

Track 2: Smart Manufacturing – Session 2c (12 NOV 20)

What will digital intelligence bring in the future?

Artificial intelligence holds potential for sustainable leaps in efficiency in many areas. Existing methods, processes and products are often sustainably improved by artificial intelligence technologies. However, new products, methods and services that were previously not possible in this form are also emerging.

Moderation:

Marc Koch, Southwest Broadcasting (SWR) (confirmed)

3:30 – 3:45 p.m.

Presentation 1 [AI in agriculture] (confirmed)
Andreas Dengel, Prof., Ph.D., German

3:45 – 4:00 p.m.

Presentation 2 [AI in modern production] (confirmed)
Thomas Hähn, Managing director, CEO of Hahn

4:00 – 4:15 p.m.

Presentation 3 [AI in drug research] (confirmed)
Dr. Gunjan Bhardwaj, Founder and CEO, Innoplexus

4:15 – 4:30 p.m.

Pitch: PzarTech

4:30– 4:45 p.m.

Pitch: Correlor

4:45– 5:00 p.m.

Q & A and discussion with the participants
