

EU Brokerage Event

on Industrial KET* in Horizon Europe

*Key Enabling Technologies

10th November 2022 • Strasbourg

Conference &
Bilateral/B2B Meetings

Calls
2023- 2024

Project idea/ Field of expertise:

Engineered Stone

Organisation Name:

BELENCO

Addressed topic(s):

Manufacturing and Production, Materials, Circular Economy, Raw Materials

As a large enterprise, Belenco[®] is a strong leader in engineered stone industry with its experienced R&D team and advanced laboratory. The production line of Belenco[®] is the most sophisticated plant of Breton, and also the one with the biggest production capacity of 2.000.000 sqm per year. With the expertise of its production team and latest improvements of Breton, Belenco[®] produces the highest quality slabs available in the market.

Belenco Quartz Surfaces is a surface material;

- hygienic state-of-the-art surfaces with high durability,
- nonporous texture and high-quality polymers (binders) made up of more than 90% quartz,
- used in kitchen and bathroom counters, floors, walls and facade linings, benches and various special application areas.

Our expertise

Belenco offer a testbed for pilot production of surfacing materials by using secondary raw materials, upcycling and development of new products on industrial scale.

We have ability to apply real case studies and demo on;

- Bio-based or any types of novel resin,
- Mineral waste utilization,
- Eco-design including new materials and formats

Successfully completed various Projects on polymer composite surfaces, material development and design in engineered surfaces including solar radiation resistant surfaces and recycled material use in engineering stone.
