Our project idea

HORIZON-CL2-2021-DEMOCRACY-01-03: Feminisms for a new age of democracy

Project: Empirical Analysis of Anti-feminist, Anti-gender Narratives and Development of Inclusive Resilience (Early stage, no established collaboration)

Value proposition as Coordinator: How contemporary art relates to anti-feminist discourses and how feminist art itself produces discourse and opposition.

Our project will:

- 2- contribute to societal resilience by recommending evidence-based policies and innovations.

We are looking for partners who can lead the following work packages:

1. Examine the contributions of modern theoretical frameworks of feminist thought (care ethics, ecofeminism, intersectional theory, inclusive feminism ,alternative frameworks which can enhance the proposal, activism, political practices)
2. Examine the contribution of modern theoretical frameworks of gender analysis (queer theory, masculinity studies, alternative frameworks which can enhance the proposal, activism, political practices)
3. Examine anti-gender and anti-feminist mobilisations (strategies,effects,their connections with the positioning of extreme populist discourses, political actors and traditionalist religious movements).
