Productive 4.0

A wide-angle photograph of a modern industrial manufacturing facility. The scene is filled with yellow robotic arms (KUKA brand) mounted on assembly lines. The robots are positioned over conveyor belts, likely performing tasks like welding, painting, or assembly. The factory has a high ceiling with visible steel trusses and bright overhead lighting. The overall atmosphere is one of a highly automated and productive industrial environment.

The diagram illustrates the PHYWISE TOOL architecture. It shows a Transmitter connected to a Channel Emulator, which is then connected to an RF Radio & Front End. The RF Radio & Front End is connected to a MAC Layer, which is connected to a Receiver/Wireless emulator. The Receiver/Wireless emulator is connected to a Receiver. The diagram also shows a separate path for a Receiver/Wireless emulator connected to a Receiver. The diagram is labeled with various components and their connections.
