**EMODnet Open Conference 14-16 June 2021**

## + A paradigm shift

Integrated water cycle approach

The main objective of the present research was to **develop a methodology** and to explore the capacity to **improve** the thermohaline circulation in regional ocean model applications by a better characterisation of the **land-ocean boundary conditions** able to represent the salinity features described for the Western Iberia region.

### Main Challenges:

- Obtain data near the river mouth;
- How to impose those inputs in regional ocean models;
- How to validate the results.

# +RIVER-ESTUARY-OCEAN COUPLING

Estuaries are very dynamic areas with influence from tides, river inputs and the open ocean conditions. Due to the tide, and their cycles, their discharges vary in time from ebb to flow and varying from spring to neap tides.

# MOHID Water

Estuarine Proxy

## OCEAN INPUTS

Tides and ocean water properties

## LAND INPUTS

River flow and temperature

## FES2014

Tides

Estuarine length

## PCOMS

Timeseries of ocean salinity and temperature

## MOHID Land

Modelled flow +  
Modelled Temperature +  
Salinity constant 0.01

## Observations

Observed flow +  
Modelled Temperature +  
Salinity constant 0.01

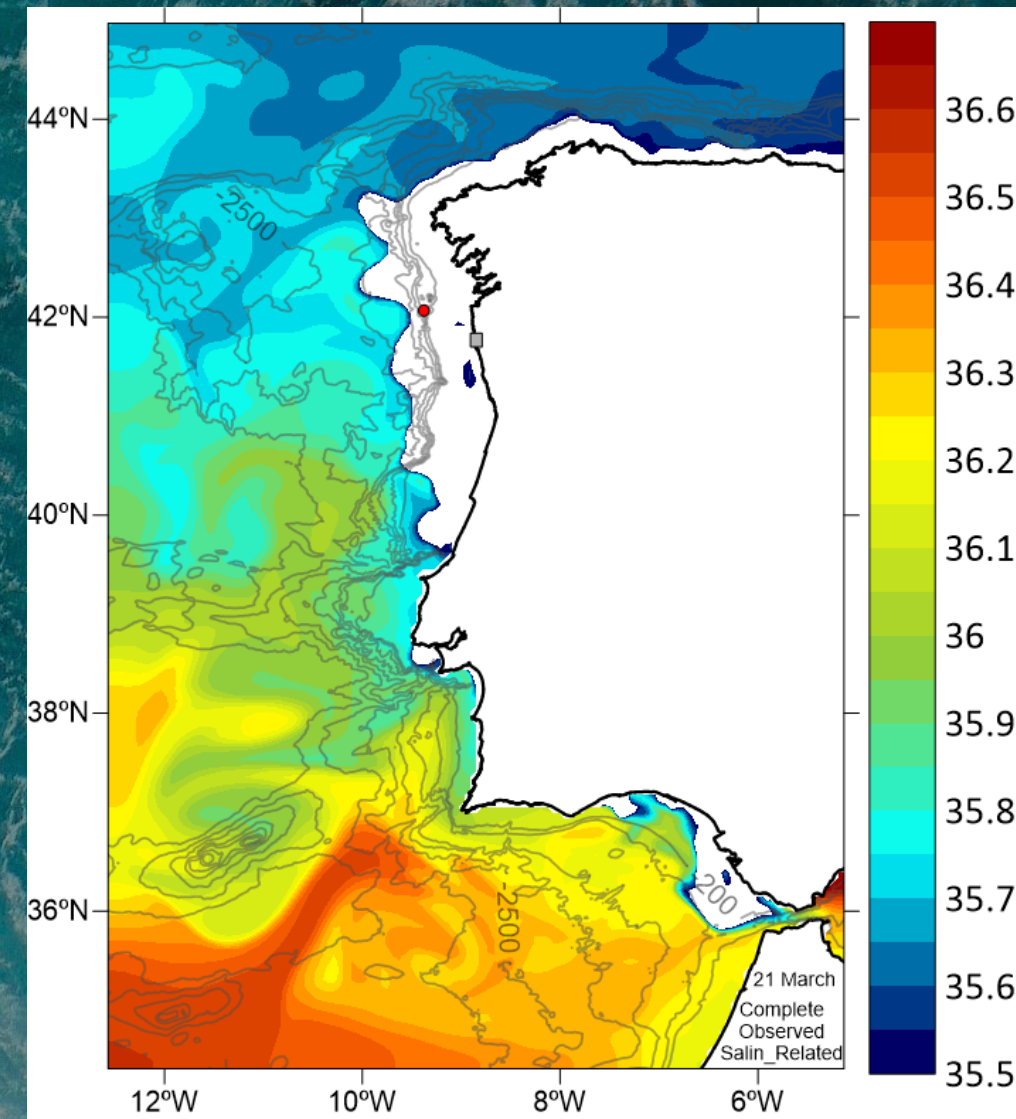

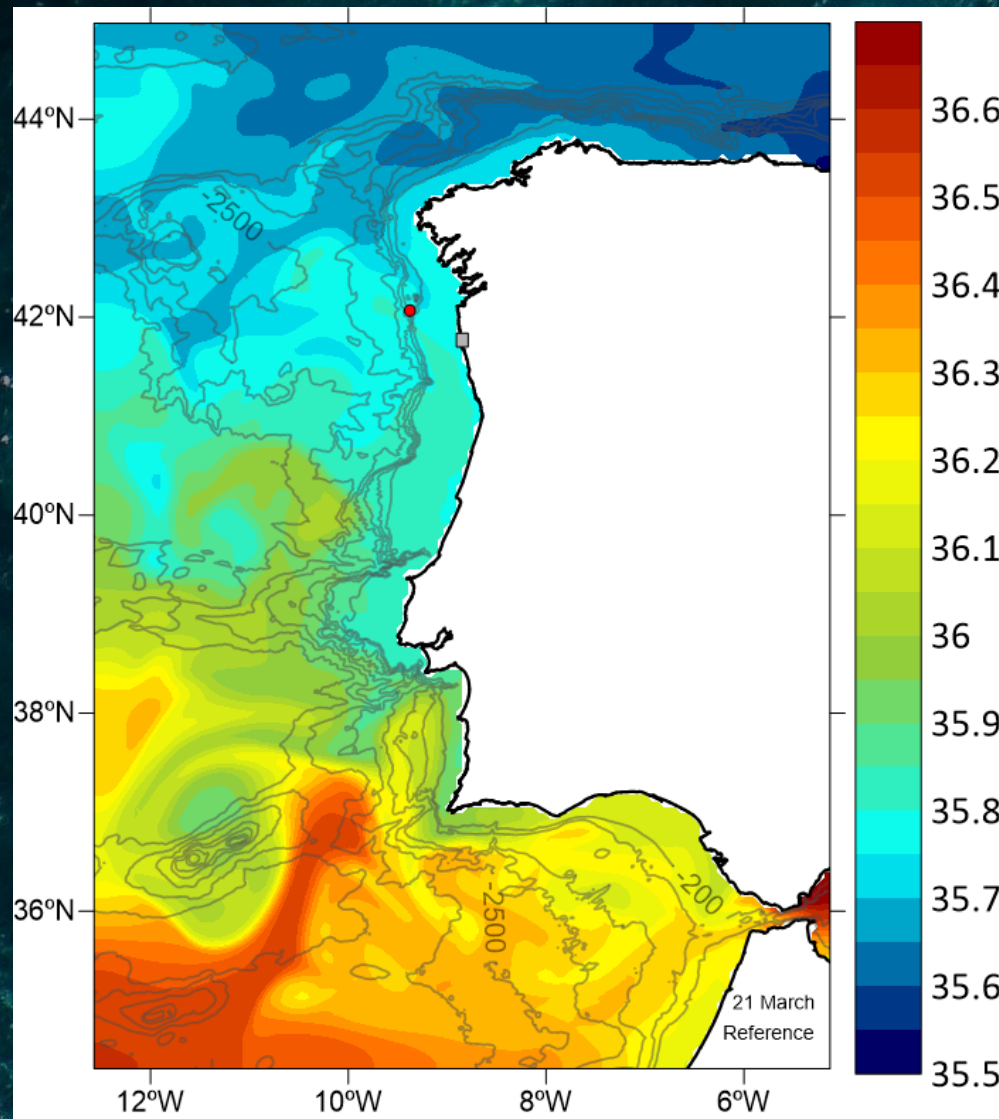

- Outer estuarine cell & outputs
- Water salinity
  - Temperature
  - Flow
  - Velocity
  - Oxygen
  - Nutrients

## + Fresh Water Influence

Large rain event in late March 2018

## +Benefits for users

- ✓ Generated improved and standardised freshwater flows and associated river inputs;
- ✓ Explored the capacity of hydrological models to represent observed river outflows by implementing state-of-the-art models;
- ✓ An estuarine proxy based on MOHID WATER was designed allowing to estimate in a simple way the estuarine mixing and the contributions to the open ocean;
- ✓ Enhanced the development of satellite salinity products to improve the quality of coastal products;
- ✓ A one-stop-shop was designed to access to the developed products and user interface to work and interact with the **CMEMS** and **EMODnet** products.

Thank you so much for your attention!
