

The University of Catania

The University of Catania is the oldest in Sicily, its foundation dates back to 1434.

It includes 17 departments, the Faculty of Medicine and two special didactic units established in the decentralized offices of Ragusa (Modern Languages) and Syracuse (Architecture). There are about 43,000 students enrolled at the University of Catania.

It also has the school of excellence "Scuola Superiore di Catania", a higher education centre created in 1998 to select the best young minds and offer them a course of studies including analysis, research and experimentation.

Catania University is the recipient of research funding at international and national level and it has a long-term involvement, both as a coordinator and/or a partner, in numerous programmes.

It participates actively to the Horizon 2020 Programme and to many other European programmes (LIFE Programme, INTERREG V-A, Italy-Malta Programme, ENI CBC MED Programme, ENI Italy – Tunisia Programme, ERA-NET Programmes, etc) and it has a huge number of scientific partnerships with European and third countries' universities, research organisations and enterprises.

University of Catania is strongly committed to implement European Union policies for the development of scientific careers and international mobility of researchers. Its International Research Office is, in fact, one of 17 the Italian Mobility Centres participating to the EURAXESS network which supports international mobility and careers' development of researchers.

Moreover, the University coordinates and/or participates to many Marie Skłodowska Curie projects related to RISE and ITN actions. In 2008, it was one of the three Italian Universities which organised the Researchers' Night, thanks to the SEER project funded by the Framework Programme 7. The event was successfully repeated in 2011.

Catania University pays a great attention to the exploitation of research results and its "CAPITT" specialised center supports patents and spin-offs.

The Department of Humanities

The Department of Humanities at the University of Catania, whose acronym is DISUM, has been established from a wide convergence of scholars from different areas such as Classics, Philology, History, Art, Philosophy, Education and Psychology.

It is committed to work in full harmony with the most recent cultures of modernity, while maintaining a constant relationship with history. It aims to foster a fair and productive dialogue between the different languages and methods of Humanism, as well as with scientific and technological cultures.

DISUM participates to many international and italian programmes and is regularly involved in cultural and creative actions and initiatives.

The Department has today 160 faculty members and it is located in the former Monastery of the Benedictines, that is a UNESCO World Heritage Site.

Organisation

The Faculty of Business Economics with seat in Košice of University of Economics in Bratislava (www.euke.sk) is one of the most important educational and scientific-research institutions in the Slovak Republic, especially in the region of east Slovakia. The Faculty of Business Economics is focused on variety of problems in innovation, knowledge transfer and regional development support in the field of innovation management, new promotional effective marketing tools, and emerging and perspective entrepreneurship ideas support.

Apart from more than hundred of domestic and international projects, the special attention of university is devoted to support the relations between university and companies, and between university and regions. In the last two years faculty cooperates with more than 30 significant companies (e.g. US Steel, s. r. o., Košice, Q-DAS GmbH KG, Germany, QBE Insurance (Europe) Limited, Robert Bosch, s.r.o., České Budějovice, VSE, a.s., Košice, SE- ENEL a.s. – Slovenské elektrárne, a.s.). Mentioned cooperation was mostly based on expertise of faculty in the areas like measurement systems, quality management, process improvement, and innovation based performance improvement. Project team of the faculty is continuously developing and consists not only from faculty members but from experts skilled in different socio-economic fields with extensive EU projects (H2020, FP, CE OP, SE OP, ...) experience such as experts within European Commission initiatives (managed by Empirica, GmbH), members of ISO committees for creation of international quality standards and so on. Experience and competence of project team rise from number of international projects. Few examples are: Euro-Healthy: "Shaping EUROpean policies to promote HEALTH equity" (H2020), e-coop Digital Cooperatives (INTEREG IV.C) EURODITE „Regional Trajectories to the Knowledge Economy: a dynamic model" (FP6), PREPARE „Priority European Programme in Advanced Regional Economics" (FP6), STRIKE „Science and Technology Research in a Knowledge-based Economy" (COST), DEN4DEK "Digital Ecosystems Network of regions for DissEmination and Knowledge deployment" (FP7), eBEST „Empowering Business Ecosystems of Small Service Enterprises to Face the Economic Crisis" (FP7), KNOWLEDGE TRANSFER STUDY 2010-2012 – analysis in the field of "Recommendation on the management of intellectual property in knowledge transfer activities and Code of Practice for universities and other public research organisations."(Tender of European Commission).

University of Graz

Organisation

Country	Austria
City	Graz
Street	Universitaetsplatz 3
Web	www.uni-graz.at

Person

Name	Robert Link
	Head of European Programmes, Law Faculty

Organisation

The University of Graz (UNIGRAZ) is an Austrian university under federal public law founded in 1585. It is one of the largest institutions of higher education in Austria (32.000 students/4.100 employees). The university is organized in six faculties (Theology; Law; Business, Economic and Social Sciences; Environmental, Regional and Educational Sciences; Humanities; Natural Sciences). The university has experience in all European programmes in research, education etc.

Our university is interested in being partner or coordinator in several calls related to migration, transformation and governance. In migration we can provide for example expertise in intercultural conflict resolution and related technical tools, in transformation and governance, we can provide ethical, sociological and legal expertise, in Governance13, we can provide expertise in comparing legal instruments in the EU related to IPR and copyright and give recommendations.

Among our institutes which will be involved are: The Institute of Legal Foundations (including "Law and ICT"), the Institute of Philosophy and the Institute of Sociology. In addition, the interdisciplinary research group "the Human Factor in Digital Transformation" is available for additional expertise.

Areas of Activity

- DT-MIGRATION-06-2018-2019: Addressing the challenge of migrant integration through ICT-enabled solutions
- GOVERNANCE-01-2019: Trust in governance
- DT-GOVERNANCE-13-2019: Digitisation, Digital Single Market and European culture: new challenges for creativity, intellectual property rights and copyright

Marketplace Opportunities

PROJECT COOPERATION

Governance 13 Dlgitisation, IPR, copyright

We are looking for partners

with expertise on social fairness, distributive justice, cultural anthropology, cultural sociology, Systems sciences/Impact measurement/assessment in the field of digitisation of culture/creativity non-academic partners/practitioners/associations in the profit or non-for profit cultural/creativity sector/industry with Practices, challenges, coping strategies, needs related to digitisation of cultural/creative Content (museums, libraries, platform providers, policy makers, film, video, tv, music, consumer organisations)

We would coordinate or provide as partner expertise in IPR law and copyrith and ist harmonisation

PROJECT COOPERATION

Trust in Governance

We would like to provide expertise in law, sociology, ethics/philosophy as partner in a consortium

PROJECT COOPERATION

Seeking partners with policy background in integration of migrants

We are suggesting innovative ICT-solutions for the integration of migrants. We want to strengthen the expertise of our consortium in the field of integration policies, policy needs, integration Scenarios and Practices from an academic, practitioner and policy Stakeholder (local, regional, national government) point of view.

The University of Oslo (UiO) is the oldest and largest university in Norway, situated in the Norwegian capital of Oslo. UiO offers 61 bachelor's and 105 master's programmes within eight faculties and two museums.

International cooperation has a long tradition at the University of Oslo. During the last years, we have seen increased interest in the EU's framework programme at the University. The number of projects coordinated by the UiO and the size of each project is on the increase. Every faculty at the University is currently active in H2020. The University of Oslo has received, as of October 2017, 550 projects from the European Framework Programmes from which 40 ERC projects. We have currently more than 100 projects in H2020.

The University of Santiago de Compostela (USC), founded in 1495, is one of the university institutions with a great tradition in Europe. In 2016, the USC was situated among the top ten Spanish universities in regards to their positioning in the different international (ARWU, QS, SIR, Reuters, Nature Index, Webometrics) and national (U-ranking) university rankings. It has developed a "Citizenship Campus" focused on social science and humanities research and teaching.

My research unit, ANTE (Territorial Analysis), is a multidisciplinary research group based at the Institute for Studies and Development of Galicia (IDEGA) of the USC. Equipped with the most modern infrastructure for social science research, IDEGA develops research and teaching with a cross-disciplinary and cross-national approach. Coordinated by prof. Rubén Lois, ANTE is composed by geographers, economists and historians with wide experience in the management of R&D projects, the analysis of socio-spatial and socio-economic dynamics, the drafting of scientific reports and the elaboration of teaching material. ANTE has developed research on cultural tourism in historic urban areas, world heritage sites, cultural itineraries and pilgrimage routes; on the recent socio-economic transformations of rural areas across Europe; and on urban rehabilitation and the impact of the financial crisis and the bust of the housing boom in Spanish urban and peri-urban areas. It is recognised as Research Excellence Group due to its dynamism and involvement in national and international networks of higher-education and non-educational entities such as technology and research centres, local and regional official institutions, firms or associations.

PROJECT COOPERATION

Project cooperation

Historical and contemporary studies of educational media, such as schoolbooks, readers, and digital media, can add valuable insight when it comes to understanding the societal value of culture. Faculty of Humanities, Sports and Educational Sciences would like to contribute in a consortium lacking expertise on educational media, and how educational media are dependent upon historical and cultural conditions.

Educational media are always products of the contexts in which they are embedded, just as they are dependent upon the historical and cultural conditions characterizing these contexts. We believe that educational media can be used as vehicles for understanding – among other things – national identity, thus also for understanding differences between the countries.

This corresponds to the call for 08-2019 The Social Value and the Impact of Cultural Policies in Europe. The research group on educational history and educational media at USN consists of 25 full-time academic staff, and represent an interdisciplinary research environment, covering textual and historical sciences. Several of the contributors are internationally acclaimed scholars.

PROJECT COOPERATION

Good vision and the impact on young people and children's ability to learn in a time of technological transformations

The Norwegian National Centre for Optics, Vision and Eye care (NCOVE) at the University of South-Eastern Norway are looking to contribute to a consortium that are in lack of the expertise on how vision influences the impact on young people and children's health and ability to learn when using technological devices.

Good vision is key for a child to succeed at school. It is essential for developing cognitive abilities associated with learning to read and write, and for sustained near work. The increased use of digital devices in education and everyday life increases the workload on the visual system.

NCOVE consists of 21 full-time academic staff and represents one of the best equipped eye care and vision science facilities for teaching and research in Northern Europe. NCOVE have expertise in development of vision and visual-motor skills and how these interact with health and learning in children aged 7 – 15 years.

PROJECT COOPERATION

The roots of the European identity in the Ancient times

The identity of Europe arose in the dialogue/ conflict / contact between cultures in the Mediterranean area in the ancient time, starting from wars between the Ancient Greek and Persians. Therefore, any discourse about the European identity cannot ignore this self-awareness starting point, as well as the transmission, contamination, cross-fertilization of knowledge, ideologies and beliefs between east and west, especially in the crucial phase of Hellenism.

A famous example is the idea of the "translatio imperii", i.e. the transmission of a fundamental institution that has shaped European history for centuries, enhanced the spreading of a common heritage and of ideas of boundaries and identity. The awareness of and the research on these historical roots of European culture and identity can help in interpreting present-day dynamics and contribute to assess the impact of cultural policies in Europe.

The team has expertise in Ancient Greek and Near Eastern history of first millennium BC, relationships between eastern and western Mediterranean countries and Europe and Asia, especially as far as communications and networks in antiquity, and transmission of cultural heritage are concerned.

The team carries out:

- Research on motifs, symbols, sites, monuments, institutions, texts, events of Ancient World that still represent testimonies recognized as universal patrimony
- Investigations on their value in a global perspective in antiquity, on the historical reasons of their value for later and especially contemporary phases.
- Investigations on the impact of their preservation and the diffusion of their knowledge for fostering the dialogue in multi-ethnic societies and between various countries on the basis of a shared past and the importance of a multifaceted cultural heritage as fruit of an interconnected historical development.

Team Members: Simonetta Ponchia, Luisa Prandi, Edoardo Bianchi.

Simonetta Ponchia is the chair of a network dedicated to the Heritage of Mesopotamia and the Ancient Near East called MELAMMU (www.melammu-project.eu).

PROJECT COOPERATION

Interdisciplinary research group on family diversity and social inclusion

DiFam is a multi-disciplinary research team (involving researchers in Psychology, Education, and Sociology) based in the Department of Human Sciences at the University of Verona. The team is specialized in LGBT+ families inclusion, their interaction with different social contexts, professional skills

for working with family diversity in education, healthcare, social work, and law practice.

It offers competences in:

- Multi-method research on the experience of LGBT+ families in constructing parental identity within the couple and family as well as through interactions with education, healthcare, social services.
- Research-based training for professionals (teachers, healthcare providers, family counselors, lawyers) about meeting the needs and respecting the specificity of LGBT+ households.
- Multi-method analysis of educational settings' inclusivity of gender and sexual diversity.
- Critical discourse analysis of the legal discourse on LGBT+ parenting and family diversity

The research groups coordinates or is member of several international training and research networks, as well in projects funded by Erasmus+ Programme.

Recent and current research projects :

- "FamilyLives Project", co-coordinator together with, in collaboration with UC Berkeley, USA (website: www.familylives.eu)
- "Doing Right(s). Innovative Tools for Professionals Working with LGBT families" (coordinator), funded by Erasmus+ (website: www.doingrights.eu)
- "LGBTQ-inclusive schools": approaches and practices of parent-teacher collaboration, funded by Fulbright grant programme
- "Legal recognition of same sex parents in Italy through special adoption. Analysis and implications for practice", funded by the University of Verona.

Research team: Federica de Cordova, Cristina Lonardi, Giulia Selmi, Chiara Sità

PROJECT COOPERATION

Digital native vs. digital immigrants: reading habits

The dichotomy "digital native/ digital immigrants" was introduced in 2001 by Mark Prensky with the assumption to describe the digital divide existing between young people and elderly. The metaphor has had enduring influence on how the educational system perceives students and technology.

Most scholars do not like it, for various reasons. Among other problems, the term implies that technological abilities are innate rather than taught and learned.

Massimo Salgaro - together with an international team - has carried out a study to examine if there is any empirical evidence to support the use of that metaphor. They looked at the reading preferences and reading habits of younger and older people in relation to literary reading on paper vs. on screen. The results clearly distinguish between two reading attitudes towards literary reading on screen: readers who have been using a digital device for longer than three years and readers who have used it for no longer than two years or who have never handled it. These two groups have very different experiences with the digital reading devices and distinct reading habits.

The results suggest that age is not the discriminant element for the classification in either of the groups. Consequently, the distinction between digital natives and immigrants, which is originally based on age, needs to be questioned, when it comes to literary readers.

He is also board member and treasurer of the International Society for the Empirical Study of Literature since 2015.

PROJECT COOPERATION

Law reserach team on migrant children

The University of Verona has developed a line of research in migration law from an international, European and domestic perspective.

In particular, the University of Verona has an expertise in approaching the question of migrant children in an overall view encompassing migrant families or unaccompanied minors that may either be asylum-seekers or require subsidiary and humanitarian protection, within a framework of reception and integration.

Besides the analysis of the Common European Asylum System, the main research areas include studies about the coordination between immigration rules, on the one hand, and private international law, labour law and the traditional institutes of the juvenile law, for the concrete implementation of the best interests of minors, on the other.

Research team: Alessandra Cordiano, Donata Gottardi, Maria Caterina Baruffi, Laura Calafà, Marco Peruzzi, Caterina Fratea, Daniele Butturini, Francesca Ragno, Isolde Quadranti, Camilla Federici, Diletta Danieli, Cinzia Peraro.

PROJECT COOPERATION

Anthropological and ethnographical researches with Roma and Sinti groups

Since 2012, the Verona University Department of Human Sciences hosts the interdisciplinary research centre CREAA (Centro di Ricerche Etnografiche e di Antropologia applicata, in English: Centre for Ethnographic Research and Applied Anthropology).

CREAA is a multi-disciplinary research team (involving researchers in Socio-Cultural Anthropology, Social Psychology, and Sociology).

Romani studies, and in particular anthropological and ethnographical researches with Roma and Sinti groups, as well as investigations on different forms of Anti-Gypsyism, are pivotal research topics for the CREAA.

Since 2012 CREAA organises a Permanent Seminar on Romani Studies and Anthropology (that was already active at University of Verona since 2005): this is a research group gathering PhD candidates and researchers from several Italian and foreign universities.

CREAA has been implementing many national and international research projects. In the following just the most relevant ones are mentioned:

- "The immigration of Romanian Roma to Western Europe: causes, effects, and future engagement strategies (MigRom)", funded by EU FP7 programme (ref. 319901);
- "WE: Wor(l)ds Which Exclude", funded by EU Fundamental Rights and Citizenship Programme (ref. JUST/2011/FAC/AG/2716);
- "Early Marriage between Dynamism of Social Network and Legal Autonomy: The case of transnational Romanian Roma"(NetRom), funded by EU Horizon 2020 Programme (ref. 794108).

For more information about the CREAA: <http://profs.formazione.univr.it/creaa/>

PROJECT COOPERATION

Developing interdisciplinary approach to health and safety for migrant workers

The LivingStone Project is coordinated by the Dipartimento di Scienze Giuridiche, Università di Verona (Prof.ssa Laura Calafà), the Dipartimento di Giurisprudenza, Università di Foggia (Prof.ssa Madia D'Onghia), the Unità Operativa Ospedaliera di Medicina del Lavoro, Azienda Socio Sanitaria Territoriale di Cremona (dott. Mauro D'Anna), the Dipartimento di Comunicazione e Ricerca Sociale, Università di Roma (prof.ssa Giovanna Gianturco) and the Dipartimento di Sanità Pubblica e Malattie Infettive Università di Roma (prof. Maurizio Marceca).

The project is intended to support the implementation and development of innovative strategies for the protection health and safety of immigrant workers employed in the agri-zootechnical sector. It aims to articulate a multidisciplinary (legal, medical and social sciences) model of intervention, in which the competences of the different actors involved in guaranteeing the enforcement of health and safety rules or otherwise interested in ensuring better health and safety conditions for migrant workers in the workplace are integrated.

From a legal point of view, the project includes an analysis of the legal framework concerning work in agriculture, the existing contractual/non-contractual types of work and their impact on migrant

communities, together with the system of legal tools for the prevention and repression of violations of health and safety rules. Such reflection is instrumental to a critical assessment of the role of law in relation to health and safety issues, on the one hand, as one of the factors contributing to the particular "vulnerability" of migrant workers, and on the other, as a means potentially able to challenge the systematic violation of health and safety rules and contribute to contain the risks migrant workers are subject to in the workplace.

The project ultimately aims to explore the conditions (legal and non legal) under which law can be more effective in ensuring better protection for the health and safety of migrant workers and the way in which law can assist non legal actors as part of a broader strategy for better health and safety in the workplace.

PROJECT COOPERATION

Corpus Linguistics, Cultural Heritage and Digital Humanities

In the framework of a Programme for the excellence of research funded by the Italian Ministry of Education, University and Research, a wide group of researchers is carrying out a series of investigations in the field of digital humanities and notably in linguistics.

The following research topics are relevant for the topics DT-TRANSFORMATIONS-11-2019 and TRANSFORMATIONS-04-2019-2020:

- (a) phenomena of linguistic-cultural contact, with specific reference to the relationship between modern European and eastern languages; for this purpose, a digitised corpus of texts taken from different types of media (offline and online) and published between 1800 and 2015 in different languages will be prepared;
- (b) analysis of sectoral languages, with specific reference to the legal, political, economic and tourist fields; this will allow the creation of dictionaries, glossaries and terminological guides necessary for teaching and for experts in the various languages of reference (Chinese, English, French, Spanish), as well as for the common user in the wider society, who may be in contact for various reasons with these specific sectoral languages;
- (c) study and preservation of minority languages (German communities in Romance areas); for this purpose, it will be necessary to set up dedicated software and a platform specifically designed to collect unique databases by eliciting data using innovative crowdsourcing techniques.

In order to carry out the above studies, it will be essential to create computerized databases and related analysis software that allow the mapping of conceptual and terminological networks in an automated way. Moreover, with regard to crowdsourcing, this is a research methodology that is only possible through a dedicated technological platform, which allows the transition from unidirectionality to bidirectionality of the use of the network, as it makes civil society, which in the academic context usually has a passive role, an active participant in the scientific process. By becoming a subject aware of the linguistic variation that surrounds him/her, the speaker will become aware of the richness that variation entails and will be led to strengthen and enhance his/her own linguistic and cultural identity.

University of Warsaw

Organisation

Country	Poland
City	WARSZAWA
Street	Dembego, 12
Web	https://www.ce.uw.edu.pl/en/

Person

Organisation

The Centre for Europe is an integral part of the prestigious and historical University of Warsaw. It is one of the oldest and of the most widely recognised facilities in Poland (as well as in Eastern and Central Europe) representing an interdisciplinary approach to broadly understood European Studies. Thus, our area of research and didactic work includes political studies, legal and socio-economic matters, and cultural issues in internal, regional, external and global dimensions. Our activities are also focused on publishing periodicals, textbooks and didactic materials.

Areas of Activity

- MIGRATION-01-2019: Understanding migration mobility patterns: elaborating mid and long-term migration scenarios
- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- DT-MIGRATION-06-2018-2019: Addressing the challenge of migrant integration through ICT-enabled solutions
- MIGRATION-07-2019: International protection of refugees in a comparative perspective
- DT-TRANSFORMATIONS-02-2018-2019-2020: Transformative impact of disruptive technologies in public services
- GOVERNANCE-02-2018-2019: Past, present and future of differentiation in European governance
- SU-GOVERNANCE-10-2019: Drivers and contexts of violent extremism in the broader MENA region and the Balkans

Web	https://www.univ-montp3.fr/

Person

Name	Florent GOIFFON
	EU project officer / French NCP for SC6 & SSH

Organisation

The University Paul-Valéry Montpellier is specialising in social sciences and humanities: French and foreign languages and literature, linguistics, educational sciences, cultural studies, arts (inc. video games), art history, history, classical studies, archaeology, egyptology, geography, environment, ethnology, psychology, management, communication...

It recruits annually 21,000 students (of which 18% are international students), including 750 PhD students. The university staff is composed of 700 teachers and scholars, and 620 administrative, technical and library staff.

Scientific activities are led by 20 research units and are built around 2 main domains: Languages, Literatures, Cultures, Civilizations and Territories, Time, Societies and Development.

The UPVM research expertise is recognised in both leading fundamental research in SSH and interdisciplinary projects addressing societal challenges. Over the last years the university also invested with the success the high potential field of the digital humanities.

Areas of Activity

- MIGRATION-03-2019: Social and economic effects of migration in Europe and integration policies
- TRANSFORMATIONS-03-2018-2019: Innovative solutions for inclusive and sustainable urban environments
- TRANSFORMATIONS-04-2019-2020: Innovative approaches to urban and regional development through cultural tourism
- DT-TRANSFORMATIONS-07-2019: The impact of technological transformations
- DT-TRANSFORMATIONS-11-2019: Collaborative approaches to cultural heritage for social cohesion
- TRANSFORMATIONS-17-2019: Societal challenges and the arts

- on children and youth
- TRANSFORMATIONS-08-2019: The societal value of culture and the impact of cultural policies in Europe

Marketplace Opportunities

PROJECT COOPERATION

Arts Creation Transmission Transformation

A team of experts in arts theory and practices (theatre, film, literature, creative writing, video/critical games...) and cultural studies from the University Paul-Valéry Montpellier (France) is leading an application to the call TRANSFO-17-2019 "societal challenges and the arts" with the project ACTT - Arts Creation Transmission Transformation.

ACTT aims to think out the new relationship between Arts and Society which has developed since 2000 in European urban and peri-urban areas. To do so, the project intends to analyse contemporary artistic practices that manage to address major societal challenges (social cohesion, climate change, intercultural dialogue, migration) while successfully involving audiences familiar or unfamiliar with the arts.

ACTT combines a bottom-up approach based on observation and analysis of artistic projects and productions across Europe (case studies), with innovative and transdisciplinary conceptual and methodological tools from a broad range of social sciences and humanities disciplines (history, sociology, philosophy, politics, cultural studies, ethics ...) and the support of structures (networks, associations, platforms...) for artists and artistic creation.

We are looking for academic partners in the following fields of expertise:

- Sociology / ethnology / psychology: surveys (cultural surveys?) On the perception / reception of art, analysis of the impact of artistic projects
- Political scientists specialised in public policies (in the field of arts and culture), their evaluation. In the context of ACTT we will be interested in how artistic commands are decided and how they are funded
- Specialists in arts and sciences
- Ecologists interested in human-environment interactions, ecology and society
- Geographers, urban planners interested in art in the city, the role of art and culture in the city, territories

PROJECT COOPERATION

Social and economic effects of migration in Europe and integration policies

GROUPE SOS has been created 30 years ago with the aim to struggle against any kind of exclusion. Its mission: enabling everyone to access good quality services fulfilling their basic needs, whatever his/her background or livings are. Through a myriad of activities, it provides a response to today's society needs within eight sectors: youth, employment, solidarity, health, elderly, culture, environmental change and international action. Gathering 17 000 workers and 495 structures and services, GROUPE SOS range up to the first European social enterprise.

GROUPE SOS advocates for migration as a chance for Europe, thus implying a collective thinking so as to plenty grasp all the related issues at stake. Thanks to its expertise and the collective effort of its professionals, GROUPE SOS aims to play a major role to address this challenge (...)

GROUPE SOS aims to integrate as a partner a consortium applying to the call MIGRATION-03 "Social and economic effects of migration in Europe and integration policies".

The expected results of GROUPE SOS's participation in such project are to deepen the analysis of the different integration models in Europe, highlight good practices in the European territory in social inclusion of migrant population, improve the functioning of migrants' accompaniment structures and to propose innovative projects through the cooperation between operating stakeholders.

Through the wealth of its services and the elaboration of reporting tools, GROUPE SOS have access to a broad range of data willing to be better emphasised. GROUPE SOS is also looking to recruit a researcher/analyst in order to gather and analyse data from all the chosen structures.

This Call is a unique opportunity to cooperate with the academic sector and operators at a European level. Seeking to place the individual and her/his capacities at the heart of research, GROUPE SOS is looking forward to work specially with associations developed by Diasporas

PROJECT COOPERATION

State of the Art related to the integration of migrants in Europe

The Migrations and Society Research Unit (URMIS) is specialised in the study of migrations, ethnicity and integration the universities. The laboratory unites Paris Diderot and Nice Sophia Antipolis with the Institut de recherche pour le développement (IRD) and the Centre national de la recherche scientifique (CNRS). URMIS brings together not only research groups located in Paris and Nice, but also researchers from a variety of disciplines (sociology, anthropology, political science, social psychology, history). The empirical research conducted in the different programmes of the research unit enables debate and comparison of theoretical and methodological concerns related to the integration of immigrant populations, the management of immigration issues by institutions and political parties, the creation of transnational migratory spaces, and the cultural dynamics in multiethnic societies. The mutual orientation of the research unit repudiates any essentialist approach toward national, ethnic or cultural groups, which are clearly situated as historical and social constructions. It accentuates the institutional and interactional processes through which collective identities are produced, maintained or transformed. The research scope covers fundamental theoretical questions in the field of social sciences: the symbolic construction of collective identities, the analysis of the social processes of discrimination, the mechanisms of social categorisation, and the production and usage of categories of otherness.

Also, URMIS has developed a Specialised Master in Migration Studies in order to train future professionals. <https://master-migration-studies.com/>

Finally, URMIS is in the process of joining the International Migration, Integration and Social Cohesion (IMISCO) network.

PROJECT COOPERATION

VIEW-Visual Imaginaries and Educational Worlds: project-development through cultural tourism

The VIEW (Visual Imaginaries & Educational Worlds) focuses on the intersection between tourism and fiction and will research literary and screen tourism as a means to develop inclusive practices and a more sustainable economic and social development. The VIEW consortium (10 countries) is academically balanced (humanities and management) but there is a need for additional NGO partners (tourism, publishing, film, more generally fiction: festivals, municipalities, associations of writers, writers' houses, etc.) to supplement our expertise to work on specific case studies.

PROJECT COOPERATION

Specialists in Homeschooling/Unschooling/Home Education seeking for consortium/coordinator

University of Paris Seine / Cergy-Pontoise

Education research lab

In our ANR (the French research agency) research group, our sociological empirical inquiries focus on people who choose to avoid public education and prefer to deliver home-made education (so to say). As a matter of fact, these homeschoolers' behavior reflect specific relationships towards social institutions. It is very interesting to research the way they understand public goods and regulation, and conversely to research the way public authorities regulate these population. At the moment, I am leading a French research group who is focusing on the French case, but we are already considering building an international consortium in order to design comparative studies.

Maria Curie-Skłodowska University is a state institution of higher education established in Lublin, Poland in 1944. As the largest university in Eastern Poland it offers academic programs at undergraduate, graduate and doctoral levels with over 50 fields of studies at currently 11 faculties. It has over 23,000 students and 1700 academic staff. Maria Curie-Skłodowska University conducts research and development activities and actively participates in various international programmes such as Framework Programmes, Erasmus +, US Embassy Grant programmes, Polish-Swiss Research Programme, Polish-Norwegian Research Programme to mention just a few. One of the top priorities of MCSU is to increase the number of projects and funds obtained from national and international initiatives of and outside the EU. Since 2004 over 140 international research projects were successfully implemented at the institution with a strong view to strengthening the university's research and development capacity.

VILABS is an SME that acts both as a private research and innovation laboratory and as an innovation Hub for startups. VILABS provides a wide range of research, development and consulting services to national as well as international enterprises and organisations, utilising a unique set of tangible and intangible resources, including knowledge, facilities, human and financial resources, supporting researchers and entrepreneurs to innovate. VILABS is active in the sectors of political sciences, social innovation and entrepreneurship through all stages of Research, Technological Development and Innovation. Through the extensive experience of its personnel it provides:

- Evaluation and Impact assessment services (using quantitative and qualitative data analysis tools), considering economic, technological, political and social parameters.
- Business services (business deployment, exploitation planning, early marketing) helping research outcomes to enter the market;
- Entrepreneurship and innovation support services to scientists, technological start-ups and social entrepreneurs;
- Training for start-ups to boost their potential for entering the market through the organisation of workshops and mentoring and coaching events.
- Management services (Project management, advisory services, budgeting and financial management);

Recently, VILABS has established this new branch in Cyprus that carries the experience and the know-how attained in VILABS Greece, giving the opportunity for widening the range of the company's activities, extending the geographical coverage of the company's services from the Balkans to the Eastern Mediterranean and developing new strong partnerships.

VILABS employees are of high-skills and experience (political scientists, economists, social researchers and IT specialists) with more than ten years' experience in socioeconomic research and analysis, policy analysis, geostrategic analysis, data analysis, project management, dissemination, business deployment and exploitation, technology and market assessments, evaluation and Impact assessment. Company's expertise and professional competence lies in the fields of International relations, Theories of Globalization, European Studies, European integration theories, Contemporary European History, Policy analysis, data analysis, and in the analysis of the political and geostrategic problems which are emerging and occupying the modern world. VILABS capitalizes its workforce's experience, gained from:

- the long experience on the leadership of project management (administrative and financial) dissemination, exploitation, communication and evaluation tasks in European (FP7, CIP) projects and

studies, as well as national funded projects

•developing various open innovation approaches with the scope of supporting startups, bringing together business, universities, civil society and government to work together towards joint projects.

VILABS is a member of the European Business & Innovation Centre Network (EBN), the largest network of Innovation centers in Europe and has around 150 business and Innovation centres and 100 organisations that support the development of innovative entrepreneurs, start-ups and SMEs.

Organisation

The Vlaamse Radio- en Televisieomroep (VRT) is the public broadcaster of the Flemish Community in Belgium. Its mission is to inform, inspire and unite and so reinforce Flemish society. As a service providing organization, the VRT wants to take up a special position in society. The VRT strives for a large audience, not so much to gain a high market share, but because it wants to be relevant to as many Flemish people as possible. This is the most important charter of the public broadcaster, i.e. reinforcing democracy and society by contributing to a social and pluralistic debate, documenting society and stimulating culture and language and Flemish society in all its diversity. VRT owns 3 TV channels (Eén, Ketnet, Canvas), 5 radio stations (Radio1, Radio2, Klara, Studio Brussel and MNM) and several online platforms (vrtnws.be and sporza.be) focusing on news and sports. Furthermore, VRT has a full range of digital products, including a video platform (vrtnu.be) and a set of digital radio apps (radioplus.be).

The innovation department of VRT follows technological and societal evolutions to help build the future of media. This includes more immersive viewing experiences, personalised radio, and innovative news and programme formats engaging communities everywhere and at all times, customized to the right platform and user context. In collaboration with European research institutes, technology companies and media organizations, the team carries out research projects of two to three years long on the creation, management, distribution and consumption of media content. The interdisciplinary team consists of more than 20 highly qualified researchers with an expertise in many facets of media production and media management. This team is often complemented with VRT professionals from the creative domain to establish a link between the research project and the production floor. VRT innovation shares its expertise, insights and products with the wider media landscape via its communication channels and events.

Vytautas Magnus University (VMU), established in 1922, re-established in 1989, is a classical university of Liberal Arts engaged in providing education at the university level, conducting research, and developing applied research and arts activities. VMU ranked as the TOP 700 university in QS University ranking, is a classical university of liberal arts with over 9000 students, 10 faculties, Music Academy, World Lithuanian University.

VMU offers 90 degree programmes, 26 BA and MA full-time degree programmes in English. It collaborates with over 370 universities around the world, member of international networks and organizations (EUA, EAIE, EDEN, BSRUN, AABS, IEEE, AMS, NISPAcee, ECPR, etc.). VMU develops researches organized on a cluster basis. Currently 39 research clusters are active at VMU. VMU also offers doctoral studies in 18 scientific fields, based on joint and interinstitutional PhD studies. The university has bilateral agreements with 140 universities in 30 countries around the world; Erasmus agreements with 161 partners in 28 European countries. The university has developed Lithuanian Diaspora Academy (with diaspora in US, Poland, Russia, etc.). Each year a number of international and regional research conferences, workshops and seminars are organized. International relations are established by projects and networks (thematic research and study), international summer schools, by developing joint and double degree Master programs (Baltic studies with Bocconi University, in Finance and in Marketing with Louvain Catholic University, Law with Texas Tech University, etc.). International study networks and IP programs (e.g. Campus Europae, AFECA) allow university and its 10 faculties to expand its scope internationally. The university is actively developing innovations in education and research, develops strong business partnerships with leading Lithuanian and global companies. VMU is the institution which develops plurilingualism in the most efficient way in Lithuania. VMU Institute of Foreign Languages (IFL) offers the range of over 30 languages to students, VMU academic and non-academic community and city residents.

VMU is currently conducting about 100 projects in the fields of biotechnology, biophysics, technology law, education, sociology, philosophy, computational linguistics, language acquisition and bilingualism, creative industries, and others. Researchers of VMU have been engaged as a partners and coordinators in various Horizon 2020 (5 projects at the moment), Jean Monnet, COST, Erasmus+ and NordPlus programmes, as well as research projects within the Global Grant and Smart Specialisation programmes conducted by the Research Council of Lithuania and the European Structural Fund.

Organisation

Established in 1922 (re-established in 1989) Vytautas Magnus University (VMU) is the public institution implementing liberal arts study policy based on the Harvard study model and relevant research activities aimed at contribution to the society, as well as global community. Aside from 26 BA and MA full-time degree programs in English, together VMU offers over 100 study degree programs, as well as integrated studies of law and postgraduate and doctoral programs for almost 6500 students. The University offers doctoral studies in 18 diverse fields of Humanities, Social, Physical and Biomedical Sciences. In VMU the research capacity is achieved by uniting scientific human resources under the thematic clusters seeking to assure the interdisciplinary approach, broad scope, high impact, accessibility of research outcomes. VMU has been involved in H2020, COST, Erasmus+ and Nordplus activities as well as national ESF projects as a project partner or coordinator (about 100 EU projects in the fields of biotechnology, biophysics, creative industries, law, education, sociology, psychology, computational linguistics, language acquisition and bilingualism, etc.), therefore the scientists have accumulated solid experience in international scientific research and project management.

WeDo is a company specialized in the management and communication of international, complex, and distributed research and innovation projects based in Barcelona. WeDo works with a miscellany of stakeholders from both public and private sectors, applying a strategic, holistic, and lean project management approach to create an effective collaborative framework for results-driven decision-making and performance.

WeDo leverages on the expertise of a multi-disciplinary team of highly skilled and experienced professionals, with complementary backgrounds and a track record of 14 years in international collaborative projects, with special attention to EC-funded projects since FP6 (including ICT, HEALTH, ENVIRONMENT, NMP, IMI-JU, SSH, SWAFS), among other programmes and funding schemes. WeDo professionals are an asset for the strategic planning, the project management, the financial and legal assessment, the exploitation and IPR management, the knowledge management, the business and sustainability planning, and the design and implementation of dissemination and communication strategies of projects. As a result of working over many years with companies, research centres and universities in the Health sector, this team has a track record in the valorisation of research results and innovation processes arising from patient data-related projects.

Yeditepe University/Istanbul University

Organisation

Country	Turkey
City	Istanbul
Street	
Web	https://www.yeditepe.edu.tr/

Person

Name	Turaj Aliyeva
	University Lecturer, PhD candidate

Organisation

Our university was founded in 1996 by the Istanbul Education and Culture Foundation (ISTEK). In line with Atatürk's principles and with the contribution of a pioneering and distinguished academic and administrative staff, Yeditepe University aims to educate students who are inquisitive, innovative, well-equipped with technological skills, well-versed in world culture, have a solid identity, and are equipped with all the qualifications required by the business world. With its up-to-date academic programs and training, Yeditepe University offers an education compatible with the expectations of the information age.

Yeditepe University carries out its academic activities via 3 departments at the School of Applied Sciences, and 13 faculties namely the Faculties of Dentistry, Pharmacy, Education, Arts and Sciences, Fine Arts, Law, Economics and Administrative Sciences, Communication, Engineering, Architecture, Health Sciences, Medicine and Commerce, entailing 64 undergraduate programs. The university also offers 86 MA and 41 PhD programs in the Graduate Schools of Atatürk's Principles and History of Revolution, Educational Sciences, Science, Health Sciences, and Social Sciences. Since its establishment, Yeditepe University, whose language of education is English, has been preparing young people for life from all over Turkey on the 26 Ağustos campus.

Yeditepe University offers education on the "26 Ağustos" campus that is designed to meet the requirements of students for education, culture, art, sports and a spectrum of various needs. The 26 Ağustos campus is located on the Asian side of Istanbul with its own architecture on the skirts of the Kayışdağı hill, with an area of 125 thousand square meters and a closed area of 223 thousand square meters. Inspired by Seljuk Architecture, the 26 August campus consists of educational buildings and social facilities and they are surrounded by two separate student dormitories with a total capacity of 4,250 students.

Voted first among private universities in Turkey by Green Metric which is an international platform for sustainability and environmental awareness and determines the greenest universities in the world, Yeditepe University is the only university in Turkey that can produce its own energy with a solar energy system that is built on a roof in the campus. The system, which has the largest roof application facility in Istanbul, has a capacity of 1 MW and used 3850 Axitec panels and a Hawei inverter. At the same time, the university has started work on a wind energy investment of 350 KW in Şile. The solar energy panel works will continue until 10 MW is reached.

Since its foundation in 1911, Yıldız Technical University has always been a dynamic institution of higher education. Department of City and Regional Planning has been structured first as a graduate program in 1973 and re-organized in 1982 as the first full department in "planning" among other Istanbul universities. The department has its strong planning education background in both planning theory and practice through worldwide scientific knowledge. Currently, 41 academic personnel are engaged within the department under two divisions: city planning and regional planning. As of 2018, the department has 375 undergraduate and 276 graduate students in the education system. Many international and national funded research projects are carried out at the department.
