Korea-France New Industries Technology Cooperation Forum(11.4, 2026, SEOUL)

⏰ Time02:40 PM - 05:30 PM

📅 Meetings6 meetings, 25 min each

📍 LocationPullman Ambassador Seoul

1:1 MEETING(OFFLINE)

ON-SITE

To take part in the pre-arranged one-to-one business meetings on the afternoon of Wednesday 4 November. After registering, please publish at least one cooperation profile in the Marketplace describing your technology and the partner you are looking for.

Go back

Click 'Continue'

Continue

Max. 6 meetings can be scheduled on-site.
Each meeting lasts 20 minutes, followed by a 10min break
(Note: each meeting is displayed as 25 min in the system)

4. Opportunities (requires)

To edit Opportunities, click 'Marketplace → My Opportunities' or 'My profile'

The screenshot displays the 'Innovation with South Korea' website. The top navigation bar includes links for Home, Participants, Marketplace, Agenda, Meetings, and Conversations. The 'Marketplace' link is highlighted with a red dashed box. A dropdown menu is open, showing options for 'My profile', 'Invite participant', and 'Logout', with 'My profile' also highlighted by a red dashed box. A red arrow points from the 'Marketplace' link to a callout window titled 'Marketplace'. This window shows '0 Opportunities found' and a search bar. A red dashed box highlights the 'My Opportunities' button in the callout. To the right, a section titled 'OPPORTUNITIES' lists three options: '+ Product', '+ Service', and '+ Project Cooperation', each with a brief description. A large grey arrow points from the 'Marketplace' section towards the 'OPPORTUNITIES' section.

OPPORTUNITIES

PRODUCT

Polarion-based cybersecurity TARA template

AUTOCRYPT's Cybersecurity TARA Template for Automotive is a project management tool for conducting Threat Analysis and Risk Assessment (TARA). The tool is available as an extension on Siemens' Polarion ALM application lifecycle management platform, enabling users to effectively implement TARA activities.

Optimized for the Polarion platform, the extension allows users to automatically connect their work items to the template, where they can benefit from the step-by-step manual and calculation tools.

In compliance with ISO/SAE 21434 and UN R155, the tool analyzes potential cyberattack objectives, vectors, and threats, followed by an assessment of their risk and severity levels based on its embedded calculation tools.

Applies to

- ICT
- Automotive

SERVICE

AUTOCRYPT's Solution for WP.29

Many companies have already begun to map out a timeline implementing changes to their existing supply chains to ensure that new vehicle models will be compliant with the regulations. However, the comprehensive nature of the compliance regulations can prove to be roadblocks for many, requiring additional assistance.

As an automotive cybersecurity solutions provider, AUTOCRYPT offers a three-fold, comprehensive approach to CSMS compliance, beginning with consultation, all the way to regular testing.

- Consulting and Training
- Security Product
- Testing

AUTOCRYPT can fulfill WP.29's new regulations through its comprehensive In-Vehicle Systems Security solution. By protecting ECUs and implementing an intrusion detection system (IDS) for the CAN Bus network system, AUTOCRYPT ensures that the CSMS requirements for WP.29 are met.
