# Horizon Europe Cluster 1: Health Brokerage Event

MEDICAL

**Project Idea / Field of Expertise :**

**Organisation Name:**

**Addressed Topic(s) & Call(s):**

1- Create a virtual community focused on the call outcome to optimize the impact of the results.

2- Enter in your consortium with a dissemination and communication role.

**ACCELERALIA**  
acceleration platform

High interest in the **Destination 5** topics such as **HORIZON-HLTH-2023-TOOL-05-04**: Better integration and use of health-related realworld and research data, including genomics, for improved clinical outcomes

**ISTANBUL  
PROJECT  
ACADEMY**

# Acceleralia

Where the performance of communities or remote work teams is **optimized through virtual spaces**, transforming education into tangible results through action, bringing together education and acceleration.

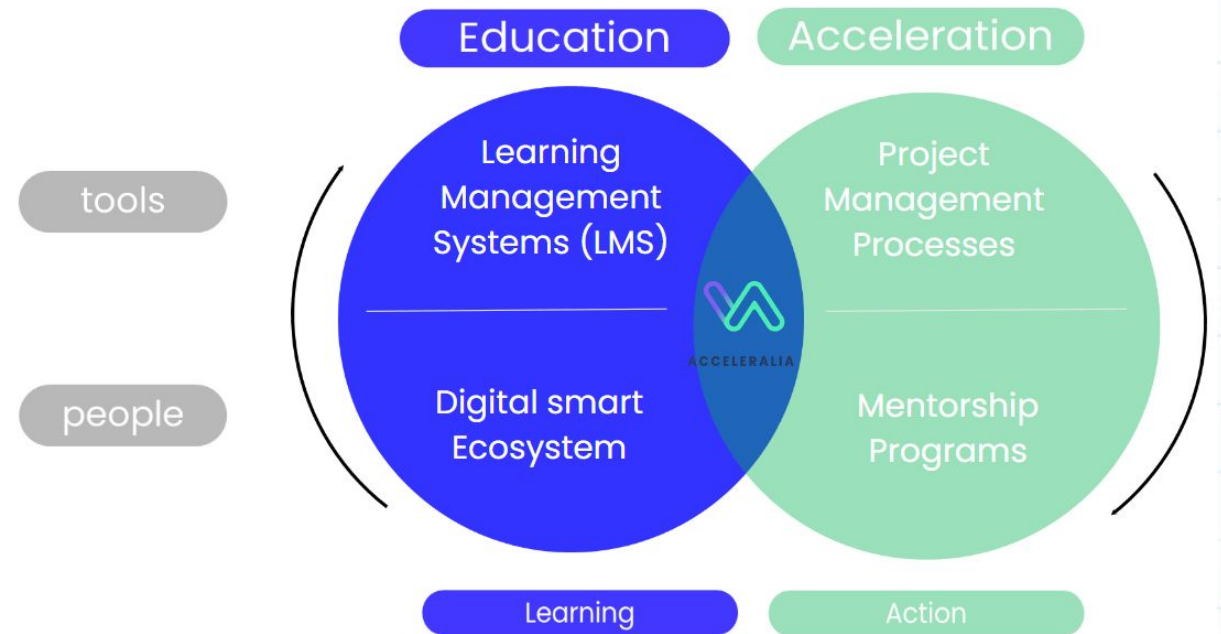

1' video

## Past EU experience:

[ERASMUS-EDU-2022-PI-ALL-INNO] — [Partnerships for Innovation: Alliances]

HORIZON-JU-CLEANH2-2022-06-02 Hydrogen Valleys (small-scale)

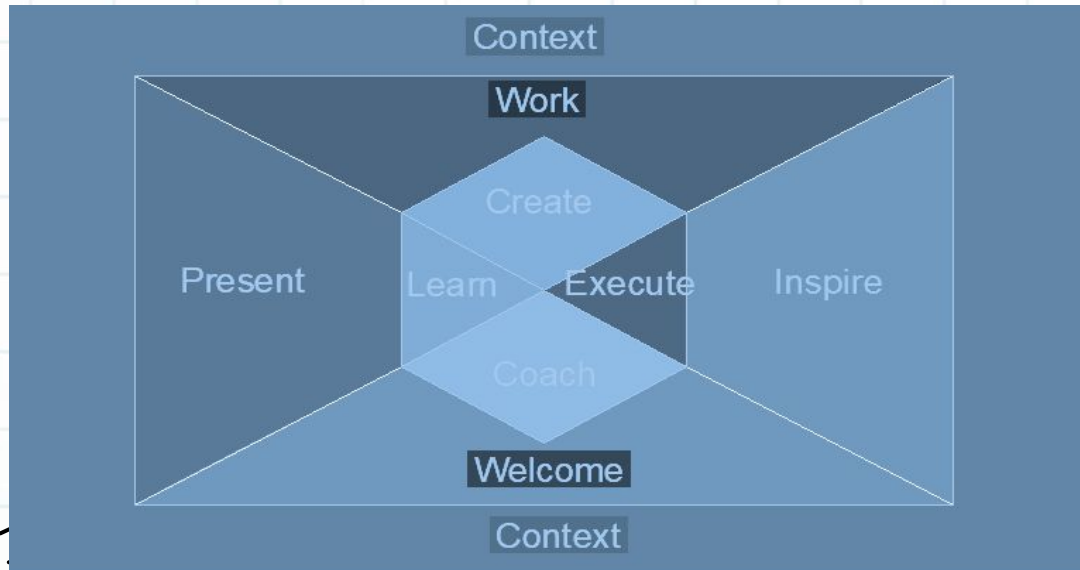

# Example of a digital land

Where the performance of communities or remote work teams is optimized through virtual spaces. Our vision of future work in these virtual spaces has 4 areas:

1. **Learn** = To generate knowledge in customized online academies.
2. **Create** = To create ideas or solve challenges with the knowledge acquired in the Learn area.
3. **Execute** = To execute the best ideas generated in the Create area.
4. **Coach** = With experts to give support and mentoring to the Learn, Create or Execute areas.

# Value proposal

- Promotes the **feeling of belonging** to a group or collective.
- Encourages **participation and exchange of ideas**.
- **Improves communication** among the different members. Real time communications and interactions.
- **Promotes cooperation** between institutions and end users.
- **Cradle of innovation and knowledge** all around the world with minimum resources.
- **Exchange information, files and documents** that allow you to continue learning or developing yourself in a better way.
- **Flexibility** at the center of everything as the users can study, work or interact without the need to go to an institution and establish your own schedule.
- It favors having a facilitator or ecosystem manager, who will be in charge of promoting participation and establishing guidelines for effective dialogue, as well as guiding and advising the user on what they need.

# Contact details

Let's build  
projects together

Partners	Contribution
Partner 1	Coordinator
