Forum 2021

21.09.2021, Fribourg / Switzerland
www.connect4geothermal.ch

On 21 September 2021, the first Swiss geothermal energy forum will take place, with an international focus. The aim is to raise the visibility of geothermal energy and to strengthen the network of the players in the value chain. More than 300 participants from Switzerland and abroad are expected. Be part of it and shape the future as a partner for geothermal energy.

Take advantage

- Register and attend the event
- Publish your profile with your competences, products, services, projects
- Book 1to1 appointments at the event in advance
- Exhibit your products and services
- Participate in thematic sessions
- Receive access to content of all sessions after the event
- Long term effect with networking after the event (platform remains online)

Unleash the potential for geothermal energy

The earth provides lasting heat: a dormant sustainable energy potential beneath our feet.

- By 2050, geothermal energy can cover 25% of Switzerland's heating needs in a CO₂-neutral way: a contribution to the energy transition and the reduction of Carbon dioxide emissions.
- A new value chain with regional jobs is created. Different professions work together and shape the future.

Become a partner: more visibility and a commitment to geothermal energy

Profile your company in a growing market and get more visibility before, during and after the forum. The platform will remain online after the Forum and will continue to offer networking opportunities. Find the right partner package for your organisation (next pages).

Ihre Vorteile

- ✓ Possibility to distribute your media during the event.
- ✓ Your logo on the platform in seventh position, with link on your website.
- ✓ Brief presentation of the communication partners at the beginning of the forum (plenary session).

CONNECT, the forum for geothermal energy

Effective networking for

Federal (national), cantonal (regional) and municipal authorities

Political decision-makers, energy, environment and spatial planning departments, economic departments

Component suppliers, contractors

Boreholes, well components, geothermal probes, energy piles, measuring devices and techniques, software, simulation, ...

Consumers of heat and cold

Real estate owners, industry, crafts, data centres, agriculture, fish farming, ...

Energy suppliers

Industrial utilities, district heating networks, energy producers

Planners

Geologists, water and environmental specialists, energy experts, urban and spatial planners, architects, engineers, project managers, ...

Universities and research centres

Professors, researchers, post docs, students

Investors

Institutions interested in long-term investments for carbon reduction

Possibilities and challenges with geothermal energy

First hand information on projects and international trends:

- Heat and cold in urban areas, for industry, for agriculture
- The subsoil as a storage for phase shifting
- Electricity, lithium, CO₂ capture
- Knowing, protecting and using underground resources

Speaker panel representing economics, authorities, research with experts from geology, energy, environment, urban development

Plenary and interactive parallel sessions

Market for national and international partnerships

Exchange of knowledge, experience, technologies, products, services

Integration of partial solutions into complete systems

Cooperation between authorities (framework conditions), industry (implementation) and universities (newest knowledge)

Networking through:

- Participant profiles
- Matchmaking for prearranged 1to1 meetings
- Thematic sessions, networking sessions
- Exhibition of products and services

Translation DE / FR / EN
