Wild Tech at your service?

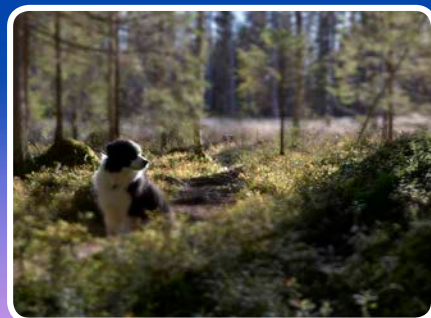

Kainuu - Smart Technology
and Well-being near
the Nature

Take your chance on the new business of the Kainuu region!

Industrial Transition collaboration in East and North Finland is about developing new procedures based on smart specialisation that support industries and employment. By working together with the seven regions we will promote the regional strengths and competences of the East and North Finland, both nationally and at EU level.

New business models and skills are emerging in the smart ecosystems among wood production industry, ICT, bioeconomy, sustainable energy, tourism and metal industry.

The sustainable use of nature resources and smart technological solutions promote growth and well-being in the entire Kainuu Arctic Lakeland!

The East and North Finland in Industrial Transition –project works for smart specialisation priorities such as: Clean technologies and low-carbon solutions, Industrial circular economy, Digitalisation, innovative technologies and production processes and development of joint cluster networks.

The Smart specialisation strategy in Kainuu enhances:

- Future jobs
- Expanding innovation activities
- Promoting entrepreneurship and SMEs
- Moving toward low-carbon energy

COMMON COMPETENCES

Supporting sustainable development and increasing the degree of processing

GROWTH SECTORS

East and North Finland's thematic strengths in smart specialisation
