CREATING AN AGILE PLANNING ENVIRONMENT FOR INDUSTRIAL SYMBIOSIS

Ansgar Rudolph
Chemie-Cluster Bayern GmbH (CCB)
Project idea

Topic: CE-SC5-25-2020: “Understanding the transition to a circular economy and its implications on the environment, economy and society”

Planned opening date: 12 November 2019 | Deadline 1st stage: 13 February 2020 | Deadline 2nd stage: 03 September 2020

The challenge

- Symbiotic synergies often require cross-sectoral on-site developments (building, technology)
- Complex regulatory framework inhibits implementation of symbiotic synergies
- Regulatory administrations (urban development, environment) are reluctant in decision-making, being faced with new and complex planning situations

Towards a solution

- Analysis and comparison of legal and administrative situations in various EU countries
- Collection of best practices
- Creation of a manual for agile planning procedures
- Creation of a network of experts for technical consultation
- Creation of an IT-based evaluation and forecast tool

Industrial Symbiosis

**Expertise**

**EU project management skills:**
- Coordination of application
- General project management
- Exploitation & dissemination
- Surveys & field studies

**Green Economy**
- Sharebox
- Industrial symbiosis
- Bio-based economy

**Spatial development**
- Regional Governance
- Regional development strategies & tools
- Industrial site development

**Network of experts and stakeholders**
- Clusters and industrial parks of the process industry
- Scientists and practitioners in urban and environmental planning
- Experts from industrial parks and industrial zones
Contact details

Dipl.-Ing. Ansgar Rudolph  
**Head of Internationalization & Business Development**

Chemie-Cluster Bayern GmbH  
Schwanthalerstrasse 100  
D-80336 München/Munich
