- USN is partner/coordinator in several Horizon 2020 projects, eg HARMONIC

# Our project idea / expertise

#H2020PartnerHealth

- Description of what you can offer to other proposals
  - Implementation research for scaling up and transfer of innovative solutions involving digital tools for people-centred care. We focus on person-centred innovation at the intersection of healthcare, digitalization and technology.
  - We offer robust research team and are happy to be WP leader in a consortium developing PCC digital health solutions.
  - Established strong national and international collaboration partners

Person-centred healthcare research is research taking the needs and values of the individual person as point of departure, it be on individual, interdisciplinary or organizational and systems level
