

**A CONCEPTUAL FRAMEWORK ON KNOWLEDGE  
TRANSLATION AND HEALTH INFORMATION  
TECHNOLOGY FOR TRANSPARENCY & EVIDENCE-  
BASED POLICY-MAKING (EU-KhITT FRAMEWORK)**

**Anastasia Mallidou, RN, PhD**

**University of Victoria, British Columbia, Canada**

# Organization

#H2020PartnerHealth

- University of Victoria – Public academic institution
- Canada (British Columbia, Vancouver Island)
- School of Nursing
- Expertise of the department: Knowledge translation activities for evidence-based practices
- First time applying for a EU-funded research project

# Our project idea / expertise

#H2020PartnerHealth

- **Description of our project idea**

- **Project proposal title:** Perspectives and experiences of policy-makers, researchers, health-information technology professionals (HIT), and the public on evidence-based health policies (the EU KhITT study)
- **H2020 topic to be addressed:** Digital transformation in Health and Care: Innovative digital solutions for people-centered care - Implementation research
- **Project description (brief):** To support strong relationships between researchers and policy-makers for engaging communities for transparent, system-based knowledge dissemination and evidence-based health policies (EBHPs). Objectives: to explore key stakeholders' perceptions, perspectives, experiences on EBHPs; and understand their expectations & insights.
- **Current consortium:** None yet
- **Profile of the partners sought:** Researchers interested in EBHPs & HIT experts employed in health organizations as co-investigators or advisors.

# Our project idea / expertise

#H2020PartnerHealth

- Description of what I can offer to other proposals
