

STORENGY DEVELOPS AND INVESTS IN TERRITORIAL HYDROGEN HUBS CLOSEST TO THE USES

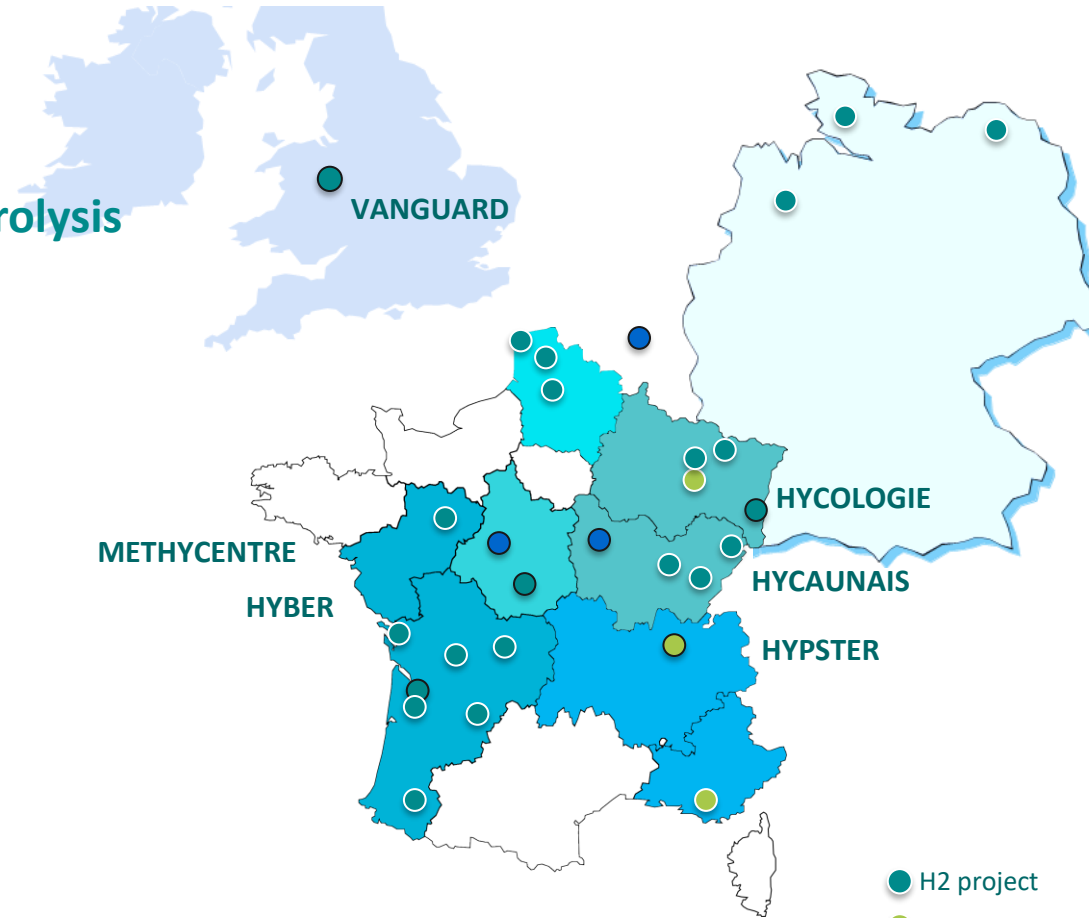

H₂ sources :

- **Electrolysis**
- **By-product of brine electrolysis**

Uses of H₂ :

- **Industry**
- **Mobility**
- **E-methane**

- H2 project
- H2 project with storage in salt caverns
- E-methane projects

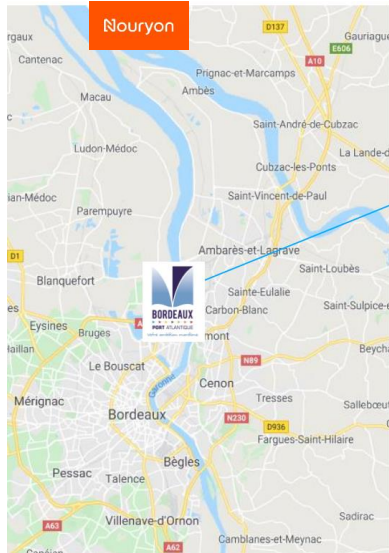

Projects portfolio :
50 MW by 2023

From 2023,
2 to 3 commissioned
projects each year

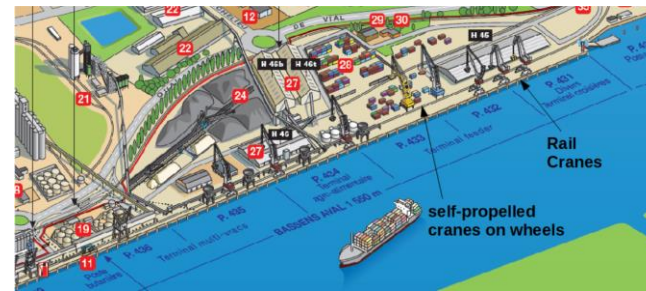

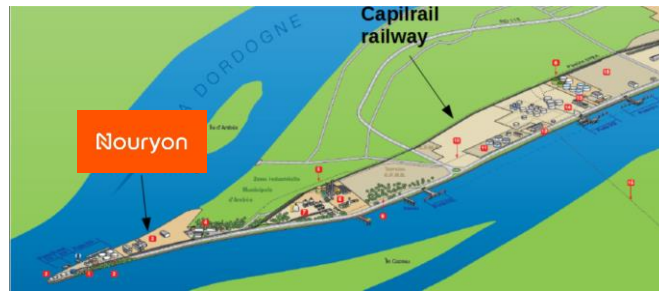

6
winning projects of French and
European funding calls for projects
TODAY

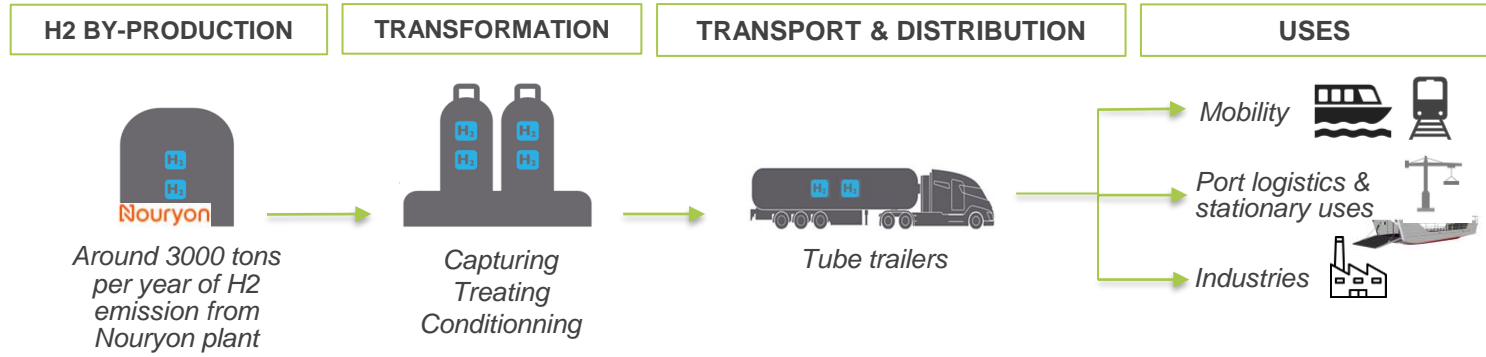

H2BORDEAUX: THE FIRST HYDROGEN HUB IN NOUVELLE AQUITAINE REGION

Develop a hydrogen industry at the Port de Bordeaux for a regional green ecosystem

An interaction with projects and uses in several cities of Nouvelle-Aquitaine region (30 MW, 13 H2 mobility stations + industrial consumption)

Studies partly financed by CEF Transport
