BioHorizon project is funded by the European Commission - Grant Agreement no. 652637

#BioBrokerage

The challenge of the consortium will be the transition from fossil-based European industries towards low carbon, resource efficient and sustainable **transformation of conventional industrial processes and products into environmentally friendly bio-based ones, the development of integrated bio-refineries and the opening of new markets for bio-based products for the value chain on ice-cream production. A bio home made ice cream is ready to enter the market.**

A transition is needed towards an optimal and renewable use of biological resources and towards sustainable primary production and processing systems. These systems will need to produce more food, fibre and other bio-based products with minimised inputs, environmental impact and greenhouse gas emissions, and with enhanced ecosystem services, zero waste and adequate societal value.

The investments in research and innovation under this **societal challenge** will support Europe in contributing to food security, climate protection and sustainability. It will also enable Europe to take leadership in the concerned markets and will play a role in supporting the goals of the Common Agricultural Policy, the European Bioeconomy Strategy, and more broadly of the Europe 2020 strategy.

Expertise of SRI GROUP EUROPE Sprl

Potential contribution to a consortium

Thanks to our expertise in consultancy in the agriculture and agriculture production field, SRI GROUP EUROPE Sprl can contribute to securing sufficient supplies of safe, healthy and high quality food and other bio-based products, by developing productive, sustainable and resource-efficient primary production systems, fostering related ecosystem services and the recovery of biological diversity, alongside competitive and low carbon supply chains. A strong consultancy support together with an equity intervention, real characteristic of SRI GROUP will accelerate the transition to a sustainable European bioeconomy, bridging the gap between new technologies and their implementation.

A consortium under «*enterprise network legal status*» has been founded in Sicily with the support of Sicilian Region, Agriculture Department.

**An ongoing project has been presented under the topic CE-SFS-24-2019 [Sustainable Food Security]
International partners in the agriculture food chain are required for the dissemination of the project**

Keywords

Transformation, bio-based friendly, new markets, bio-based products
