# EMODnet for policy

- **Use case: Preparing pan-European MSP map**

Developing European MSP map: preparations

- MSP Directive → MS to prepare plans 2021

- Baltic approach: HELCOM-VASAB MSP Working group

- → MSP Data Expert Subgroup

- → Guidelines and data model

- Other regions /

project advancements:

MarSP: INSPIRE MSP data model

(extended Hilucs, 3D)

Baltic Marine Environment Protection Commission

Developing European MSP map: Current advancements

- EU MSP TEG Data was initiated in 2020

- Aim for **harmonising MSP "output data":** data resulting from the plans (area reservations, restriction and priority areas)

- Utilizing existing data models and applying "umbrella model" developed by EMODnet in cooperation with MSP TEG data

- → MS can provide data in any of the models and it can be used for the pan-European mapping and analysis

- → great example on utilizing regional and project outputs (not reinventing the wheel)
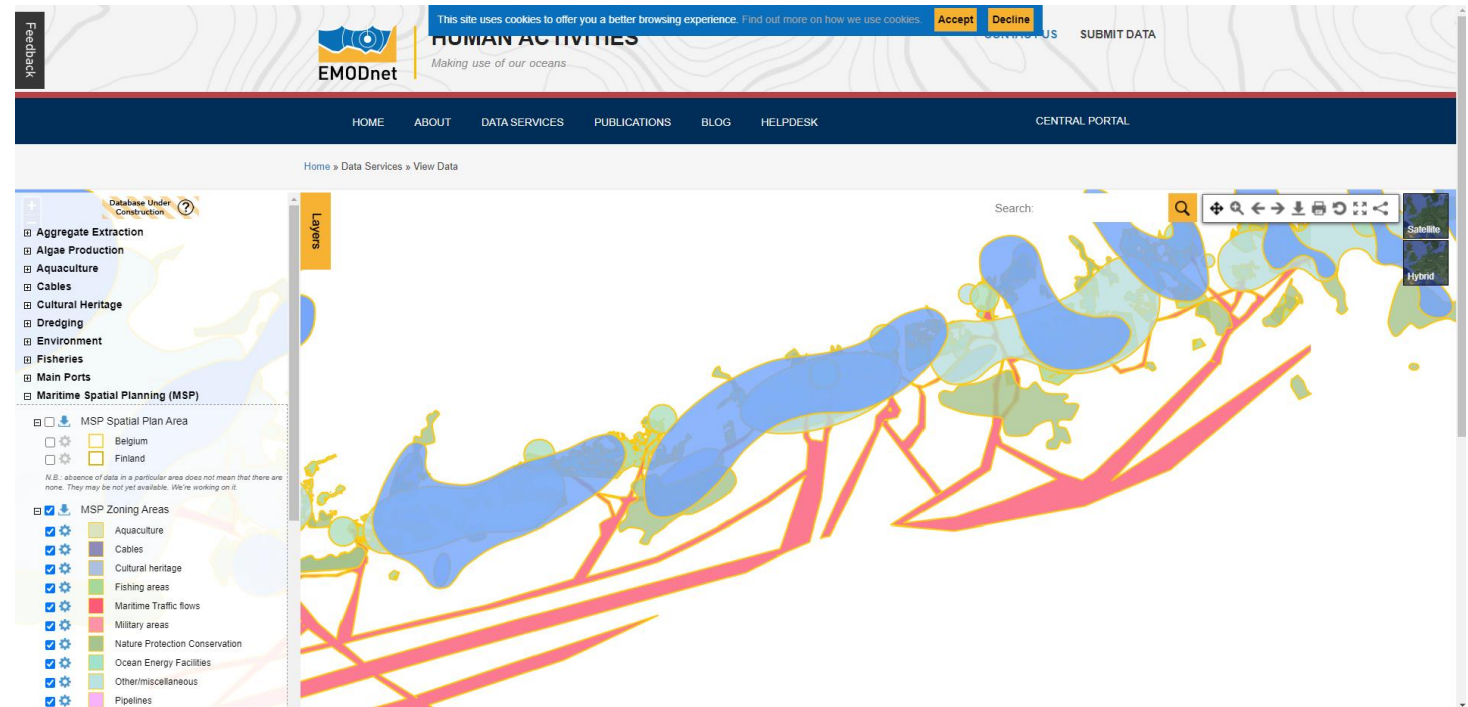

INSPIRE MSP Data model

HELCOM-VASAB

MSP EMODnet model

EMODnet Human Activities portal, European MSP plans.

Developing European MSP map: outputs

- MSP plans to be available in EMODnet human activities portal

- Poster

"Solution for harmonizing EU Maritime Spatial Planning (MSP) within EMODnet"

contains details

Thank you for your attention!
