

Session 1B/2B : Flash Project idea
Presentations - SC5

Designing circular systems in furniture sector

Dr. Kati Manskinen

Lahti University of Applied Sciences, Finland

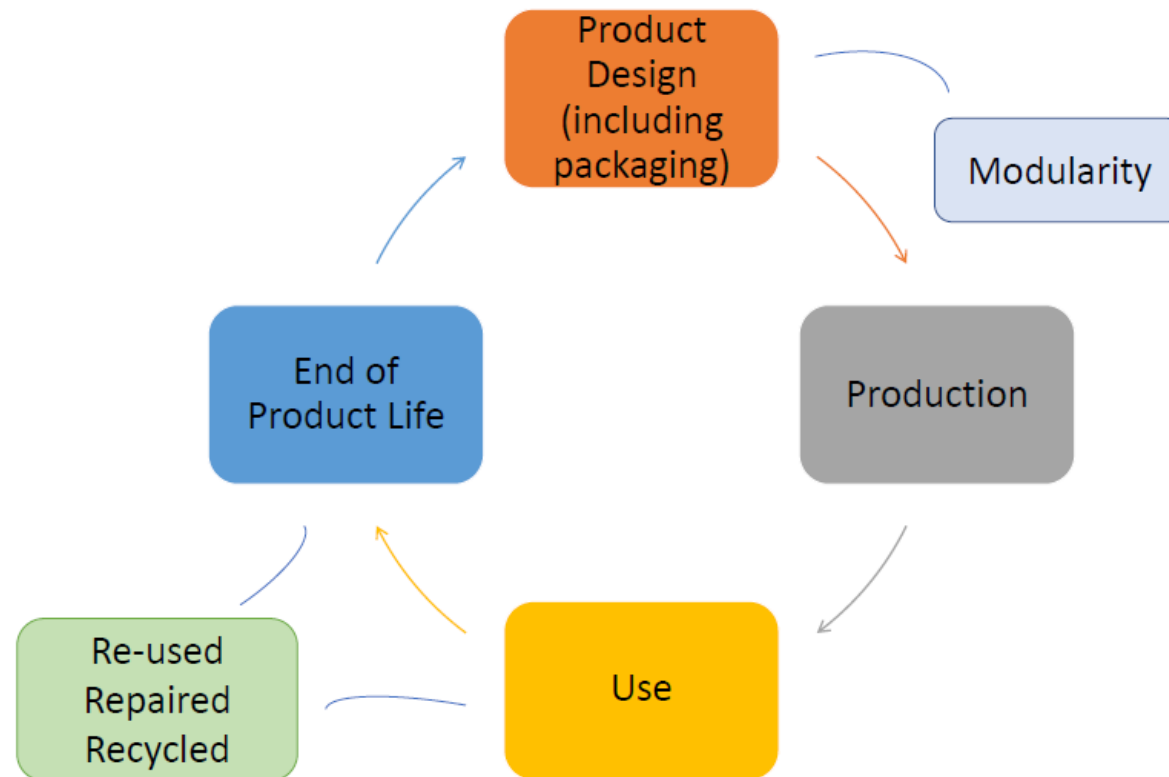

Topic and project idea

Develop and pilot circular systems in plastics, textiles and furniture sectors ID: CE-SC5-28-2020

- The objectives of the project proposal; designing circular systems in furniture sector
- Looking for a consortium to join
- Requirements for the other partners e.g. material/product producers, collection/sorting/recycling organisations

Expertise

LAMK

Lahden ammattikorkeakoulu
Lahti University of Applied Sciences

Our potential contribution to a consortium

- Expertise possessed
 - Circular design on furniture and on packaging
 - Interior Architecture and Furniture Design expertise
 - Concept design for furniture manufacture, sale and delivery systems
 - Service design for Platform strategies and ecosystems
 - Test and demonstrate circular solutions
 - Circular Economy expertise
 - Accredited furniture lab in use
 - Textile fiber recognition using optical method
 - Environmental impact tools e.g. LCA
 - Data management system
 - Partners from furniture manufacturing
