### [Call] HORIZON-HLTH-2024-STAYHLTH-01-05-two-stage:

- **Modelling co-morbidities to develop novel and effective therapeutic approaches: diabetes and arthritis (Partner: Fundação Oswaldo Cruz)**

The focus of this proposal is on a much-unexplored interaction between diabetes and arthritis. It proposes the development of epidemiological models that will take this critical information as input to help designing phase / clinical trials and model the impact of future intervention programs to control the consequences of diabetes in arthritis people, based on the novel therapies.

The pilot analyses in this model of diabetes + arthritis to a) define the statistical power of the follow-up experiments and b) monitor gene expression products in the lung, heart and joint. Monitor markers of diabetes development in the different settings

Data source: clinical trial

### [Call] HORIZON-HLTH-2024-ENVHLTH-02-06-two-stage

- **Climate Change Impact on Mental Health and its Socioeconomic Drivers**

This project has two main objectives: (a) to generate new evidence about the impact of climate change on mental health outcomes in Brazil and in selected European countries, (b) to provide open access to the evidences generated through a web platform in order to make visible the impacts of climate change as well as supporting policy makers with public policy design.

### [Call] HORIZON-HLTH-2024-CARE-04-04-two-stage

- **Towards a Resilient Health System**

The project proposes a historical analysis of public policy impact on the formation of resilient health systems organized through primary health care (PHC) in areas with vulnerable population. It aims also to identify advances, challenges, threats, and paths for developing a resilient health system to take care of vulnerable population in specific regions in Brazil and selected European Countries.

Data Source: Datasus

### HORIZON-CL2-2024-TRANSFORMATIONS-01-09

- **Income Transfers and Social Mobility**

Produce a set of important statistics to understand the evolution of poverty, with a focus on the beneficiaries of income transfer programs. In the case of Brazil, the Programa Bolsa Família (PBF) - the main Brazilian policy for financial support to the most vulnerable - is to be considered. The proposal is to analyze the impact of those income transfer programs on social mobility in selected countries.

#### Data Sources:

- 1: Programa Bolsa Família (PBF);
- 2: Unified Registry for Social Programs (CadÚnico)

- The success rate\* of eligible applicants from Brazil is **31.25%**, which is above the EU average of **21.47%**;
- Brazil is in 10th position in participations share in HE among third countries;
- 46 participations from Brazil;
- Local Funding Agencies;
- **The Brazilian National Health System (SUS) serves more than 190 million people**

DATASUS is the database that gathers information about the population under care, providing data on: morbidity, disability, access to services, quality of care, living conditions, and environmental factors. It also provides information on Health Care for the population, registration (Assistential Network) of the hospital and outpatient networks, registration of health facilities, as well as information on financial resources and Demographic and Socioeconomic information. ([www.datasus.gov.br](http://www.datasus.gov.br))

(\*)This success rate is displayed for applicants. Note that success rates for applicants may differ from success rates of proposals, which is displayed on the Horizon Dashboard.
