Innovative and sustainable agri-food chains

Soumya Kanti Datta
Digiotouch OU, Estonia
Objectives

• Deep insight into linkages and interactions between agri-food chain stakeholders
• Identify incentives, barriers, strategies and digital technologies to overcome them and leading to a circular economy
• Social innovation through creation of favourable conditions for cooperation, co-creation and innovation within agri-food value chains
• Sustainable digital transformation in European agri-food chains to increase their competitiveness, resilience on EU and international market

Current consortium: Digiotouch and a potential partner from Denmark

Looking for consortium partners

• Coordinator, research on social innovation, agri-food chain stakeholders, bioeconomy research, associations/clusters connecting with end-users
Expertise of Digiotouch

- Secure, sustainable digitalisation through Information and Communication Technologies (e.g. Cloud, IoT, Blockchain)
- Identification of incentives, barriers, strategies and digital technologies leading to a circular economy
- Development of new business models and better performing value chains
- Dissemination, communication, liaising with policy makers & regulatory bodies
- **Keywords**: digital transformation, healthcare, cybersecurity, standardisation in ICT
