

Check-list for HE CSA actions:

single-stage submission procedure and 2nd stage of a two-stage submission procedure

Coordination and support actions (CSA) — Activities that contribute to the objectives of Horizon Europe. This excludes research and innovation (R&I) activities, except those carried out under the 'Widening participation and spreading excellence' component of the programme (part of 'Widening participation and strengthening the European Research Area'). Also eligible are bottom-up coordination actions which promote cooperation between legal entities from Member States and Associated Countries to strengthen the European Research Area, and which receive no EU co-funding for research activities.

Source: WP – General Annexes

Part	Item to be checked	YES	NO	Comments
A — Admissibility	Correct application form (downloaded from the electronic submission			
	system)			
	Full application completed, including all parts, mandatory annexes (if			
	obligatory: clinical trials, financial support to third parties, security			
	aspects, ethics self-assessment) and supporting documents			
	Applications readable, accessible and printable			
B — Eligibility	All beneficiaries registered in the Participant Register			
	All beneficiaries eligible for funding. Application submitted by one or			
	more legal entities established in a Member State or Associated			
	Country, or in another third country, if indicated in the call			
	Only eligible activities included (described in the call conditions and			
	focused on civil applications)			
	Comply with EU policy interests and priorities (environment, social,			
	security, industrial policy,)			
	Comply with ethical principles – ethics self-assessment included as			
	part of the application			
	A gender balance at all levels of personnel			
	Gender equality plan developed and published on the institution's			
	website (obligatory for all public bodies, research organisations or			
	higher education establishments)			
	Where the specific call/topic conditions allow for financial support to			
	third parties, the objectives and the expected results clearly described			
	(WP General Annexes)			
E — Documents	Application form Part A (filled online)			
	Application form Part B (narrative part - pdf)			
	Detailed budget table provided for lump sum project proposal.

<u>Application form – Part B</u> <u>Evaluation form</u>

Part	Item to be checked	YES	NO	Comments
Formal criteria	The structure of the template followed			
	Page limit 30 pages			
	If lump sum funding: 33 pages			
	Watermarked instruction pages removed			
	No hyperlinks used in the text			
	Font for the body text Times New Roman (Windows platforms),			
	Times/Times New Roman (Apple platforms) or Nimbus Roman No. 9			
	L (Linux distributions)			
	The minimum font size 11 points			
	Standard character spacing			
	Minimum of single line spacing			
	Page size A4			
	Margins (top, bottom, left, right) at least 15 mm			
	A list of sources used to generate content and citations, including			
	those generated by the AI tool			
1. Excellence	Clarity and pertinence of the project's objectives (Can a non-subject			
	expert understand what is written after one reading? Is the text			
	jargon-free?)			
	Quality of the proposed coordination and/or support measures			
	including soundness of methodology			
1.1 Objectives	Brief description of the objectives of the proposed work			
,	Description why the objectives are pertinent to the work programme			
	topic			
	Are the objectives measurable and verifiable?			
	Are the objectives realistically achievable?			
1.2 Coordination	Description of the coordination and/or support measures			
and/or support	Description of the overall methodology, including the concepts,			
measures and	models and assumptions			
methodology	Explanation how the methodology will enable to deliver the project's			
(For guidance on	objectives			
open science	Reference to the challenges identified in the chosen methodology			
practices and	and how to overcome them			
research data	Description how appropriate open science practices are			
management,	implemented as an integral part of the proposed methodology.			
please refer to the	Provided justification if none of these practices are appropriate for			
relevant section of	the project			
the <u>HE Programme</u>	Description how the choice of open science practices and their			
<u>Guide</u>)	implementation are adapted to the nature of the work (provided			
	justification if none of these practices are appropriate for the			
	project)			
	Data management plan planned to deliver by month 6 - how the			
	data/research outputs will be managed in line with the FAIR			
	principles (Findable, Accessible, Interoperable, Reusable)			
2. Impact	Credibility of the pathways (e.g. planned activities, events,			
	communication, dissemination, exploitation activities) to achieve the			
	expected outcomes and impacts specified in the work programme			

	Scale and significance of the contributions due to the project		
	Suitability and quality of the measures to maximise expected		
	outcomes and impacts, as set out in the dissemination and		
	exploitation plan, including communication activities		
2.1 Project's	Description how the project results contribute to the outcomes		
pathways towards	specified in the topic		
impact	Description how the project results contribute to the wider impacts,		
	in the longer term, specified in the respective destinations in the		
	work programme		
	Identification of the target groups that would		
	Included only such outcomes and impacts where the project would		
	make a significant and direct contribution		
	Explanation (where relevant) how the potential harm can be		
	managed		
	Indication of the scale and significance of the project's contribution		
	to the expected outcomes and impacts ('Scale' refers to how		
	widespread the outcomes and impacts are. 'Significance' refers to		
	the importance, or value, of the benefits.)		
	Explanation of the baselines, benchmarks and assumptions used for		
	the estimates		
	Quantification of the estimation of the effects expected from the		
	project, if possible		
	Explaination of assumptions, reference to relevant studies, statistics.		
	Description of the requirements and potential barriers arising from		
	factors beyond the scope and duration of the project (e.g.		
	uncertainty about the uptake of policy recommendations through		
	the ruling governments)		
	Indication of factors that might evolve over time		
2.2 Measures to	Description of the proposed mitigating measures	1	
maximise impact -	Description of the planned measures to maximise the impact of the project		
Dissemination,	A first version of the plan for the dissemination and exploitation of		
exploitation and	project results, including communication activities		
communication	Description of the planned dissemination, exploitation, and		
Communication	communication measures		
	A more detailed plan for the dissemination and exploitation of		
	project results, including communication planned by month 6		
	Description of how the communication measures promote the		
	project throughout the full project, inform and reach out to society,		
	and show the activities performed, and the use and the benefits for		
	citizens (strategically planned activities, clear objectives, statement		
	of the main messages, tools and channels reaching the chosen target		
	groups)		
	Measures are proportionate to the scale of the project containing		
	concrete actions to be implemented both during and after the end of		
	the project (e.g. standardisation activities)		
	Description of the target group(s) addressed (e.g. scientific		
	community, end users, financial actors, public at large)		
	Description of the possible follow-up of project, once it is finished		
	Explanation of why each measure is best suited to reach the target		
	group addressed		

	Description of the path for how to commercialise the innovations (if relevant)		
	Justification of how the exploitation is in the European Union's		
	interest; if it is expected primarily in non-associated third countries		
	Description of possible feedback to policy measures generated by the		
	project that will contribute to designing, monitoring, reviewing and		
	rectifying (if necessary) existing policy and programmatic measures		
	or shaping and supporting the implementation of new policy		
	initiatives and decisions (relevant for call topics asking specifically for		
	policy recommendations).		
	Description of the strategy for the management of intellectual		
	property and foreseen protection measures (patents, design rights,		
	copyrights, trade secrets, etc.) and how these would be used to		
2.3 Summary table	support exploitation Project impact pathway present and well-explained		
(Is it coherent with	Specific needs listed		
the remaining part	Expected results of project listed		
of the impact?)	Dissemination, exploitation and communication measures applied to		
,	the results		
	Target groups (use of further up-take of results, benefit from the		
	results)		
	Outcomes (expected change after successful dissemination and		
	exploitation of results)		
	Impacts - expected wider scientific, economic and societal effects (e.g. the project results contribute to restore		
	democratic values)		
3. Implementation	Quality and effectiveness of the work plan		
(Is it coherent with	Assessment of risks		
excellence and	Appropriateness of the effort assigned to work packages (e.g. SSH		
impact part?)	partners in leading roles, present in all work packages, various EU		
	Member States spread throughout work packages)		
	Appropriateness of the resources assigned to work packages and		
	overall		
	Capacity and role of each participant		
	Extent to which the consortium as a whole brings together the		
	necessary expertise (involvement of stakeholders from different		
2.1.14/2 1/2 1/2 2 2 2 2	disciplines and backgrounds)		
3.1 Work plan and resources	Brief presentation of the overall structure of the work plan Timing of the different work packages and their components (Gantt	-	
resources	chart or similar)		
	Graphical presentation of the components showing how they inter-	1	
	relate (Pert chart or similar)		
	Detailed work description:	1	
	Detailed work description.

contributions				
provided by third				
parties				
3.2 Capacity of	Description of the consortium - how it matches the project's			
participants and	objectives, and bring together the disciplinary and interdisciplinary			
consortium as a	knowledge (trans-disciplinary nature of a consortium, i.e. the			
whole	involvement of stakeholders from SSH, civil society, public			
	administration, economy, policy) Expertise of the consortium in social sciences and humanities, if	+		
	relevant			
	Expertise of the consortium in open science practices, if relevant	-		
	Expertise of the consortium in gender aspects of R&I, if relevant	-		
	Affiliated entities and associated partners, if any	+ -		
	Access to critical infrastructure needed for project	+		
	Complementarity of the members (the value chain, where	+		
	appropriate)			
	Contribution of each member to the project (valid role of each	+		
	partner, and adequate resources)			
	Industrial/commercial involvement to ensure exploitation of the			
	results (consistency with the specific measures proposed for			
	exploitation of the results - section 2.2)			
	Legal entities from a non-associated third country and International			
	Organisations can only participate as Associated Partners			
	Legal entities from non-associated third countries are eligible for			
	funding only if:			
	J - /		l l	

	 - they are from a low/middle income country identified in the WP Annexes as automatically eligible for funding; - because the call conditions explicitly provide for it; 		
	- because their participation is essential for implementing the action		
	Explanation of essential participation of such entity in the project		
Annexes to	Financial support to third parties		
proposal part B (if	Security aspects		
required by call)	Ethics self-assessment		
Other evaluation	Scope of the application - this application is 'in scope' because it		
questions	corresponds, wholly or in part, to the topic description against which		
	it has been submitted		
	Exceptional funding for third country participants/international		
	organisations – description of their essential participation in the		
	project (if relevant)		
	Do the activities have an exclusive focus on civil applications		
	(activities intended to be used in military application or aims to serve		
	military purposes cannot be funded)?
