Horizon Europe Cluster 1: Health Brokerage Event

Field of Expertise :

eHealth services, Interoperability, secondary use of data

Products: eHealthPass (eHealth platform for the patient and the HCPs), XDS (data management), Click Zois (Assisted Living for elderly people)

Organisation Name:

Gnomon Informatics SA

Addressed Topic(s) & Call(s):

All topics related to tools for a better management of health services, patient self-management, personalized solutions, Electronic health records exchange. For example:

HORIZON-HLTH-2023-CARE-04-01 - Maintaining access to regular health and care services in case of cross-border emergencies

HORIZON-HLTH-2024-STAYHLTH-01-05-two-stage: Personalised prevention of non-communicable diseases - addressing areas of unmet needs using multiple data sources

HORIZON-HLTH-2024-CARE-04-04-two-stage: Access to health and care services for people in vulnerable situations

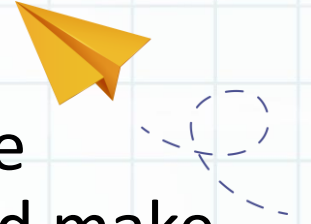

Gnomon Informatics SA

- SME company based in Thessaloniki, Greece
- Solutions for patient empowerment and assisted living. Creator of the eHealthPass, a patient centred platform that enables frictionless data flow across systems and clouds
- Leading and participating in many different national funded and EU funded projects
 - Case studies: Diabetes, Chronic pain, Hypertension, Heart Failure, Patients triaging in emergencies, Healthy ageing for older people, Smart systems for the assisted living of elderly people, toolbox for visualizations of data referring to immune mediated diseases

Our expertise

- Our suggestion is that the big challenge is combining innovative technologies (VR, AI tools etc) with digital ehealth solutions and make a good use of secondary data (datalake concept) to provide customized solutions for specific case studies
- Offer: A product that is already Class II-Medical Device certified and our <10years experience in delivering solutions and products
- Request: Collaborations with partners and consortiums that will give us the chance to be deeper involved in more case studies (clinical studies, AI tools, secondary use of data etc)
