

**Project idea/ Field of expertise:**

Predictive maintenance software for SMB's

**Organisation Name:**

Valuable Data

**Adressed challenge(s)/ PPP(s):**

Risk mitigation, manufacturing production failure anticipation

**Adressed topic(s) in Work Programme:**

Integration of our software in a global value chain and in collaborative/cooperative programs with suppliers for the manufacturing industry (SMB's)

# Our project idea / expertise

Our concept : Predictive maintenance to support our customers to ...

Manufacturers with critical assets on their production lines

Manufacturers producing assets carrying sensors

1

## Reduce downtime

Risk mitigation

Turnover

Margin

Customers' loyalty

2

## Monitor critical assets

Market share

Recurring turnover

Différenciation vs competition

Customers' loyalty

3

## Bring services to their customers

Data becomes value

Catalogue optimization and improvement

Recurring turnover

Customers' loyalty

New Business Model

New Business Model

# Valuable Data

-  **1 Industrialized predictive maintenance software for SMEs**
-  **2 Built with and for our customers**
-  **3 An existing track record in the rubber & plastic industry  
But not only...**
-  **4 A strong will to partner with assets manufacturers  
(common benefits)**
