HORIZON-HLTH-2027-03-TOOL-04: Virtual Human Twins (VHTs) for integrated clinical decision support in prevention and diagnosis

- "Availability and integration of the multi-modal data should be documented, and the ethical and sex dimensions be investigated"

- "Gather evidence via **health economic** and/or feasibility **studies** in real-world healthcare settings confirming cost-effectiveness vis-à-vis current practice"

- "Produce an exploitation plan on **regulatory compliance** and **intellectual property**"

- "solution design and development should be end-user-focused and draw on user and **non-user input**"

- "Best practice in VHT software development including **responsible AI development** should be followed"
