Cluster 4 · Digital, Industry & Space

Geonet Internet Ltd

Technology SME · Ireland 

PIC: 870433478

● INTEREST & EXPERTISE

Geonet Internet Ltd is an Ireland-based technology SME that designs, builds, and operates secure, scalable digital platforms. The company brings end-to-end software engineering capabilities — from UX/UI and backend development to AI services, DevOps, and production deployment — with proven experience across cultural heritage, civic engagement, health, and environmental domains. Geonet developed *Orbis*, a geo-social mapping platform validated through FAPESP national R&D funding in Brazil, and has contributed to EU-funded pilots on inclusive digital tools.

Core capabilities include: scalable cloud infrastructure that grows with project demand; artificial intelligence services such as text analysis, smart recommendations, pattern detection, and intelligent search; real-time interactive maps and geographic data visualization; seamless integration between different platforms and systems; built-in data protection and privacy compliance (GDPR-by-design); and fully accessible interfaces supporting 18+ languages, designed for users of all abilities.

Platform Engineering

Applied AI / ML
