

Chem-Match: Corporates meet Start-ups

Company Mission for Start-ups in the Chemical Industry

10-11 October 2019, Frankfurt/Main, Germany

The chemical industry faces diverse challenges these days. Issues like digitisation, process improvements or ecological responsibility shape a new operation setting for companies. The pressure to innovate is high while the time needed stays an obstacle. Ambitious corporates rely on cooperative approaches to innovate. They use the dynamics in the start-up scene to speed-up their research and development efforts.

The Chem-Match: Corporates meet Start-ups brings impetus to the chemical open innovation. We match corporates with start-ups from the fields of chemistry, biotechnology, bioelectronics, digital process management and digital innovation.

The Chemical Innovation Exchange CIEX, the German Startups Association, the Industry Park Höchst and the Hessen Trade & Invest GmbH with the Enterprise Europe Network offer a **two-day event format for meeting and discussing about corporate- startup collaboration.**

Start-ups and Scale-ups,

use the b2b meetings and the conference agenda at the CIEX Europe 2019 conference on 10 October and the start-up pitching event on 11 October to interconnect with industry partners.

Corporates,

meet innovative and agile start-ups during the b2b meetings at the CIEX Europe 2019 conference on 10 October to find new partners and drive your open innovation.
