## Project Idea / Field of Expertise :

[Further detail - https://www.forgottenpatients.org/webinars](https://www.forgottenpatients.org/webinars)

Research project exploring medically unexplained symptoms (MUS), delayed diagnoses and 'forgotten' patients – where does the health journey go wrong and how can we help affected individuals, families and healthcare professionals?

## Organisation Name:

St Gilesmedical London & Berlin on behalf of the **'Forgotten Patients Group'**

## Addressed Topic(s) & Call(s):

The problem of MUS, patients who are passed between healthcare providers without a resolution to their problems and those who feel lost within the system affects significant numbers, wastes huge resources yet remains barely touched by researchers. We are seeking collaboration and funding.

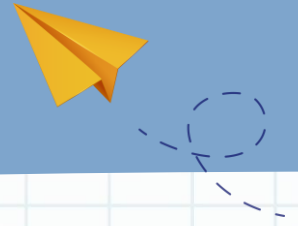

# St Gilesmedical London & Berlin

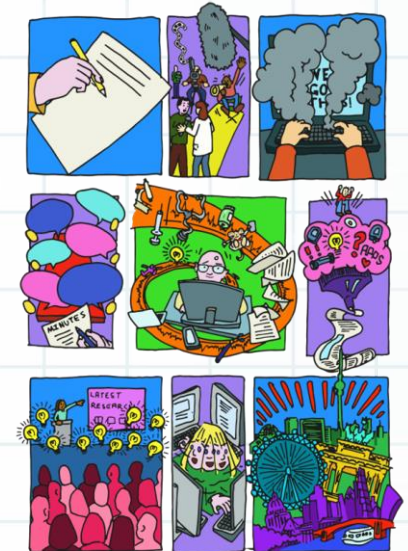

Healthcare  
company of the  
year 2023 -  
Medical  
communications  
and education

- We are independent health communication organisation.
- Our team produce manuscripts, medical documentation, marketing material and healthcare films, develop social media and deliver meetings.
- We also provide pro bono support for research and education in partnership with academia and charitable organisations.
- The problem of 'Forgotten patients' is challenging, widely neglected and under research. Data is limited and current coding does not permit identification of those affected. We know there is an issue as raising the topic generates many personal stories and much debate.
- We wish to jointly dedicate time and effort to better understanding why individuals become 'lost' and in developing solutions.
- **We invite you to join us in this ambitious project.**

# Our project idea / expertise

- **What are we looking for:** Members of the 'Forgotten Patients' group are looking for individuals/organizations to help jointly build and deliver a multidisciplinary, multicenter project using mixed methods/complex interventions research. This will include seeking local, national and EU funding.
- **Problem:** The challenge of 'Forgotten Patients' is highlighted in our recent article: <http://bit.ly/3A8ryua>
- **Aim:** The advancement of health for people with medically unexplained symptoms, overlooked diseases or common unresolved health problems.
- **Objectives:**
  - Build a comprehensive programme in support of 'Forgotten Patients.'
  - Facilitate, sponsor, or deliver research exploring causation and potential solutions.
  - Develop resources for people with overlooked health issues.
  - Provide support/signposting for patients and families who are not being helped elsewhere.
  - Promoting education for patients and healthcare professionals (HCP).
- **What can we offer to other proposals or request from partners:**
  - Research management, medical writing e.g., protocols, funding applications, CTRs, manuscripts and meetings
