

Important projects of common European interest (IPCEI): Key requirements and alternatives

IPCEI Match-making Kick-off Event

8 June 2021

Demos Spatharis, Head of Unit Directorate General Competition Unit H2 – R&D&I, IPCEI and Environment

The views expressed in this document are those of the author and may not in any circumstances be regarded as stating an official position of DG Competition or of the European Commission.

Competition

IPCEIs – Key requirements

Common European Interest

- State aid concept Art. 107(3)(b) TFEU
- Not an EU Fund
- Assessment criteria in IPCEI Communication
- Market failure
- **Important**: large and/or risky, ambitious
- Contribution to EU strategies (e.g. EU hydrogen strategy)

- Cross-border / transnational
- Integrated project
- Positive spillover effects
 beyond participants
- No environmentally harmful subsidies
 - R&D

- First Industrial Deployment (FID)
- Infrastructure

Infrastructure single project (DK-DE **Fehmarn Belt** rail-road link)

R&D/FID integrated Microelectronics IPCEI (4 MS)

R&D/FID integrated **Batteries** IPCEI (7 MS)

R&D/FID integrated **Batteries** IPCEI (12 MS)

Specific eligibility criteria of the IPCEI Communication

Point 21: R & D & I

- Major innovative
 nature or
- Important value added beyond (global) state of the art in the sector

Point 22: First Industrial Deployment

- Develop a new product / service with high R & D content or
- Deployment of a fundamentally innovative production process
- Mass production
 excluded

- Point 23: Environmental, Energy or Transport projects
- Great importance for EU respective strategies or
- Significantly contributing to the internal market
- Open access, no dedicated infrastructure

Applicable State aid rules for the H₂ value chain

Clean hydrogen production

- EEAG/GBER: CAPEX and OPEX
- RAG: CAPEX

GBER: General Block Exemption Regulation EEAG: Environmental and Energy Aid Guidelines RAG: Regional Aid Guidelines RDIF: R&D&I Framework To be noted, this is not an exhaustive list, other State aid rules could potentially apply

Hydrogen mobility applications and related refuelling infrastructure

Clean hydrogen

transport and

distribution

• EEAG: CAPEX

GBER: in certain

cases CAPEX

• EEAG/GBER: CAPEX Industrial decarbonisation via hydrogen

EEAG/GBER:

CAPEX and

competitive

OPEX -

biddings

•

Equipments for hydrogen applications

- GBER (e.g. R&D or regional aid): CAPEX
- RAG or RDIF Framework: CAPEX

Climate, Energy and Environmental State aid Guidelines

Draft Guidelines published for public consultation on 7 June ->

https://ec.europa.eu/competition-policy/public-consultations/2021-ceeag_en

- To be adopted before the end of the year, applicable as of 2022
- Will be accompanied by new GBER provisions (no notification)
- Very broad scope, all relevant technologies
- CAPEX and OPEX support, e.g. via Carbon Contracts for Difference
- Section on aid for decarbonisation covers i.a. dedicated infrastructure projects (including for hydrogen and other low-carbon gases, and as well as CCS/CCU) mostly via aid schemes – no individual assessment
